Have Some Fun With Trees!

- Let your child select a tree in your yard, at Grandma’s, or in your favorite park. Get acquainted with it. Touch it. Feel the bark. Look at the leaves. Watch “your tree” change with the seasons of the year. Keep a journal about the changes and continue to track it for an extended period of time.

- Compare the size, shape, and colors of leaves from different types of trees. Compare the bark too! Make leaf and bark rubbings.

- Play a game at home or the store. How many things can you find that are made of wood? How many things can you find that grow on trees?

- Play a game in the car. How many animals use trees? How do they use trees? How do we use trees?
