

# Math 2173 Spring 2021 Recitation Handout 6

Group Member 1: \_\_\_\_\_

Group Member 2: \_\_\_\_\_

Group Member 3: \_\_\_\_\_

Group Member 4: \_\_\_\_\_

Group Member 5: \_\_\_\_\_

Group Member 6: \_\_\_\_\_

Below is a checklist of instructions to follow when completing this assignment. Failure to follow these directions will result in penalty on your final score and/or in some problems not being graded. If multiple directions are not followed, then it is also possible that the assignment will not be accepted for any credit at all. Please contact your TA or make a post on the discussion boards for this course if you have any questions about this assignment or these directions.

Sohail Farhangi: farhangi.3@osu.edu, Pan Yan: yan.669@osu.edu, Yilong Zhang: zhang.6100@osu.edu

Checklist of Instructions	
	Please clearly write the names of all group members working on this assignment in the spaces allotted above.
	This assignment must be completed by a group of 3, 4, 5, or 6 members.
	This assignment is to be uploaded to gradescope as a pdf file no later than 11:59 PM EST on Sunday, February 28.
	The assignment will be uploaded by 1 group member, and that group member will be responsible for manually entering the names of all other collaborators into gradescope.
	This assignment must be completed using this template. You may either print this template to write on it and then scan it (pages ordered correctly) into a pdf file, or you may write directly on the template using programs such as notability.
	If you need more space than what is given to solve a given problem, then you will find blank pages provided at the end of this template. At the end of each problem section of this assignment you will find a space in which to indicate on what page your work is continued in case you used additional pages to complete your solution. You must provide the page number on which your work is continued in the allotted space, or write 'N/A' in case you did not use any additional pages.
	On the additional pages, you will also find space in which to indicate which problem the page is being used for, and if the page is used then that space must also be filled.
	To complete this handout, you may use your textbook, class notes, discussions with your TA and group members, and any resources that are available on Carmen. You should not receive any help from the MSLC or people outside of your group when solving these problems. You may discuss these problems on the Carmen discussion boards, but you should not provide your entire solution when answering a such question, you should only give a hint or a helpful idea.

**Modified Problem 14.4.3 (10 points):** Write an iterated integral for  $\iiint_D f(x, y, z) dV$ , where  $D$  is a sphere of radius 9 centered at  $(0, 0, 1)$ . Use the order  $dV = dzdydx$ .

*Hint: Start by finding the equation of the the surface of the sphere of radius 9 centered at  $(0, 0, 1)$ .*

---

**Problem 14.4.4 (10 points):** Sketch by hand or graph with a computer program the region of integration for the integral

$$(1) \quad \int_0^1 \int_0^{\sqrt{1-z^2}} \int_0^{\sqrt{1-y^2-z^2}} f(x, y, z) dx dy dz.$$

*Note: You may also describe the region of integration in writing instead. If you choose to do this, please write complete sentences and provide a thorough description.*

---

**Problem 14.4.31 (10 points):** Evaluate

$$(2) \quad \int_1^{\ln(8)} \int_1^{\sqrt{z}} \int_{\ln(y)}^{\ln(2y)} e^{x+y^2-z} dx dy dz.$$

---

**Ungraded Optional Problem 14.4.24 (10 points):** Find the volume of the solid  $S$  in the first octant that is bounded by the cone  $z = 1 - \sqrt{x^2 + y^2}$  and the plane  $x + y + z = 1$ .

**Ungraded Optional Problem 14.4.46 (10 points):** Evaluate

$$(3) \quad \int_1^4 \int_z^{4z} \int_0^{\pi^2} \frac{\sin(\sqrt{yz})}{x^{\frac{3}{2}}} dy dx dz.$$

*Hint: Try a different order of integration.*
