Providers/Research Grants Programs No citizenship restrictions. Institutions determine the training and research, and select the research scholars. Visiting scientists are eligible to apply. To be considered for a postdoctoral appointment, a candidate must be nominated and sponsored by a member of the Laboratory's technical staff. To be eligible for an LSRF fellowship, candidates must have advanced degree research laboratory training at the time of application. These grants offer assistance to AID for Scientific Research are competitive funds that are intended to significantly develop all scientific research (research, development, and the social sciences) to the natural sciences. The grants provide financial support for creative and pioneering research projects that will become the foundation of social development. The research projects are selected using a peer-review process. Awardees are required to prepare a scientific report and present a summary of their research findings to the JSPS Fellows, Grant Providers/Research Programs.

Investigators from California not eligible for TRDRP funding.

Postdoctoral fellowship awards are designed to provide funding for an individual who has recently earned a PhD or MD degree a research project, under the mentorship of an investigator at a U.S. research institute.

Applicants should read Considerations for Writing Clinical Treatment Studies Proposals. Postdoctoral training fellowships are designed to provide partial support for a postdoctoral research associate, typically for 1 to 3 years.

Early career awards given to postdoctoral trainees who have made significant contributions to the research, training, or teacher development.

A PhD, M.D., or M.D./Ph.D. degree is required. New Ph.D. recipients are encouraged to apply no later than 12 months after graduation.

The fellowship is intended to support the health and wellbeing of young researchers throughout their postdoctoral training. Recipients must hold recent (or are expecting) Ph.D., M.D. or M.D./Ph.D. degrees.

Scholarships for the following disciplines:

- Life and Earth Sciences
- Social Sciences
- Humanities

Scholarships for early career scientists whose achievements and potential identify them as rising stars in their field.

Numerous funding opportunities available, for different stages and at different locations (national and abroad). Check website for more information.

Fellowships may be awarded to U.S. citizens planning to work in laboratories either in the U.S., Canada, or abroad and are funded by the participating organizations.

Applicants must identify an individual who will serve as his or her mentor and supervisor of the research. Fellowship recipients must begin work at the research institution abroad. In addition to the fellowship, applicants can request a grant for a research period upon return to the U.S.

Fellows must be licensed to practice medicine in the U.S. and must hold a doctorate at a medical faculty in Sweden, study at a faculty of medicine and any other organization if the employer agree otherwise. You do not have to be employed at the time you submit your application.

Research awards are given to help early- and mid-career scientists that need time away from their institutions for further research and training. Applicants must hold a Ph.D. or their clinical training within the past five years.

The Society supports full-time, pre-tenure faculty members in academic positions. Will not fund clinical research or support other types of applied cancer research.

Applicants are required to hold the Ph.D. degree or equivalent. The fellowship is available to U.S. citizens, permanent residents, non-citizens with a border commuter permit, married to a Swiss national or co-habiting with a Swiss national, or a Swede with a valid work permit.

The postdoctoral fellowship is designed to accommodate postdoctoral scientists who have completed their most recent Ph.D. degree no more than three years prior to the date of submission of the Concept Paper. This is a two-year fellowship with a maximum of one extension year. Fellows are expected to produce significant results that advance knowledge in their disciplines.

The fellow shall perform meaningful and independent research relevant to MS research. The fellow must commit to completing the research training in 2 years, assuming satisfactory progress toward research goals in year 1.

The fellow shall commit to completing the research training in 2 years, assuming satisfactory progress toward research goals in year 1.

The fellow shall commit to completing the research training in 2 years, assuming satisfactory progress toward research goals in year 1.
