POSTDOCTORAL POSITION available for research inflammatory bowel disease, intestinal inflammation, innate immunity, mucosal immunology.

Investigator: David Boone, Ph.D.
Inflammatory Bowel Disease
Indiana University School of Medicine – South Bend

Boone.lab@gmail.com

Our laboratory focuses on inflammatory bowel disease pathogenesis, microbial impacts on intestinal inflammation, innate immunity and mucosal immunology. The position will focus on innate immune mechanisms that contribute to IBD using mouse models of disease. The lab is located in South Bend Indiana at the Indiana University School of Medicine located on Notre Dame campus with access to core facilities at Notre Dame and the resources of the Indiana CTSI.

Education and experience: Candidates must have a PhD or equivalent degree with a record of publications and presentations related to immunology, mucosal immunity, host microbial interaction, and/or mouse models of inflammation. Experience in cellular and molecular immunology, sampling and examination of intestinal and other tissues using immunological and molecular biological approaches is desired.

Please send curriculum vitae including a brief (one page) summary of research background and interests to David Boone at boone.lab@gmail.com

Indiana University School of Medicine and Notre Dame are Affirmative Action/Equal Opportunity Employers. Benefits such as health insurance can be found at the IU HR website.
