HOW DO STUDENTS VIEW TURNITIN RESULTS FOR AN ASSIGNMENT SUBMISSIONS?

Turnitin provides an originality report and similarity index letting the instructor know how much of your assignment is original.

Depending on the Turnitin settings, after you have submitted your assignment, you may be able to view Turnitin results immediately, after your instructor has graded the assignment, or after the due date.

Your instructor also has the option to restrict the originality report from being shown in your assignment. If the originality report does not appear in the assignment submission details, your instructor has restricted this feature.

Open Assignments

Click the name of the assignment.
View Submission Details

When the submission has generated an originality report, the Turnitin feedback icon indicates what percent of the assignment matches internet sources. To view the detailed originality report, click the feedback icon.

Note: The originality report for an initial assignment submission may take up to ten minutes to generate.
In the originality report, the sidebar shows any matching sources associated with the assignment text and where the match is located in the submission

Other Ways to see Turnitin Results

You may also see your Turnitin results and well as other comments and feedback from your instructor on the Assignment Submission Details screen.
