LLAMAS
~This week we learned all about llamas! Many live in South American and they are relatives of the camel. They like to live in herds in the mountains. They have short tails and usually have brown, black, grey or white fur. Their ears are shaped like bananas. We made llama masks and habitats. We read many Llama Lama books by Anna Dewdney!
Next week we will begin talking about holiday traditions! You are welcome to send in a short video about your family holiday traditions if interested. Since parents cannot come into the school to share their traditions, you are welcome to share them with a video. No pressure, we understand that this is a busy time of year. Thank you!

❤️ Lots of Love, Chona & Katie
