

DIABETES SURVIVAL SKILLS

Learn basic survival skills needed to care for a child with diabetes.

- Basic pathophysiology
- Checking blood sugars
- Administering injections
- Counting carbs
- Calculating insulin doses
- Treating hypoglycemia
- Handling sick days

This class is designed for, but not limited to, school nurses, caregivers, babysitters, grandparents, foster and adoptive families, older siblings, and children who were diagnosed at a young age and beginning to manage more of their own care.

Classes are held in-person from

10:00 am -12:00 pm in the SLCH North West Tower
