Village Academy Schools is seeking an adjunct Chemistry/Physical Science teacher for the academic year, to begin effective immediately.

Village Academy Schools seek to educate college-bound students who not only wish to become self-fulfilled individuals but also to function as responsible, compassionate citizens of the world.

Village Academy offers students from pre-kindergarten through grade twelve an unparalleled educational experience. In addition to exceptionally supportive and engaged faculty members, a challenging yet flexible curriculum enables our students to pursue their interests and passions both inside and outside the classroom.

Position Overview:
This position teaches classes for Upper School General Chemistry, Advanced Placement Chemistry (AP), and Physical Science. Apart from specific teaching activities, teachers are also responsible for establishing an encouraging environment for the academic and personal development and success of their students.

Responsibilities:
- To teach the School’s curriculum and support its philosophy
- Maintain student attendance and grades
- Maintain and update course web sites
- Evaluate and grade students on various parameters
- Provide necessary support to meet student’s instructional needs
- Provide necessary differentiated learning strategies in the classroom
- Manage classroom behavior for student success
- Be an active member in all the activities related to the subject
- Organize contests at the state international festival
- Organize and attend parent/teacher meetings
- Make sure that student development and achievement is permanent and appropriate for age group, subject area, and/or program classification
- Provide motivating learning experiences
- Conduct research activities in the field by reading current literature, conducting surveys, and participating in professional conferences and other events.

**Required Skills:**
- Superior Teaching
- The use of inquiry based investigative skills and lab protocols
- Excellent written and oral communication skills
- Interpersonal and presentation competences
- Highly organized and good planning skills
- Efficient in time management
- Patient and reliable
- Able to evaluate student's performance, behavior and social development
- Responsible and attentive
- Dynamic and enthusiastic
- Problem solving capacity
- Willing to assist and support students
- Technology savvy, familiar with Google Docs.
- Ability to tie concepts cross curricular

**Education:**
Minimum of a Bachelor's degree in Chemistry, with a valid Ohio teaching licensure is preferable, however, not required. Previous teaching and/or industry experience is considered a plus. Must be able to pass a BCI/FBI check as well as pass a drug test.
Salary and Benefits:
Salary commensurate with experience, 403(b) plan, insurance benefits available for full-time employees. Please forward resume to Tres Marangoni, Head of School: marangonit@villageacademy.org
