SROP at Ohio State is a 8-week summer research experience that gives historically underrepresented undergraduates an opportunity to explore continuing on for an advanced, graduate degree.

You will be mentored by an Ohio State faculty member, carry out a research project, and develop the kind of student/faculty relationship that is crucial in graduate school and beyond. Alumni of SROP may also be eligible for a Patrick S. Osmer SROP Fellowship if they are accepted into an Ohio State graduate program.

THE OHIO STATE UNIVERSITY
GRADUATE SCHOOL

SROP provides you with a meaningful, realistic assessment of your interest in graduate study. The program includes weekly professional development workshops and a culminating research conference where you present your work.
