

Technology Commercialization Office: Undergraduate Student Licensing Intern

Position Type

Student Employment – On Campus

Desired Class Level(s)

Junior, Senior

Work Authorization

Eligible to work without visa sponsorship

Degree Level

Bachelor

Description

The Technology Commercialization Office (TCO) is seeking undergraduate (third or fourth year) students to work as Licensing Interns. Primary duties will include evaluating invention disclosures in the areas of life science, physical science, engineering, wireless, and software technologies for marketability and commercial potential. Licensing Interns conduct market research and assessment, identify and analyze competitive landscapes, and generate marketing documents to describe the invention and its value proposition. Additionally, Licensing Interns help identify potential licensees for The Ohio State University's technologies and complete other projects to help advance Ohio State's commercialization efforts.

The culture of creativity, respect, responsiveness, and accountability is something we believe in, and we live it every day. By working these values into our daily activities, we begin to transform ourselves and generate an ecosystem of active participants willing to help us succeed.

Licensing Interns play an integral part in assessing and marketing Ohio State inventions. Licensing Interns complete market analyses to assess the marketability and commercial potential of Ohio State inventions. They work alongside law and business students on the revolutionary research and innovation being done at Ohio State. Bringing their science and/or engineering skill-set to the table, students have the opportunity to perform the first part of a technology's market analysis related to a specific invention and research discipline.

Qualifications

Desired skills include: in pursuit of a degree in a field of science or engineering and a strong academic record; ability to multi-task in an active environment; ability to work with minimal direction; experience reading and understanding technical documentation and scientific literature; strong written and verbal communications skills; and an interest in providing excellent service to the Ohio State community. TCO is seeking a commitment of 10-15 hours per week during the year. Compensation is \$9-11 per hour based on experience.
