

To share a document, click the arrow next to the “share my screen” button, then click “share document”

- Find the document you want in “uploaded files” or “share history” and click on the document.
- If you don’t see your document, click “browse my computer” and find it that way.
- It is recommended that you save all your documents that are on a flash drive or hard drive to your computer, in case the flash drive stops working (which can lose all your data)
