This week we enjoyed talking about caterpillars. We have actual caterpillars that began small and we have been watching them grow and grow! They will spin a chrysalis and eventually become butterflies.
Animal Babies...

Miss Becky talked to us about animal babies. Some babies are born from an egg like birds and turtles. Others are born from their mothers. Some animals go through a metamorphosis, like frogs and butterflies. The opossum has a pouch like a kangaroo and is a marsupial.

LOOKING AHEAD...

4/14-15/22 - Parent Teacher Conferences
