

Application Instructions for Bleach-Based Cleaners

Do not mix or use bleach solutions with other chemicals, especially ammonia-based solutions, as combinations can be hazardous to health.

Use a 0.1% bleach solution, which is effective as a cleaner but not considered hazardous to health.

- 1.** Completely wet the target surface.
- 2.** Keep the surface wet for at least 60 seconds.
- 3.** Wipe the cleaned surface with a dry cloth.

Do not spray near electronic devices.

Do not spray on metal surfaces unless instructed. Bleach corrodes some metals, including stainless steel.
