

Membership Benefits Summary

Our Center reflects the work of a growing group of investigators who are leaders in defining innovations in translational research and have been active in addressing the multilevel causes of obesity and diabetes in at-risk communities.

As a member, you will gain:

Support from experts and administrative staff

- ✓ Request one-on-one consultations with [core leads](#) on study design and grant proposals related to diabetes research
- ✓ Request administrative support for project development and manuscript support

Access to resources and funding opportunities

- ✓ Utilize the Center's [library of resources](#) related to study design and grant and manuscript development.
- ✓ Share and receive news about member activities; upcoming events and funding opportunities through a monthly e-newsletter

Professional connections

- ✓ Extend professional contacts with investigators from many different fields through the Center's regional and national partners

Opportunities for professional growth

- ✓ Apply to receive a [Pilot & Feasibility Program](#) pilot grant
- ✓ Join in in the Center's enrichment activities including manuscript development events, proposal workshops, and informational webinars and speaker events.
