The Teddy Bears had loads of fun during construction week! The construction prop box provided dress ups, tools, and signs to engage our imaginations. The children dipped construction vehicles in paint and rolled them over paper to make amazing designs. Building projects included paper bag houses, popsicle stick homes, skyscrapers, Lego structures, and block castles. The Teddies tested their fine motor skills by experimenting with a play screwdriver. We discovered what imprint is made when you press a plastic screw in play dough. It was a very constructive week!

More Teddy Bear fun...

Coming up...
5/19/21 - Last Day of School,
~Seriously, where did the year go?
~Next week we will be learning about spiders!

Love, Chona & Katie
