POST-DOCTORAL RESEARCHER

LOCATION
The Ohio State University, Medical Center Campus

JOB TITLE
Post-Doctoral Researcher
• Medicine, School Biomedical Sciences Neuroscience

POSITION DESCRIPTION
The Post-Doctoral Researcher will pursue continued research experience and training within the Department of Neuroscience. Independent research will be conducted under the guidance of Dr. Erica Glasper to investigate neural, immune, and sociobiological underpinnings of early adverse events in a novel, biparental mammalian model. The Post-Doctoral researcher will contribute, execute, and envision molecular, behavioral, and neuromorphological experiments within a new, resident laboratory within the Institute of Behavioral Medicine Research. Finally, the Post-Doctoral Researcher will contribute to manuscript writing, presenting research, and data management.

MINIMUM EDUCATION & EXPERIENCE QUALIFICATIONS
Doctorate degree in Neuroscience; Biology; Neurophysiology; Endocrinology; Immunology and other related fields or an equivalent combination of education and experience.

Previous research experience preferred.
