CATALYST, the Center for the Advancement of Team Science, Analytics and Systems Thinking in Health Services and Implementation Science Research in The Ohio State University (OSU) College of Medicine is currently seeking postdoctoral researchers.

CATALYST is seeking qualified individuals interested in joining our team in a high-functioning, high-throughput and strongly mentored environment. Candidates will be part of a team of postdocs who work hand-in-hand with senior scholars to accelerate the pace of publication of research results. As a result, candidates are expected to have strong English writing skills. The post-doctoral research experience will conclude with a significant cadre of articles in support of a first academic appointment.

In support of ongoing research projects, the post-doctoral researcher will assist principal investigator(s) in quantitative and qualitative analyses related to the research projects; assist with report presentation; help draft manuscripts for submission; and develop presentations for dissemination of results. The post-doctoral researcher will also participate in the development of research proposals seeking external funding; it is expected the post-doctoral researcher will participate as Co-investigator as appropriate in new research grant submissions. In new research projects designed as pilot work for new grant submissions, the post-doctoral researcher will assist with project development, data collection, and both quantitative and qualitative analyses.

The post-doctoral researcher will be appointed in the College of Medicine at The Ohio State University. The position is a full-time position for 1-2 years. The domain of research we are engaged in involves broad topics in health services and implementation science research including information technology development and implementation, practice redesign, patient safety, comparative effectiveness research, and patient engagement.

Why seek a Post-Doc at OSU?
- Access to the OSU Wexner Medical Center, a learning laboratory that allows trainees to see real-world application and implementation of theories and principles in a clinical setting
- Multidisciplinary clinical and translational research opportunities that bridge biomedical informatics, public health, computer science, and care delivery
- Selected postdocs receive financial support that includes a stipend, moving expenses, benefits, travel, and other training-related expenses

Application Deadline: Open until filled, applications reviewed on an ongoing basis.

Required Application Materials: CV and letter of application articulating the reason for your interest in this opportunity and outlining the status of your doctoral studies.

To apply, please send application materials to CATALYST Executive Director Ann McAlearney, ScD, at: Ann.McAlearney@osumc.edu
