

The Division of Public Health Sciences Postdoctoral Research Fellowship in Public Health

The Division of Public Health Sciences is currently seeking applications for a highly motivated Postdoctoral Research Scholar to support our research efforts on patient engagement and genomic characterization.

This position involves working with a multidisciplinary team of researchers on a center grant to integrate patient engagement into studies on the return of genomic results among cancer patients, particularly those populations experiencing cancer disparities. The postdoctoral fellow will receive training in embedded ethics and utilize these skills throughout the center. (S)he will assist in developing, conducting, and analyzing participant interviews, analyzing quantitative data, and supporting other research activities throughout the center and the Division. This position will be ideal for a postdoctoral candidate who has experience or interest in building skills in cancer disparities, return of genomic results, patient engagement, and ethics.

Applicants with interest and experience in cancer health disparities and genomic return of results will be prioritized. However, all applications will be considered.

Applications will be considered as they are received and on a rolling basis.

Eligibility

Doctoral training and research experience in clinical settings, public health, behavioral sciences, medical ethics, epidemiology, dissemination and implementation science, or a related field.

About the Division of Public Health Sciences

The division has a strong mentoring and career development program with a track record of successfully placing trainees. Successful applicants will be joining a vibrant cohort of postdoctoral fellows across the Division. You'll find ample opportunities to collaborate with epidemiological, clinical, basic science, statistical, and other faculty across the academic campuses of Washington University.

The division is led by Graham Colditz, MD, DrPH, an internationally recognized leader in cancer prevention and control. Our multidisciplinary faculty conducts world-leading research on a wide range of health issues and leads community education and outreach to prevent cancer and other diseases, promote population health, and improve quality and access to healthcare in Missouri and beyond.

To Apply

Send by email to Dr. Bettina Drake at drakeb@wustl.edu and Dr. Graham Colditz at colditzg@wustl.edu:

- A cover letter
- Curriculum vitae
- List of professional references
