

## Doing Science Is Not Enough: The Importance of Communicating Your Science To Any Audience

### **Chris Gunter PhD**

Senior Advisor to the Director for Genomics Engagement  
Unit Head, Engagement Methods Unit  
Social and Behavioral Research Branch  
National Human Genome Research Institute,  
NIH

### **Discussion topics:**

- How the experiments that scientists do are now just the nucleus of an entire ecosystem that has developed around their research?
- Specifically consider four areas:
  - preprints/pre-publication peer review
  - traditional journals,
  - social media
  - post-publication peer review

**Friday, 19<sup>th</sup> Mar at 3 pm**
