HARRIS SCHOOL OF PUBLIC POLICY

ANNOUNCEMENTS AUTUMN 2021

More information regarding the University of Chicago Harris School of Public Policy or materials and application forms for admission to any of our degree programs can be found at harris.uchicago.edu (http://harris.uchicago.edu)

Or you may contact us at:

Office of Admission
Harris School of Public Policy
The University of Chicago
1307 East 60th Street
Chicago, Illinois 60637
Telephone: 773-702-8401

In keeping with its long-standing traditions and policies, the University of Chicago considers students, employees, applicants for admission or employment, and those seeking access to University programs on the basis of individual merit. The University does not discriminate on the basis of race, color, religion, sex, sexual orientation, gender identity, national or ethnic origin, age, status as an individual with a disability, protected veteran status, genetic information, or other protected classes under the law (including Title IX of the Education Amendments of 1972). For additional information regarding the University of Chicago’s Policy on Harassment, Discrimination, and Sexual Misconduct, please see: http://harassmentpolicy.uchicago.edu/page/policy (http://harassmentpolicy.uchicago.edu/page/policy/).

The content of these Announcements is accurate as of August 1, 2021. It is subject to change.
The University, the School, and the City

The University of Chicago

The University of Chicago is one of the world’s preeminent research universities. It is home to internationally renowned scholars, researchers, and intellectual pioneers. In the last century, the University produced more than 80 Nobel laureates (http://www.uchicago.edu/about/accolades/) in fields of study that include medicine, economics and physics—including eight current faculty members.

Founded in 1890 with a gift from John D. Rockefeller (http://www.uchicago.edu/about/history.shtml/), the University embodies the vision of its first president, William Rainey Harper (http://www.uchicago.edu/about/history.shtml/), a pioneer in education who believed in the strengths of an institution that blends an American-style liberal arts college and a German-style graduate research institute.

Harper articulated his hope and vision for the University at the very first faculty meeting in 1892, saying: “The question before us is how to become one in spirit, not necessarily in opinion.” UChicago fulfilled Harper’s dream, quickly becoming a national leader in higher education and research: an institution of scholars unafraid to cross boundaries, share ideas, and ask difficult questions.

Read More UChicago history HERE >> (http://www.uchicago.edu/about/history/)

Harris Public Policy

Established in 1988, the University of Chicago Harris School of Public Policy emerged from an interdepartmental Committee on Public Policy Studies. Harris, one of six professional schools at the University of Chicago, is part of a world-class intellectual community that continues the University’s tradition of scholarship to address real-world problems.

As University of Chicago President Robert J. Zimmer has said, “The Harris School of Public Policy embodies many of the values that make the University of Chicago distinct. The school’s interdisciplinary and data-driven approach to policy analysis reflects the University’s culture of rigorous inquiry, and faculty and student engagement with the City of Chicago and other urban centers demonstrates the impact of research on societal challenges in education, crime, energy and other fields. These efforts draw scholars and practitioners to campus to exchange ideas and learn.”

Starting with just five PhD students and 36 Master’s students in 1988, the school has grown to have class sizes of over 400 Master’s students, in varying programs from the Master’s in Public Policy, to Computational Analysis and Public Policy, International Policy and Development, and more. (http://harris.uchicago.edu/degrees/)

From its inception, Harris has sought to enhance the University’s role in shaping and understanding public life by conducting policy-relevant research and preparing talented individuals to become leaders and agents of social change.

A Dynamic Setting

Located in Chicago’s Hyde Park (http://hydepark.uchicago.edu/) community, Harris and the University of Chicago are just seven miles from the heart of the city on Lake Michigan’s south shore. In addition to being the home of Barack Obama, the 44th President of the United States, Hyde Park is known for its excellent bookstores, its variety of restaurants and cultural events, and for its celebrated architectural landmarks, museums and parks. Downtown Chicago and other city neighborhoods are easily accessible from campus by car or by public transportation.

Chicago (http://www.cityofchicago.org/city/en.html) is an education in itself. It is the birthplace of community organizing. It is a center of international finance and trade. It is also home to numerous national and international foundations, policy research centers, government agencies, nonprofit organizations, and businesses.

In the Loop, the heart of downtown Chicago, key decisions are made affecting the welfare and economic health of people worldwide. One of the world’s great cities, with a world-renowned symphony and arts community, a spectacular waterfront, a rich architectural heritage, and an unparalleled selection of restaurants and vibrant neighborhood culture, Chicago is a dynamic training ground for public policy. It is a blend of big city and small town, tradition and innovation, history and progress. Chicago offers endless options for discovery.
Admission and Financial Aid

Application Requirements

The University of Chicago seeks candidates with the academic preparation, intellectual ability, experience, and motivation to undertake a rigorous program in public policy. While no specific experience is required, students with a strong liberal arts background and sound quantitative and analytical skills will be best prepared for the program. The Committee on Admission and Aid evaluates all official transcripts of academic work, personal essays, letters of recommendation, extracurricular activities and community service, performance on standardized tests, and special factors brought to its attention. The Committee considers each application based on all materials submitted and does not automatically eliminate applications based on grade point averages or test scores. The application requirements and admissions process is largely the same for each Masters program (MPP, MA, MSCAPP, MACRM).

- Online Graduate Application (Available in September)
- Resume
- Short Essays (Masters only)
- Motivation Statement (Masters only)
- Candidate Statement (PhD only)
- Research/Writing Sample (PhD only)
- Transcripts
- Three letters of recommendation (submitted online)
- GRE Scores (Optional for 2021-2022 academic year)
- TOEFL / IELTS Scores (international applicants only)
- A $100 nonrefundable application fee is required for Master’s degree applicants and a $200 nonrefundable application fee is required for PhD applicants

For the most current information, please visit our Admissions pages (http://harris.uchicago.edu/admissions-and-aid/).

Application Deadlines

Application deadlines are published on the Harris website at http://harris.uchicago.edu/admissions/requirements-and-deadlines (http://harris.uchicago.edu/admissions/requirements-and-deadlines/).

Financial Aid

Here at Harris, we recognize the significant investment you will be making in your degree; we are committed to helping you identify financial resources to assist with managing the cost. Financial aid is calculated based on a standardized cost of attendance: tuition, room and board, books, transportation, and personal/miscellaneous expenses for three academic quarters (nine months). Harris Admission notifies you of any merit scholarship award at the time of your admission. At that time, we also provide you with information on applying for loans and employment opportunities at the university.

Further Information

For more information on Harris scholarships, contact the Admissions Office at 773.702.8400 or harrisadmissions@uchicago.edu. For additional information on loans and work, contact the Office of Student Loan Administration (https://sla.uchicago.edu/) at 773.702.6061.

All dates are subject to change with no notice.

Up-to-date academic calendars can be found at uchicago.edu/academics/calendar (https://www.uchicago.edu/academics/calendar/).
PUBLIC POLICY STUDIES (PPHA) COURSES

PPHA 30105. Math Methods for Public Policy. 000 Units.
Math Methods for Public Policy covers the Algebra and Calculus topics foundational for success in intermediate microeconomics. This course focuses on improving students' understanding of mathematics used in Harris core courses and increasing the speed and accuracy with which students perform algebraic calculations. Calculus concepts including derivatives, implicit differentiation, limits, continuity of functions, concavity/convexity, and optimization. This is a non-credit course.
Terms Offered: Autumn
Note(s): This course is for Harris students only.

PPHA 30110. Coding Lab for Public Policy. 000 Units.
Coding Lab for Public Policy” covers coding topics foundational to statistical methods required for policy students. The course focuses on improving students' understanding of the statistical methods used in Harris core courses and increasing the speed and accuracy with which students perform data analyses using programming languages. This is a non-credit course.
Terms Offered: Autumn
Note(s): This course is for Harris students only.

PPHA 30111. Coding Lab for Public Policy: Level I. 000 Units.
Coding Lab for Public Policy: Level I covers coding topics initially covered in Harris Math Camp foundational to statistical methods required for policy students. The course focuses on improving students' understanding of the statistical methods used in Harris core courses and increasing the speed and accuracy with which students perform data analyses using programming languages. This is a non-credit course.
Terms Offered: Autumn
Note(s): Grading basis for this course is NON - Non Graded

PPHA 30112. Coding Lab for Public Policy: Level II. 000 Units.
Coding Lab for Public Policy: Level II covers coding topics covered in Harris Math Camp and Coding Lab for Public Policy: Level I in accelerated instruction. Coding Lab for Public Policy covers topics foundational to statistical methods required for policy students. The course focuses on improving students' understanding of the statistical methods used in Harris core courses and increasing the speed and accuracy with which students perform data analyses using programming languages. This is a non-credit course.
Terms Offered: Autumn
Note(s): Grading basis for this course is NON - Non Graded

PPHA 30300. Philosophical Foundations of Public Policy. 100 Units.
Evidence-based policy making” sounds like a slogan everyone can get behind. But its central components, cost-benefit analysis and program evaluation, have each been subject to severe philosophical questioning. Does cost-benefit analysis ignore important ethical concerns? Does program evaluation ignore valuable kinds of knowledge? We will introduce each of these debates, and then take up the question of how evidence-based policy might be reconciled with democratic theory. Class discussion and assignments will consider these topics in the context of specific policy areas, including climate change, discrimination, and education.
Instructor(s): Ashworth, S Terms Offered: Spring

PPHA 30521. Sociology of urban planning: cities, territories, environments. 100 Units.
This course provides a high-intensity introduction to the sociology of urban planning practice under modern capitalism. Building upon urban sociology, planning theory and history as well as urban social science and environmental studies, we explore the emergence, development and continual transformation of urban planning in relation to changing configurations of capitalist urbanization, modern state power, sociopolitical insurgency and environmental crisis. Following an initial exploration of divergent conceptualizations of “planning” and “urbanization,” we investigate the changing sites and targets of planning; struggles regarding the instruments, goals and constituencies of planning; the contradictory connections between planning and diverse configurations of power in modern society (including class, race, gender and sexuality); and the possibility that new forms of planning might help produce more socially just and environmentally sane forms of urbanization in the future.
Instructor(s): N. Brenner Terms Offered: Winter
Equivalent Course(s): PLSC 30521, GEOG 20521, ENST 20521, SOCI 20521, CHST 20521, SOCI 30521, PLAC 20521, KNOW 30521, PBPL 20521, ARCH 20521

PPHA 30535. Data and Programming for Public Policy I. 100 Units.
This course is the first of a three-quarter data science sequence at Harris. This sequence is designed to train you to work in the rapidly-expanding field of data analytics in the public sector after graduation. Although the course is designed for students pursuing the Master of Public Policy degree, other Harris graduate programs, and undergraduates are welcome to enroll as well.
Instructor(s): Levy, J, Sobrino, F Terms Offered: Spring
PPHA 30536. Data and Programming for Public Policy II. 100 Units.
This course is the second of a three-quarter data science sequence at Harris. This sequence is designed to train you to work in the rapidly-expanding field of data analytics in the public sector after graduation. Although the course is designed for students pursuing the Master of Public Policy degree, other Harris graduate programs, and undergraduates are welcome to enroll as well.
Instructor(s): Levy, J Terms Offered: Autumn Winter
Prerequisite(s): PPHA 30535

PPHA 30545. Machine Learning. 100 Units.
The objective of the Data Science sequence is to train students to be successful and autonomous applied economists and data scientists in government and industry. In the first two courses of the sequence, students learned programming, as well as how to handle, summarize, and visualize modern datasets. The objective of this course is to train students to be insightful users of modern machine learning methods. The class covers regularization methods for regression and classification, as well as large-scale approaches to inference and testing. In order to have greater flexibility when analyzing datasets, both frequentist and Bayesian methods are investigated.
Instructor(s): Pouliot, G; Clapp, C Terms Offered: Winter
Prerequisite(s): PPHA 30535

PPHA 30560. Data Visualization. 100 Units.
Sometimes you just need a graph. Charts help policymakers explore data, clarify thinking and quickly explain complex ideas. This course will provide an overview of the latest tools used by people who do it for a living. This hand-on course will introduce theory, web programming and statistical programming to help students build a toolkit in data visualization for their careers in policy. Students will be introduced to basic cartography and interactive mapmaking, interactive graphics and static graphics Technologies used in this class will include Javascript, HTML, CSS and the R Tidyverse stack. All of the tools are open sourced and will not require the purchase of any specialized software. This class will require significant front-end programming which will likely be technically easy for students with a background in computer science but relatively challenging for students with a background only in statistical programming. The technical curriculum is designed for users of macOS, users of other operating systems may encounter additional hurdles.
Instructor(s): Bui, Q Terms Offered: Spring
Prerequisite(s): CAPP 30122 OR PPHA 30531
Equivalent Course(s): CAPP 30310

PPHA 30580. Civic Technology. 100 Units.
When you build civic technology, it has the opportunity to touch millions of lives. But it is hard to do well. Getting access to the right data, understanding the existing infrastructure, and knowing what to build are nontrivial questions. In this class, we will go through the process of building good civic technology, and you’ll learn how to build technology that makes a difference in people’s lives. This course will provide a roadmap for making an idea for civic technology into a reality. This will involve learning how governments operate, how to access and connect to government databases (using Python), how to clean up and manage that data (ETLs), how to build web applications to address civic issues (using Javascript, Ruby, or Python), and how to deploy applications to users who need them. The goals of the course are as follows: to understand and identify opportunities for civic application development; to be able to connect to governmental data systems; to be able to manipulate data from governmental systems into actionable datastores; to build an application that uses civic/governmental data that addresses a real need; and to articulate the value proposition of your application to stakeholders.
Terms Offered: Spring
Prerequisite(s): CAPP 30122 OR PPHA 30531
Equivalent Course(s): CAPP 30310

PPHA 30581. Civic Data & Technology Clinic. 100 Units.
The Civic Data and Technology Clinic at the University of Chicago partners with public interest organizations to leverage data science research and technology to address pressing social and environmental challenges. The Clinic also provides students with exposure to real-world projects and problems that transcend the conventional classroom experience including: (1) working with imperfect datasets, applying models and algorithms to real-world data, and navigating security and privacy issues, (2) communicating results to a diverse set of stakeholders (e.g., industry, public interest, government agencies), and translating information into actionable insights, policy briefs and software prototypes. The Clinic is an experiential project-based course where students work in teams as data scientists with real-world clients under the supervision of instructors. Students will be tasked with producing key deliverables, such as data analysis, open source software, as well as final client presentations, and reports. Find details about the current Clinic projects and course here: https://uchicago.box.com/s/v1r4a5f9g0mgv9bteoxgy1a5x4ncg0 Students must apply to participate in this class, and applications are being accepted on a rolling basis through the start of spring quarter. Apply here: https://forms.gle/KNR9ZymynrJDg7D7
Instructor(s): STAFF Terms Offered: Autumn
Prerequisite(s): Instructor Consent Required to Enroll For the current list of potential projects see here, https://capp.uchicago.edu/sites/capp/files/uploads/Civic Data and Technology Clinic Overview.pdf
Equivalent Course(s): MACS 30300, CAPP 30300
PPHA 30590. Big Data and Public Policy. 100 Units.
This course examines the conceptual underpinnings of data science and social science approaches to policy analysis. We discuss epistemologies of quantification, data production and the phenomenon of “datafication,” predictive versus causal analytic paradigms, algorithmic fairness, and issues of data ethics, regulation, and governance. The course is open to graduate and advanced undergraduate students who have taken at least one course in quantitative methods.
Instructor(s): Berry, C; Marwell, N Terms Offered: Winter
Equivalent Course(s): SSAD 40590

PPHA 30800. Analytical Politics I: Strategic Foundation. 100 Units.
This course is designed to serve three interrelated goals. It is an introduction to core concepts in the study of political economy. These concepts include collective action, coordination, and commitment problems; externalities and other forms of market failure; principal-agent relationships; problems of preference aggregation; and agenda setting and voting. The course also introduces basic concepts in game theory, including Nash equilibrium, subgame perfection, and repeated games. It is not, however, a suitable substitute for a game theory course for doctoral students in the social sciences. Finally, the course provides an overview of some of the key insights from the field of political economy on how institutions shape and constrain the making of public policy, with special attention to various ways in which governments can and cannot be held accountable to their citizens.
Terms Offered: Autumn

PPHA 30801. Discussion: Analytical Politics I. 000 Units.
This is a non-credit discussion for Analytical Politics I. Students must register a lecture and discussion for the course.
Terms Offered: Autumn
Note(s): Grading basis for this course is NON - Non Graded

PPHA 30802. TA Session: Analytical Politics I. 000 Units.
This is a non-credit discussion for Analytical Politics I. Students must register a lecture and discussion for the course.
Terms Offered: Autumn
Note(s): Grading basis for this course is NON - Non Graded

PPHA 31002. Statistics for Data Analysis I. 100 Units.
This course aims to provide a basic understanding of statistical analysis in policy research. Fundamental to understanding and using statistical analysis is the realization that data does not emerge perfect and fully formed from a vacuum. An appreciation of the provenance of the data, the way it was collected, why it was collected, is necessary for effective analysis. Equally important is an understanding of the nature of the statistical inference being attempted the course will distinguish between model-based and design-based inference. There will be some emphasis placed on sampling from finite populations and on data from survey research. The emphasis of the course is on the use of statistical methods rather than on the mathematical foundations of statistics. Because of the wide variety of backgrounds of participating students, the course will make no assumptions about prior knowledge, apart from arithmetic. For students with a strong technical background, the aim of the course is to increase their understanding of the reasoning underlying the methods, and to deepen their appreciation of the kinds of substantive problems that can be addressed by the statistical methods described. PPHA 31002 or PPHA 31201 required of all first-year students.
Terms Offered: Autumn

PPHA 31003. Discussion: Statistics for Data Analysis I. 000 Units.
This is a non-credit discussion for Statistics for Data Analysis I. Students must register a lecture and discussion for the course.
Terms Offered: Autumn
Note(s): Grading basis for this course is NON - Non Graded.

PPHA 31004. TA Session: Statistics for Data Analysis I. 000 Units.
This is a non-credit discussion for Statistics for Data Analysis I. Students must register a lecture and discussion for the course.
Terms Offered: TBD
Note(s): Grading basis for this course is NON - Non Graded.

PPHA 31102. Statistics for Data Analysis II: Regressions. 100 Units.
A continuation of PPHA 31002, this course focuses on the statistical concepts and tools used to study the association between variables. This course will introduce students to regression analysis and explore its uses in policy analysis. PPHA 31102 or PPHA 31301 required of all first-year students.
Terms Offered: Winter

PPHA 31103. Discussion: Statistics for Data Analysis II: Regressions. 000 Units.
This is a non-credit discussion for Statistics for Data Analysis II: Regressions. Students must register a lecture and discussion for the course.
Terms Offered: Winter
PPHA 31104. TA Session: Statistics for Data Analysis II: Regressions. 000 Units.
This is a non-credit discussion for Statistics for Data Analysis II: Regressions. Students must register a lecture and discussion for the course.
Terms Offered: Winter
Note(s): Grading basis for this course is NON - Non Graded.

PPHA 31202. Advanced Statistics for Data Analysis I. 100 Units.
This course focuses on the statistical concepts and tools used to study the association between variables and causal inference. This course will introduce students to regression analysis and explore its uses in policy analyses. This course will assume a greater statistical sophistication on the part of students than is assumed in PPHA 31002.
Terms Offered: Autumn

PPHA 31203. Discussion: Advanced Statistics for Data Analysis I. 000 Units.
This is a non-credit discussion for Advanced Statistics for Data Analysis I. Students must register a lecture and discussion for the course.
Terms Offered: Autumn
Note(s): Grading basis for this course is NON - Non Graded.

PPHA 31204. TA Session: Advanced Statistics for Data Analysis I. 000 Units.
This is a non-credit discussion for Advanced Statistics for Data Analysis I. Students must register a lecture and discussion for the course.
Terms Offered: TBD
Note(s): Grading basis for this course is NON - Non Graded.

PPHA 31250. Genetics for Social Science. 100 Units.
This course is a master level introduction to a growing field in the intersection between genetics and social science. To provide a background we will review traditional methods in behavioral genetics - such as measuring heritability of a trait through twin studies. Modern techniques will also be covered - such as genome wide association studies. Special attention will be dedicated to the way relatively recent developments in genetics can shed light on policy and social science questions - for example through using polygenic scores (an increasingly available variable in standard data sets). Ethical aspects of this historically charged topic will be discussed, including the distinction between race and genetics. No previous background in genetics is required.
Instructor(s): Roginsky, A Terms Offered: Spring

PPHA 31302. Advanced Statistics for Data Analysis II. 100 Units.
A continuation of PPHA 31202, this course focuses on the statistical concepts and tools used to study the association between variables and causal inference. This course will introduce students to regression analysis and explore its uses in policy analyses. This course will assume a greater statistical sophistication on the part of students than is assumed in PPHA 31102.
Terms Offered: Winter

PPHA 31303. Discussion: Advanced Statistics for Data Analysis II. 000 Units.
This is a non-credit discussion for Advanced Statistics for Data Analysis II. Students must register a lecture and discussion for the course.
Terms Offered: Winter
Note(s): Grading basis for this course is NON - Non Graded.

PPHA 31304. TA Session: Advanced Statistics for Data Analysis II. 000 Units.
This is a non-credit discussion for Advanced Statistics for Data Analysis II. Students must register a lecture and discussion for the course.
Terms Offered: Winter
Note(s): Grading basis for this course is NON - Non Graded.

PPHA 31511. Education and International Development. 100 Units.
This course covers policy issues related to primary and secondary education in developed, middle-development and developing countries. It provides an overview of global and regional trends in schooling and a research-based critical assessment of major education policies and reforms as they are implemented world-wide. The course tries to answer the question, Why do schooling outcomes differ so much across countries? It addresses the extent to which the level of development, in countries, differences in culture and family background and differences in school policy and organization can account for the differences in educational outcomes. This is a seminar course and students are expected to be actively engaged in presenting and discussing course materials.
Instructor(s): Lahmann, H Terms Offered: Winter

PPHA 31520. Child Development and Public Policy. 100 Units.
The goal of this course is to introduce students to the literature on early child development and explore how an understanding of core developmental concepts can inform social policies. This goal will be addressed through an integrated, multidisciplinary approach. The course will emphasize research on the science of early child development from the prenatal period through school entry. The central debate about the role of early experience in development will provide a unifying strand for the course. Students will be introduced to research in neuroscience, psychology, economics, sociology, and public policy as it bears on questions about "what
develops?”, critical periods in development, the nature vs. nurture debate, and the ways in which environmental contexts (e.g., parents, families, peers, schools, institutions, communities) affect early development and developmental trajectories. The first part of the course will introduce students to the major disciplinary streams in the developmental sciences and the enduring and new debates and perspectives within the field. The second part will examine the multiple contexts of early development to understand which aspects of young children's environments affect their development and how those impacts arise. Throughout the course, we will explore how the principles of early childhood development can guide the design of policies and practices that enhance the healthy development of young children, particularly for those living in adverse circumstances, and thereby build a strong foundation for promoting equality of opportunity, reducing social class disparities in life outcomes, building human capital, fostering economic prosperity, and generating positive social change. In doing so, we will critically examine the evidence on whether the contexts of children's development are amenable to public policy intervention and the costs and benefits of different policy approaches.

Instructor(s): McGrath, J
Terms Offered: Spring
Prerequisite(s): Attendance on the first day of class is required or registration will be dropped.
Equivalent Course(s): EDSO 35120, EDSO 25120, CHDV 25120, PBPL 25120, PSYC 25120

PPHA 31610. Analytical Politics II: Political Institutions. 100 Units.
This course is intended to introduce students to a set of analytical tools and concepts for understanding how political institutions and political agents generate public policy, and to apply these tools to examine the major institutions of democracy and non-democracy throughout the world. Lessons about political institutions and the policy making process will be understood from the perspective of a policy entrepreneur.
Instructor(s): Martinez, L; Buisseret, P; Zelizer, A
Terms Offered: Winter
Prerequisite(s): PPHA 30800

PPHA 31611. Discussion: Analytical Politics: Political Institutions. 000 Units.
This is a non-credit discussion for Analytical Politics II: Political Institutions. Students must register a lecture and discussion for the course.
Terms Offered: Winter
Note(s): Grading basis for this course is NON - Non Graded.

PPHA 31612. TA Session: Analytical Politics II: Political Institutions. 000 Units.
This is a non-credit discussion for Analytical Politics II: Political Institutions. Students must register a lecture and discussion for the course.
Terms Offered: Winter
Note(s): Grading basis for this course is NON - Non Graded.

PPHA 31720. The Science of Elections and Campaigns. 100 Units.
This course will provide students with an introduction to the science of political campaigns. What works, what doesn’t, and how can we develop and evaluate better techniques in the future. The course will discuss traditional campaigning techniques along with new techniques that rely on big data, social networking, new technologies, etc., and we will attempt to evaluate the effectiveness of these different approaches. The course will be targeted at students who may be interested in conducting or working on political campaigns as a practitioner. However, the course should also be of interest to students who simply want to learn more about campaigns, elections, or how to apply scientific thinking to politically-important or policy-relevant questions. The course will focus primarily on electoral campaigns, although many of the lessons will be applicable to other kinds of political campaigns (e.g., lobbying, issue advocacy). This course is open to second-year MPP students and required for those who plan to earn a Certificate in Political Campaigns. All non-MPP students should seek permission from the instructor before enrolling.
Instructor(s): Fourniau, A
Terms Offered: Autumn

PPHA 31730. The Strategic Uses of Survey Research in Political Campaigns. 100 Units.
This course will provide the student with an introduction to the basic facets of survey research, from sampling (WHO gets interviewed), survey design (WHAT gets asked), data analysis techniques, and interpretation of results (WHAT does it mean). But the lion’s share of the course will focus on addressing the question; HOW does the data get used? We will reference actual case studies involving public opinion in political campaigns, with heavy emphasis on the current issues of the day and the use of public opinion research as the nation gears up for the next big election. We’ll also hear from campaign professionals and candidates, offering real-world examples of how opinion research made a difference in big campaigns. The course leader is an active polling consultant to dozens of campaigns (federal, state, and local) each cycle, helping guide strategy on winning campaigns across the country.
Instructor(s): McGrath, J
Terms Offered: Summer

PPHA 31810. Lessons from Policies that Went Wrong. 100 Units.
Effective policies require a good understanding of the setting they aim to regulate. Knowing what are some of the possible unintended consequences can help to plan for them in the policy design stage. Behavioral responses of those that are affected by the policy can reduce its effectiveness, and even result in outcomes that are the opposite of the original goal. In this course, we will review different policies that did not succeed in achieving their intended targets because they did not fully consider what will happen in their aftermath. We will cover policies across a wide range of outcomes: health, energy and environment, development and aid, education, violence reduction, and labor markets. The goal is to understand what went wrong in each case, and to generalize lessons.
for future policy making. For each policy, we will start with the original problem it was trying to solve, cover some general theory and intuition around its proposed approach, and study a paper that empirically evaluated its impact. No textbook is required for this course. Grading is based on short weekly assignments, a 2-pages midterm paper analyzing a currently discussed policy, and a final exam.

Instructor(s): Frank, E Terms Offered: Autumn

PPHA 31941. Behavioral Science and Public Policy. 100 Units.
Many policies are aimed at influencing people’s behavior. The most well-intentioned policies can fail, however, if they are not designed to be compatible with the way people actually think and make decisions. This course will draw from the fields of cognitive, social, and environmental psychology to (1) examine the ways in which human behavior deviates from the standard rational actor model typically assumed by economics, and (2) provide strategies for improving the design, implementation, and evaluation of public-facing policies. The basic premise of this course is that a foundational understanding of human behavior can lead not only to more effective policies, but enhanced decision-making and well-being.

Instructor(s): Wolske, K Terms Offered: Spring

PPHA 32100. State and Local Public Finance. 100 Units.
This course uses basic microeconomic theory to analyze the taxing, spending, and programmatic choices of state and local governments in the United States, relying on the median voter and Tiebout models. On the revenue side, the course treats property, sales, and income taxation, as well as nontax revenue sources such as lotteries and user fees. On the spending side, the course covers several topics, including privatization, Medicaid, education finance, capital projects and debt finance, and, time permitting, local economic development tools used by state and local governments.

Instructor(s): Worthington, P; Hazinski, T Terms Offered: Autumn Spring

PPHA 32300. Principles of Microeconomics and Public Policy I. 100 Units.
PPHA 32300 (Principles of Microeconomics and Public Policy I) a serves as the first course in a two-quarter sequence in microeconomic theory. PPHA 32300 (Principles of Microeconomics and Public Policy I) does not require prior training in economics, although prior courses will be helpful. PPHA 32300 provides a careful and rigorous presentation of the foundations of microeconomics. Applications will be discussed in tandem with the course material (examples might be discussion of minimum wages, labor supply and taxes, fixed costs and licensing restrictions with taxis and Uber) but the primary focus is on the tools and techniques of microeconomics and price theory. This course covers the theory of consumer choice and the theory of the firm. Moderately fast-paced, the course is designed for students lacking a background in economics. Students will have an opportunity to apply economics to policy issues such as food stamps, income taxation, housing subsidies, and labor markets. Extensive problem sets provide an opportunity for practical application and a deeper understanding of the material. Calculus is not required, but a good grasp of algebra is necessary.

Terms Offered: Autumn Spring

PPHA 32301. Discussion: Principles of Microeconomics and Public Policy I. 000 Units.
This is a non-credit discussion for Principles of Microeconomics and Public Policy I. Students must register a lecture and discussion for the course.

Terms Offered: Autumn

Note(s): Grading basis for this course is NON - Non Graded.

PPHA 32302. TA Session: Principles of Microeconomics and Public Policy I. 000 Units.
This is a non-credit discussion for Principles of Microeconomics and Public Policy I. Students must register a lecture and discussion for the course.

Terms Offered: TBD

Note(s): Grading basis for this course is NON - Non Graded.

PPHA 32310. Advanced Microeconomics for Public Policy I. 100 Units.
Advanced core course in microeconomics. Provides students with advanced work in preference theory, welfare inference, intertemporal choice, human capital, and theories of unemployment.

Instructor(s): D. Black Terms Offered: Autumn

PPHA 32311. Discussion: Advanced Microeconomics for Public Policy I. 000 Units.
This is a non-credit discussion for Advanced Microeconomics for Public Policy I. Students must register a lecture and discussion for the course.

Terms Offered: Autumn

Note(s): Grading basis for this course is NON - Non Graded.

PPHA 32312. TA Session: Advanced Microeconomics for Public Policy I. 000 Units.
This is a non-credit discussion for Advanced Microeconomics for Public Policy I. Students must register a lecture and discussion for the course.

Terms Offered: TBD

Note(s): Grading basis for this course is NON - Non Graded.

PPHA 32400. Principles of Microeconomics and Public Policy II. 100 Units.
A continuation of Public Policy 32300, this course introduces the role of government in the economic system, explores market failures that undermine the useful characteristics of the competitive market, and considers the
role of government in these failures. Issues of equity and efficiency and the governments role in influencing the distribution of income are explored. Important economic concepts in policy analysis such as time discounting, opportunities costs, and decision-making under uncertainty are also featured. Differential calculus is used extensively throughout this course. Required of all first-year students.

Terms Offered: Winter

PPHA 32401. Discussion: Principles: Microeconomics/Public Policy II. 000 Units.
This is a non-credit discussion for Principles: Microeconomics / Public Policy II. Students must register a lecture and discussion for the course.
Terms Offered: Winter
Note(s): Grading basis for this course is NON - Non Graded.

PPHA 32402. TA Session: Principles: Microeconomics/Public Policy II. 000 Units.
This is a non-credit discussion for Principles: Microeconomics / Public Policy II. Students must register a lecture and discussion for the course.
Terms Offered: Winter
Note(s): Grading basis for this course is NON - Non Graded.

PPHA 32410. Advanced Microeconomics for Public Policy II. 100 Units.
This class builds on some of the concepts learned in Micro I to study at a deeper level a variety of topics relevant to students of public policy. The class will build foundations for understanding risk, uncertainty, and market failures in the provision of public goods, externalities, and due to information asymmetries. Throughout the course, examples of how policy makers grapple with the theoretical issues will be discussed.
Instructor(s): Gallen, Y Terms Offered: Winter

PPHA 32411. Discussion: Advanced Microeconomics for Public Policy II. 000 Units.
This is a non-credit discussion for Advanced Microeconomics for Public Policy II. Students must register a lecture and discussion for the course.
Terms Offered: Winter
Note(s): Grading basis for this course is NON - Non Graded.

PPHA 32412. TA Session: Advanced Microeconomics for Public Policy II. 000 Units.
This is a non-credit discussion for Advanced Microeconomics for Public Policy II. Students must register a lecture and discussion for the course.
Terms Offered: Winter
Note(s): Grading basis for this course is NON - Non Graded.

PPHA 32530. Fundamentals of Municipal Bonds. 100 Units.
This course will provide students with an overview of the municipal bond market and how it facilitates the development of infrastructure needed for economic development and the provision of public services. There are close to $2.6 trillion dollars in outstanding bonds in this market. Of 87,500 state and local governments in the U.S., 55,000 have bonds outstanding. Each year 10,000 new issues of municipal bonds come to market valued on average at $350 billion a year. All of this helps states, cities, counties, and not for profit organizations such as universities and hospitals fund capital assets including roads, bridges, water and sewer plants, airports, and school buildings. Students will come to understand: the continuum of a bond sale from government to end investor; who the key players are in the process; how credit ratings and credit analysis is performed; the public policy drivers of capital investment; the regulatory policy framework relating to the bond industry; and what sort of career opportunities are available for Public Policy Graduate Students. The course will have a text book supplemented by articles and industry reports. Attendance will be critical. The course will have a mid-term and final oriented toward providing a work product that would actually be utilized in the municipal bond industry. Guest speakers will also be utilized from time to time.
Instructor(s): Belsky, M

PPHA 32736. Economics, Politics and African Societies. 100 Units.
This course has two objectives. First, we will try to convince ourselves that the lenses through which economics and political science have tried to explain "African" "development" are charged with presuppositions that have limited our ability to grasp the logic of those societies. There is nothing specific to those disciplines in that regard, they are part of a given cultural and historical context. In doing that, this course is also about the rich diversity of the societies lumped in the term Africa. Second, we will try to undo the learnings weaved through that lens, but at the same time engage with a fertile ground for research, with a focus on generating new research ideas that carry less, we hope, the heavy veil of our assumptions. It is open to Masters students but it is primarily aimed at PhD students who want to know about Africa and can imagine themselves doing research there. We hope that it will help them identify new and interesting questions. The Masters students will be examined by an exam. The PhD students will have to write a short research proposal on some question on Africa and the last two lectures will be devoted to presentations. - This course is previously PPHA 37235 - African Development.
Instructor(s): Robinson, J; Sanchez de la Sierra, R Terms Offered: Spring
Equivalent Course(s): ECON 35585, PLSC 32736

PPHA 32740. Order and Violence. 100 Units.
Most countries in the world have been independent for about 50 years. Some are peaceful and have prospered, while some remain poor, war-torn, or both. What explains why some countries have succeeded while others
remain poor, violent, and unequal? Moreover, fifty years on, a lot of smart people are genuinely surprised that these countries’ leaders have not been able to make more progress in implementing good policies. If there are good examples to follow, why haven’t more countries followed these examples into peace and prosperity? Finally, we see poverty and violence despite 50 years of outside intervention. Shouldn’t foreign aid, democracy promotion, peacekeeping, and maybe even military intervention have promoted order and growth? If not why not, and what should we do about it as citizens? This class is going to try to demystify what’s going on. There are good explanations for violence and disorder. There are some good reasons leaders don’t make headway, bureaucrats seem slothful, and programs get perverted. The idea is to talk about the political, economic, and natural logics that lead to function and dysfunction.

Instructor(s): Blattman, C Terms Offered: Autumn

Equivalent Course(s): PLSC 32740

PPHA 32741. Why We Fight. 100 Units.

Instructor(s): Blattman, C Terms Offered: Autumn

PPHA 32750. Hydropolitics: Water Policy and Conflict. 100 Units.

Water resources are increasingly contested in nearly all parts of the world. Available freshwater supplies have declined nearly 40% since 1970, and the UN predicts that, by 2025, 1.8 billion people will not have sufficient water to meet all of their daily needs. Water conflict is essentially a political problem because it reflects normative disagreements about who has the authority to define its value and appropriate uses. This course examines conflict over water and policy efforts to deal with inter-sectoral competition, international allocation, and the diplomatic and economic consequences of water resource depletion. The course begins with a discussion of water’s status as an object of policy—as property, a commodity, entitlement, and natural good. It then turns to a series of policy challenges in context including agricultural water use, allocation treaties, development disputes, and preventing humanitarian crises. No knowledge of water policy is presumed, and students will leave the course with the issue background necessary to pursue more focused research projects in water policy topics.

Instructor(s): Tiboris, M Terms Offered: Autumn

PPHA 32760. Global Development and Social Welfare. 100 Units.

The persistence of disparities in social development across countries is one of the major problems societies struggle to understand and address. This course will critically examine the major theories of global development along with contemporary debates relating to international social welfare. Students will assess how political, economic, historical, and environmental factors influence different nations’ development trajectories, and compare how alternative models of service delivery and social intervention serve or fail to serve their intended populations. The geographic focus of the course will be Latin America and Africa, though case studies may also be drawn from other regions of the world. The course will be useful for both students who have had previous international experience as well as students who are interested in international social work and/or development practice. This course fulfills the Specialized Diversity Requirement. This course is one of Crown Family School’s global and international course offerings.

Equivalent Course(s): SSAD 62912

PPHA 32810. Winning Issue Campaigns. 100 Units.

Change does not roll in on the wheels of inevitability, but comes through continuous struggle.” These words of Dr. Martin Luther King, Jr. were never more true than in today’s gridlocked American political system. Smart public policy doesn’t pass and implement itself - it comes as a result of well planned, hard fought, strategic issue campaigns, many of which span years and even decades. This course will teach students the theory and practice of strategic issue campaigns, from setting campaign objectives and targeting decision makers to planning effective tactics, designing a message frame, and winning the support of those who can further the cause. This course counts toward the Political Campaigns Certificate.

Instructor(s): Batzel, M Terms Offered: Winter

PPHA 33230. Inequality: Theory, Methods and Evidence. 100 Units.

This course will explore the theory, methodology and evidence of economic inequality.

Instructor(s): James Heckman and Steve Durlauf Terms Offered: Spring

Equivalent Course(s): ECON 34930

PPHA 33240. Intergenerational Mobility: Theory, Methods and Evidence. 100 Units.

Economic inequality is increasingly a top concern among both policy-makers and the public over the past decade. This course will examine how intergenerational mobility, or the lack thereof, potentially contributes to these concerns. Students in this course will learn about fundamental theories of distributive justice, learn how to evaluate different measures of mobility and persistence, and discuss the latest theories and empirical evidence on intergenerational mobility.
Courses

Instructor(s): Lukina, A Terms Offered: Autumn Spring
Equivalent Course(s): PBPL 23240

PPHA 33420. Contemporary US Intelligence. 100 Units.
The course examines the U.S. Intelligence Community and its role in national security. It will analyze the intelligence cycle including planning and direction, collection, processing, analysis and dissemination. It will also focus on topics such as warning and surprise, denial and deception, covert action, oversight and the role of policy makers, civil liberties, ethics and accountability and intelligence reform. The course will also compare the organization and activities of foreign intelligence agencies with the U.S. model. Many of these topics will be analyzed in the context of current events including the congressional investigation into Russia’s interference with the 2016 presidential election. The course will also feature high ranking current and former intelligence officials as guest speakers.
Instructor(s): Quigley, M Terms Offered: Autumn

PPHA 33510. Nuclear Policy. 100 Units.
While issues arising from technologies that have both military and civilian applications are not new, the nearly incomprehensible destruction from exploding nuclear weapons focuses the mind as few other dual-use technologies can. This course will examine the development of national policies and the international regimes on the uses of nuclear energy. We will review military doctrine and the plans for nuclear war-fighting as well as the effects on societies of developing and using nuclear weapons. We will review the history of international proliferation of nuclear technology and fissile material and examine efforts to curtail the spread of weapons. In the second part of the course, we will focus on the development of civilian nuclear power and on current policy to prevent accidents and dispose of nuclear waste materials. Political leaders often face policy dilemmas because nuclear technology and materials offer great benefit, as well as presenting great danger. We will explore these dilemmas throughout the course.
Instructor(s): Benedict, K Terms Offered: Winter
Equivalent Course(s): PBPL 29070

PPHA 33611. Foundations of Social Entrepreneurship. 100 Units.
This course specifically focuses on social business models spanning non-profit organizations, non-government organizations, hybrid enterprises and socially responsible for-profit businesses. The course takes a global perspective, focusing on organizations and ventures in both the US and abroad. Through course readings, case studies, articles and guest presenters, students will be exposed to the various approaches to social entrepreneurship and the strengths and weaknesses of different models and strategies, and the leadership characteristics required to found, build and run a successful social enterprise.
Instructor(s): Gossin, W. Terms Offered: Winter
Equivalent Course(s): SSAD 43610

PPHA 33620. Leading with Innovation. 100 Units.
This course will train students in how to initiate strategic innovation within large organizations (especially nonprofits and government). It is intended for students who want to build a career in organizational strategy and innovation in any sector, but specifically within an existing organization (not as founder of a new one). This course will teach a skillset, mindset, and team-based model for evolving and deploying innovation approaches within social sector organizations. Having learned this approach, students will address challenges in Chicago in a fast-paced, rotating team structure. Demands for out of class work will be high. Throughout the course, students will engage in strategic conversations on themes surrounding innovation including: the inclusion of data and AI systems, public-private partnerships, technology modernizations, and disruptive service contexts (healthcare, education, security, etc). We’ll discuss how each of these conditions requires adapting the deployment of innovation practices and how to adapt strategies within such contexts.
Instructor(s): Gossin, W Terms Offered: Spring

PPHA 33740. Business and Society. 100 Units.
This course is designed to offer students an overview of the various roles businesses across the for profit, non-profit and governmental sectors play in improving the world. We will examine how companies are responding to social challenges using Corporate Social Responsibility (CSR) strategies and gain an understanding of the role government and philanthropist play in helping/hindering positive societal change. We will examine how to create organizational shared value through a Corporate Social Innovation (CSI) framework, explore specific examples of both successful and unsuccessful attempts to compete using a social purpose agenda and look at the role; the board of directors plays within an organization. Students also have a chance to hear first-hand from practitioners who are working at the forefront of business and societal change.
Instructor(s): Towns, W Terms Offered: Winter

PPHA 33820. Democracy Hacked: Cyber Threats to Modern Governments in the Digital Age. 100 Units.
This course is designed to offer students an overview of the current cybersecurity landscape and the corresponding human rights implications. Students will hear first-hand insider perspectives from public and private sector cyber professionals and international experts across the cybersecurity and human rights fields. Divided into 3 parts, students will gain insight on Cyber Security Technology, Protecting Citizens From Governments Online, and Combating Cyber Predators.
Instructor(s): Braun, J Terms Offered: Spring
PPHA 33830. Hacking for Defense. 100 Units.
The innovation toolkit (lean startup, human-centered design, prototyping) was developed to create new value under conditions of intense uncertainty. Typically, courses on innovation focus that effort on new venture creation, but our large institutions—both public and private—wield tremendous influence and power. We believe those organizations should be more responsive to changing conditions and that they deserve commitment from the best and brightest when it comes to the application of innovation. All institutions within the Department of Defense and Intelligence Communities (DoD/IC) are large, complex, and as impactful on society as any that one can identify. They face intense pressure to adapt their missions to changing constituencies, evolving geopolitical demands, technology revolutions, social norms, and complex regulations. This course aims to train students in how to apply the innovation toolkit to such organizations and their challenges.
Instructor(s): Gossin, W
Terms Offered: Autumn
Note(s): Crosslist of LAWS 53455
Equivalent Course(s): INRE 32002

PPHA 33840. Conflict in the Gray Zone: Hybrid, Asymmetric, and Full-Spectrum. 100 Units.
Conflict has been a constant companion in human experience from time immemorial. Some argue that conflict is inherent in the human condition, or in human nature. Yet today something is different; something has changed. Conflict seems more omnipresent, more intractable, and more dangerous. This class examines the various new domains of conflict and the way they affect global power dynamics, showing that while conflict is a permanent feature of human society, it has evolved to occupy new spaces using a new toolbox. Paraphrasing Clausewitz, the nature of conflict remains constant, yet its character is eternally changing. The prevailing conflict paradigm continues to emphasize the familiar military or kinetic domain often neglecting other segments of the conflict spectrum. The unprecedented acceleration of digital and other technologies threatens a future evolution of conflict likely to outpace state capacity to mitigate and manage conflict. Conflict today and in the indefinite future is likely to be asymmetric, hybrid, and full-spectrum. The course is divided into five segments; 1) Introduction and context of contemporary conflict; 2) Differing world views as they relate to conflict; 3) New conflict domains and media; 4) Implications for national and multi-lateral policy; and 5) Projecting future conflict domains.
Instructor(s): Miklaucic, M
Terms Offered: Autumn

PPHA 33910. Digital Media in Policy and Politics: Practices, Problems and Policy Issues. 100 Units.
This course will teach students a theoretical framework for understanding digital media and communications, examining historical and modern examples of powerful messaging across politics, government, and issue-based organizations.
Instructor(s): Temple, R
Terms Offered: Autumn

PPHA 34241. Household Finance: Theory and Applications. 100 Units.
This course will examine the choices households make about important financial decisions and how these individual choices can impact the aggregate economy. Each week, basic predictions from economic theory will be discussed and compared with empirical findings. Topics will include: asset market participation and household portfolio choice; human capital and student loans; housing and mortgages; retirement planning; credit card debt; payday loans; and the gig/sharing economy. Focus will also be placed on government policies affecting these topics, including so-called household financial engineering, the creation of Government Sponsored Enterprises (GSEs) like “Fannie” and “Freddie,” and regulatory agencies like the Consumer Financial Protection Bureau (CFPB). Students are expected to read assigned papers. Additional assignments include problem sets, an in-class presentation, and a replication and extension exercise of a published paper. These assignments will require students to work in R, Stata or other statistical package of the student’s choice.
Terms Offered: Spring
Note(s): Koustas, D

PPHA 34330. Attaining Equity in K-12: Theory and Practice. 100 Units.
The purpose of this course will be to investigate practices for creating equity for disadvantaged students. Despite nearly half a century of “school reform”, troubling gaps in educational attainment persist between white and Asian and underrepresented minority students. Similarly, one of the surest predictors of educational outcomes is family income. What solutions are proven to reverse these inequities? The course will begin by using national and state data to understand the scope of the achievement, or opportunity, gap. We will then consider a framework for understanding why many promising reforms fail to result in improvement. After developing this framework, we will look at evidence behind a number of popular approaches, including standards based accountability, racial integration, and charter schools. Finally, we will look at detailed data behind case studies in Chicago area school districts.
Instructor(s): Niksch, M
Terms Offered: Spring

PPHA 34410. Corporate Finance. 100 Units.
This course presents an introduction to the principles of corporate finance and its applications. These principles are critical to understanding the nature of how corporations and many government entities present their financial condition, finance themselves and manage their financial risks. The course will examine corporate structure, evaluation of new projects, financial planning and governance. There will be considerable attention to the analysis of financial statements and understanding free cash flow. The role of interest rates and the time value of money will be presented with many applications project evaluation and financing alternatives. The Modigliani
and Miller theorems will be presented with their application to common corporate finance problems. The role of equity, bonds and loans in the capital structure will then be discussed. Finally, the course will introduce the role of corporate governance regarding financial matters.

Instructor(s): Schabes, D Terms Offered: Spring

PPHA 34500. Macroeconomics for Public Policy. 100 Units.
This course examines the working of the aggregate economy. It aims to understand the key determinants of business cycle fluctuations and of long-run economic development. This includes coverage of the role of employment, productivity, trade and fiscal deficits, inflation, and interest rates. The emphasis of the course is on the impact of monetary and fiscal policies on the macro economy. Students will be able to analyze and discuss important current economic issues, such as government spending and tax reforms, Social Security reforms, the conduct of monetary policy, and the impact of changing economic conditions around the world.

Instructor(s): Sullivan, D Terms Offered: Winter

PPHA 34600. Program Evaluation. 100 Units.
This course introduces you to the tools used by social scientists and policymakers to evaluate the impact of government policies. The courses objective is to teach you how to use these tools well enough to feel comfortable evaluating the quality of program evaluations that you are likely to review during your careers. The course begins by examining the elements of a cost/benefit analysis. Some of the principles we discuss during this part of the course are identical to those used by managers in a private firm when they consider whether to invest in new plant or equipment, to train their workers, or to initiate new human resource practices. But it also is important to recognize the differences between cost-benefit analyses of social programs and of private sector investments. Here we examine how the concepts of consumer and producer surplus discussed in your economics courses guide us in formulating evaluation questions and choosing appropriate outcome measures. Most of the course examines the strategies for evaluating the impact that government policies have on alternative outcomes. The key question here is what would have been the outcome had individuals, neighborhoods, state, etc., not been exposed to the policy. The impact of the policy is the difference between the actual outcome and this counterfactual outcome. Much social science research demonstrates that obtaining credible estimates of these impacts can be difficult. During this part of the course, we discuss how to plausibly address some of the more common difficulties encountered by program evaluators.

Terms Offered: Autumn Spring
Prerequisite(s): PPHA 31000 or 31200 or 31202 or 42000 and PPHA 31100 or 31102 or 31300 or 31302 or 42100 or equivalent statistics coursework.

PPHA 34799. Race, Politics, and the Press in Chicago. 100 Units.
This course will examine the history of the African American press, especially The Chicago Defender, a newspaper which spanned the technological and political transformations of the 20th Century media. Founded as a weekly in 1905, The Defender became Black America's first national communications vehicle using newly available mass printing machines as well as page design techniques pioneered by Hearst and Pulitzer. The news pages exposed the horrors of Jim Crow, while editorials inspired millions to come to Northern cities in what became known as the Great Migration. The Defender and its cohort, including The Pittsburgh Courier, wielded substantial political clout, providing the swing votes that elected Harry S. Truman and John F. Kennedy to the Presidency. But as the century wore on, black newspapers had to compete for audience as well as staff against a multitude of print, broadcast and, ultimately, on-line options. Taught by the author of the award-winning non-fiction book about The Defender, himself a veteran of the newspaper, the course includes guest lectures, field trips, and references to the substantial scholarship of the history of the South Side. There are no prerequisites.

Instructor(s): Michaeli, E Terms Offered: Autumn

PPHA 35221. Family Law. 100 Units.

TBD
Equivalent Course(s): SSAD 69002, GNSE 45001

PPHA 35240. Education in Developing Contexts. 100 Units.
This course covers policy issues related to education in developing contexts. We will analyze education policies and reforms from an economic perspective, review relevant research on each topic, and examine implications of the findings to policy and practice. Topics include understanding factors that influence educational decisions, the conduct of political campaigns, the role of donor agencies, and the interaction between education and other public sector investments. Here we examine how the concepts of consumer and producer surplus discussed in your economics courses guide us in formulating evaluation questions and choosing appropriate outcome measures. Most of the course examines the strategies for evaluating the impact that government policies have on alternative outcomes. The key question here is what would have been the outcome had individuals, neighborhoods, state, etc., not been exposed to the policy. The impact of the policy is the difference between the actual outcome and this counterfactual outcome. Much social science research demonstrates that obtaining credible estimates of these impacts can be difficult. During this part of the course, we discuss how to plausibly address some of the more common difficulties encountered by program evaluators.

Instructor(s): Adukia, A Terms Offered: Winter

PPHA 35245. Violence in the Early Years. 100 Units.
This course will address issues related to children's exposure to violence. Classes will cover topics including, but not limited to, the history of violence against children (infanticide, etc), children's literature, parental violence towards children, school-related violence, practices such as female genital mutilation, and other policy-relevant issues related to violence in children's lives. We will analyze policies and reforms, review relevant research on each topic, and examine implications of the findings to policy and practice.

Instructor(s): Adukia, A Terms Offered: Winter
PPHA 35302. International Trade: Theory, Evidence, and Policy. 100 Units.
This course on international trade will be divided into two parts. In the first part, the course will cover theoretical and empirical research on international trade, thus providing the students with the analytical tools needed to address trade-policy problems and challenges. In the second part, the students will be faced with specific real-world trade-policy problems on which they will have to make policy analysis and prepare policy recommendations for policy-makers or a policy-oriented audience. The objective of the course is thus twofold. On one hand, the students will be equipped with the analytical frameworks necessary to think about trade policy problems and challenges. On the other hand, the course will prepare the students to formulate evidence-backed policy recommendations and present them in a persuasive way, thus developing professional skills needed in policy-making contexts. The list of topics covered by the course may include: gains from trade, winners and losers, trade and distribution, trade and growth, trade and the labor market, instruments of trade policy, political economy of trade policy, trade policy as industrial policy, the world trading system. Suggested prerequisites: an understanding of intermediate-level microeconomic theory.
Instructor(s): Espinosa, F Terms Offered: Spring

PPHA 35310. International Trade, Banking and Capital Markets. 100 Units.
Over the past 50 years, the markets for goods and services have become dramatically globalized. The internationalization of financial markets and the liberalization of trade have been critical to this growth. In contrast to a few decades ago, today’s companies manage global supply chains and investment capital moves quickly from market to market. International Trade, Banking and Capital Markets is an introduction to the drivers of and issues behind these changes. This course does not assume an extensive knowledge of economics. Topics covered begin with the gains from trade, the domestic instruments of trade policy such as tariffs and treaties, as well as international trade bodies including the World Trade Organization. The course will then move on to how trade is conducted between companies in different countries, covering topics such as foreign exchange, trade documentation and instruments used to guarantee payment. The course will then cover aspects of international banking, including the cross-border provision of corporate and investment banking, as well as investment management services. The growth of international banking out of trade finance and the international expansion of domestic businesses will be presented along with the issues these developments created.
Instructor(s): Shabes, D Terms Offered: Spring

PPHA 35311. International Trade Law. 100 Units.
This course focuses on the law governing international trade. It will specifically focus on the laws established by the World Trade Organization. This will include an in-depth analysis of the treaties, regulations, and case law that govern international trade. The course will both cover the basic principles governing trade law, as well as the trade laws governing intellectual property, environmental regulation, food safety, trade in services, and technical standards. The course will also examine the implication of the international trading regime for developing countries, and the political economy of trade negotiations. This class has a final take-home exam.
Terms Offered: Spring

PPHA 35501. Poverty and Economic Development. 100 Units.
This course will focus on developing countries. We will study causes of poverty and underdevelopment, poverty measurement issues, and policies to improve wellbeing. We will concentrate on topics such as nutrition and health, education, labor markets, intra-household allocation of resources, and policies to alleviate poverty. Empirical evidence from developing economies will be used extensively.
Instructor(s): Menendez, A Terms Offered: TBD

PPHA 35540. How to Change the World: Science of Policymaking in International Policy and Development. 100 Units.
So you want to make the world a better place, but how? So much policy fails. So many good intentions go awry. Why? What makes for good policy? What makes it bad? This is a class on the social science of policymaking—the lessons from economics, political science, sociology, and anthropology, plus the practical experiences of practitioners. We will focus on policy-making in a global context, especially international policy and development. While we will look at international organizations, the focus is on national and local development strategies and domestic policymakers and institutions. This is also a course about learning to read and write well. Readings each week will be heavy and difficult, but rewarding. There will be also weekly writing assignments that involve critical reviews of books, papers, and ideas. There are no requirements for the class. Any Master’s student or advanced undergraduate is welcome to join the class. A class on economic development is recommended.
Instructor(s): Blattman, C Terms Offered: Autumn

PPHA 35550. Economic Development and Policy. 100 Units.
The history, current pattern, and causes of the distribution of the wealth of nations remains one of the most fascinating and fundamental of all questions in economics and policy. This course will attempt to give an overview of economic growth and development, focusing on real-world data, by looking at the empirical and theoretical research that has been used to understand them and subsequently form the basis of development policies. The course is divided into three major sections: measuring and modeling growth and development, human capital, and markets. Throughout the quarter, we’ll explore sets of “development facts” - the way that the world currently appears to us as policy-makers - by looking at contemporary data. For each topic, we will discuss contemporary methodology and debates in development policy.
Instructor(s): Busara Center for Behavioral Economics
Terms Offered: Winter

PPHA 35556. Political Economics of Developing Countries. 100 Units.
What explains why some countries enjoy growing economies, more order, and greater freedom, while other countries remain poor, violent, or unfree. This course will examine why some countries have moved along a path of “political development” while others have not, analyzing subtopics such as leadership, foreign aid, democracy promotion, military intervention, etc. This course will use theory and history to understand the political, economic, and other social scientific logics that lead to function and dysfunction.
Instructor(s): Deniz, E Terms Offered: Winter

PPHA 35560. Translating Evidence for Policy and Program Design. 100 Units.
The demand for the use of evidence in international development programs and policy continues to grow. However, policy makers often have questions about how to interpret and use evidence generated. How generalizable are these results? How to interpret null results? Mixed outcomes? Short and long term effects? Are these results scalable? Additionally, what are the political barriers to using evidence? In this course, we will explore how to think about these issues and others in relation to designing policies and programs in the international development sphere. We will examine these questions through various development sectors: economic development, governance, food security, refugees, education and peacebuilding.
Instructor(s): Wolfe, R Terms Offered: Autumn

PPHA 35561. The Practicalities of Running Randomized Control Trials. 100 Units.
This course is designed for those who plan to run a randomized control trial. It provides practical advice about the trade-offs researchers face when selecting topics to study, the type of randomization technique to use, the content of a survey instruments, analytical techniques and much more. How do you choose the right minimum detectable effect size for estimating the sample size needed to run a high quality RCT? How do you quantify difficult to measure outcomes such as women’s empowerment or ensure people are providing truthful answers when you are asking questions on sensitive topics like sexual health? When should you tie your hands by pre-committing to your analysis plan in advance, and when is a pre-analysis plan not a good idea? This course will draw on lots of examples from RCTs around the world, most (though not all) from a development context. Alongside field tips, it will also cover the concepts and theory behind the tradeoffs researchers face running RCTs. The course is designed for PhD students but given its practical nature is open to and accessible to masters students who plan to work on RCTs.
Instructor(s): Glennenerster, R. Terms Offered: Autumn
Equivalent Course(s): ECMA 35550, ECON 35550

PPHA 35565. Infrastructure and Development. 100 Units.
This course will examine the role of infrastructure as a foreign policy tool, both historically as in the case of the Marshall Plan and contemporarily as in the case of the Belt and Road Initiative. This course will give particular attention to infrastructure development in Africa.
Instructor(s): Moore, G Terms Offered: Spring

PPHA 35570. Conflict and Humanitarian Intervention: Blurring Humanitarian, Development, and Security Policy. 100 Units.
Humanitarian principles were instituted to ensure aid was used for life saving purposes, and not to support governments or a country’s foreign policy goals. While there was always some blurring, the lines between humanitarian, development and security policy began to blur to a greater degree during the Balkan wars; after 9/11, the lines became ever more faint, creating significant debates about civilian-military relations. Post-Syria there are questions if there are even lines anymore. In this course, we will examine this evolution, where aid, both humanitarian and development, is used to a greater and greater degree in support of a country’s security policy. We will examine how this has changed the nature of these programs, how it effects the ability of governments and INGOs to operate in these environments, and the moral and ethical dilemmas that arise.
Instructor(s): Wolfe, R Terms Offered: Spring

PPHA 35575. Diversity and Inclusion in International Development Policy. 100 Units.
Evidence-based policy is only as good as the data that underpins the evidence. However, current approaches to data-gathering often contribute to systematic exclusion and perpetuate existing power relationships in international development. Exclusive data can render whole groups of people-for example, women or minorities-invisible for the policy process. This is particularly true for so-called ‘hard-to-reach’ populations who are supposed to benefit most from international development. Identifying how unrepresentative and flawed data leads to exclusive policies requires data literacy that foregrounds a justice-based approach in data collection and analysis. This course offers students theoretical and hands-on practical learning to understand what is required to make data inclusive, how to engage with those whose data is collected in ethical ways and through what mechanisms inclusive data can create policies that support diversity and inclusion. The course is taught as a lab in collaboration with researchers and data scientists from the Busara Center for Behavioral Economics in Kenya and India.
Instructor(s): Busara Center for Behavioral Economics Terms Offered: Winter
PPHA 35580. Doing Business in Africa. 100 Units.
This course will give an overview of key trends in the region (economic/political/demographic) to provide a frame as to how to think about Africa’s dynamic economic potential and diverse investment climates. It will include a focus on geopolitics, including how China’s involvement in Africa affects the landscape (including opportunities for American and other companies, etc.). There will be heavy emphasis on navigating political and policy risk (how to assess and mitigate the challenges related to governance, corruption, rule of law, etc. as they relate to doing business in emerging markets).
Term Offered: TBD

PPHA 35585. The Chinese Economy. 100 Units.
This course provides an overview of the Chinese economy, with two main focuses. First, we will review the significant reforms that happened in China in the past four decades, which fundamentally reshaped the modern China as we see today. Second, we will discuss some of China’s key political and economic institutions, and their implications on China and the rest of the world. Throughout the course, special emphasis will be given to the role of the state in China’s growth experience, at both the central- and local-levels.
Instructor(s): Wang, S Term Offered: Winter

PPHA 35590. Global Governance. 100 Units.
This course provides a detailed survey of global governance in both scholarship and policy. We will work together to understand the major players in international politics, and how they do (or do not) work together to govern issues of international concern. In particular, we will investigate the following players in global governance: individuals, states, international organizations, and non-governmental organizations and analyze how these actors impact, and produce, one key concept in international cooperation today: security.
Instructor(s): Jones, K Term Offered: Winter

PPHA 35595. Program Evaluation for International Development. 100 Units.
International aid, global health, global educational access and attainment, refugee resettlement, poverty are some examples of the pressing problems that require the attention of governments, governmental or non-governmental international organizations, and philanthropy. Yet, both attention and resources are finite. Every project undertaken requires careful assessments of what to undertake and what to expect. This class will introduce students to the tools to carefully assess development programs. This course serves as an introduction to the tools of the trade. The students will gain the ability to engage critically with the program evaluation reports and studies. Understand the logistics behind a program from its inception to its end or scaling-up. The students will learn experimental and quasi-experimental methods to propose and implement a program and evaluate the effectiveness of a program. We will draw on examples mainly from the area of international development with a wide variety of regional focus.
Instructor(s): Deniz, E Term Offered: Winter

PPHA 35900. Constitutional Law VII: Parent, Child, and the State. 100 Units.
This course considers the role that constitutional law plays in shaping children’s development. Among the topics discussed are children’s and parent’s rights of expression and religious exercise; parental identity rights including rights associated with paternity claims, termination proceedings, assisted reproduction, and adoption; the scope of the state’s authority to intervene to protect children, to regulate their conduct, or to influence their upbringing; and the role of race and culture in defining the family.
Term Offered: Spring
Equivalent Course(s): SSAD 67101

PPHA 36012. Budgeting for State and Local Governments. 100 Units.
This course is designed to test the thesis that good budgeting in the public sector incorporates all of the skills developed in public policy programs: policy analysis, analytics (economics, other quantitative evaluation), program design, implementation of policy and programs, decision-making, priority setting, anticipating and reacting to political dynamics, working with the press, writing, working under pressure, and preparing presentations, among others. The course will provide an introduction to the major substantive areas of state budgets, including education (higher education and preschool, elementary and secondary education), Medicaid, pensions, human services, and capital budgeting, along with revenue projecting, debt issuance, and budget balancing.
Term Offered: TBD

PPHA 36055. Understanding State and Local Government Accounting. 100 Units.
This course is a companion course to Budgeting for State and Local Governments. This course will discuss accounting fundamentals for students interested in Municipal Finance.
Instructor(s): Lesner, C Term Offered: Winter

PPHA 36101. Financial Investments for Public Policy. 100 Units.
Central banks, Treasury departments, the IMF, and sovereign wealth funds use financial data and tools to inform their decisions. This class covers the main concepts of finance theory for stocks, bonds, and investment portfolios and applies them in the public policy context. Topics covered include the following: present value, real and nominal interest rates, optimal portfolio choice, Value-at-Risk and Growth-at-Risk, risk and return, the Capital Asset Pricing Model, performance evaluation, market efficiency, and return predictability.
Instructor(s): Pfleuger, C Term Offered: Autumn
PPHA 36150. Environmental, Social, and Governance (ESG) and Impact Investing. 100 Units.
This course provides the principles and techniques that underpin various models of ESG (environmental, social, and corporate governance) investing and impact investing from the investor perspective. Students will come away from the course with a broad understanding of strategies to generate positive, measurable social or environmental impact alongside a financial return. In addition to discussing these theories and strategies, the lectures will address the rapidly changing role of the corporation and recent shifts in the US and international regulatory environment. Furthermore, there will be discussion on the increasingly influential role non-governmental organizations (NGOs) play in the industry on a variety of issues ranging from climate change to human rights.
Instructor(s): Oxtoby, J; Yablonka, L Terms Offered: Winter

PPHA 36410. Epidemiology and Population Health. 100 Units.
This course does not meet requirements for the biological sciences major. Epidemiology is the study of the distribution and determinants of health and disease in human populations. This course introduces the basic principles of epidemiologic study design, analysis, and interpretation through lectures, assignments, and critical appraisal of both classic and contemporary research articles.
Instructor(s): D. Lauderdale Terms Offered: Autumn
Prerequisite(s): STAT 22000 or other introductory statistics highly desirable. For BIOS students-completion of the first three quarters of a Biological Sciences Fundamentals sequence.
Equivalent Course(s): STAT 22810, HLTH 20910, ENST 27400, PBHS 30910

PPHA 36600. Writing for Public Policy Professionals. 100 Units.
Well-reasoned and thoughtful analysis of policy issues is a necessary but not sufficient requirement for implementing effective public policy. What is an equally important requirement is the ability to clearly and accurately relate complex policy ideas in easily understood narratives. The aim of this course, in turn, is to hone students' professional policy writing skills and to familiarize them with the major written formats used throughout the policy-making process; from memos and briefs, to white-papers and op-eds. This course is organized as a collaborative, seminar-style discussion of policy writing strategies and techniques, with a substantial focus on the thinking behind effective communication.
Instructor(s): Chrisinger, D Terms Offered: Autumn
Equivalent Course(s): SSAD 65000

PPHA 36620. Applied Policy Communications Lab. 100 Units.
To succeed in the field of public policy, it's not enough for a practitioner to design sound, data-driven strategies. Successful public policy professionals also must convince others-elected officials, peer staffers and constituents-that their position is right, using communications to justify policy outcomes mathematically, economically and morally. In this lab-based course, students will work for a client, and, in small groups, simulate an policy office culture. Students will design and execute upon a strategic communications plan, write a speech and/or Op-Ed for a principal, draft a press release, draft policy briefs and create social media copy. Students will also work on traditional media pitches, learning the basics of how to interact with reporters and then doing so with the support of the instructor, a veteran policy journalism and communications professional. The course will include conversations with outside communications experts based in Chicago and Washington D.C., as well as policy reporters based in both cities to better understand how to write in a way that breaks through with media. At the end of the quarter, the goal for each student in this class is to feel better prepared to enter the real world of public policy, emerging with written portfolio items and practical experience that can help them ace job interviews with potential employers, from public affairs consulting firms to members of the U.S. Congress.
Instructor(s): Shiner, M Terms Offered: Autumn
Note(s): Students should not take PPHA 36101 and PPHA 42510 - Applied Financial Management.

PPHA 36410. Epidemiology and Population Health. 100 Units.

PPHA 36600. Writing for Public Policy Professionals. 100 Units.

PPHA 36620. Applied Policy Communications Lab. 100 Units.

PPHA 36630. Trauma-Informed Policy Communication: Writing Effectively about War, Catastrophe & Crisis. 100 Units.
This course will introduce students to the special challenges and responsibilities of writing about trauma in public policy, from man-made and natural disasters to domestic gun violence and foreign wars. We will discuss the most effective strategies to communicate accurately and persuasively about social justice, genocide, the effects of climate change, famine, disease, violence against women, extreme poverty, gun violence, war, natural disasters, and other forms of catastrophe and crisis. Our primary concerns during these discussions will include: The ethical treatment of victims and survivors, the impact-both positive and negative-writing about trauma has on readers, how to work within the confines of survivor testimony and memory, how to conduct accurate and complete research and communicate its implications effectively under stress, how to write about trauma in a way that leads to connection and understanding, understanding and addressing the psychological hazards that come with researching and writing about trauma. While traumatic and catastrophic events and topics are inherently worthy of research and discussion, policy analysts can’t necessarily make what they find “good,” the world peaceful, or the public happy, but we can control how well we write about trauma and catastrophe. This course will explore how to do just that.
Instructor(s): Chrisinger, D Terms Offered: Autumn

PPHA 36701. Poverty Inequality & Welfare St. 100 Units.
Poverty and inequality create critical challenges for contemporary democratic societies. This seminar examines responses to these conditions in the U.S. and compares its responses to those of other countries. This examination
includes consideration of the relationship between politics and policymaking, the character of public debates about poverty and inequality, conflict over the state's role in responding to these conditions, and specific efforts to address these conditions through public policy instruments. The seminar brings both historical and international perspectives to bear, taking up selected examples that highlight how political responses to poverty and inequality vary over time and in different national settings. It also draws attention to the strategic implications for policymaking and practice.

Equivalent Course(s): HMRT 30401, SSAD 60400, SSAD 20400

PPHA 36800. Higher Education and Public Policy. 100 Units.
We are at a vital moment in American history in which the importance of access to and success in higher education has entered the political discourse on a national scale. Several states have proposed or passed "free college" plans. Total outstanding student loan debt has grown to over $1.5 trillion, surpassing in volume all other forms of debt except home loans. In addition, the most significant piece of higher education legislation at the federal level (the Higher Education Act) is overdue for reauthorization. As the area of public policy for higher education has seen growing public discussion and concern, it has been accompanied by important policy innovations in recent years. This course will explore many of the public policies through which federal, state, and local governments in the US address higher education. We will also consider how public policy for higher education differs cross-nationally. Each week will include a discussion of recent trends, policy-relevant academic scholarship, theoretical models, and policy innovations for higher education. In addition, students will have the opportunity to engage with the course material through in-class discussions and exercises.
Instructor(s): Delaney, J Terms Offered: Winter
Note(s): Suggested prerequisites: PPHA 32300 and PPHA 31002 or equivalent coursework in statistics and economic theory.

PPHA 36921. Energy Economics and Policy. 100 Units.
This course provides an overview of the economic, technological, and political forces that shape the global energy industry, the methods governments use to regulate the industry, and the business models that emerge. The course begins by framing the industry in its microeconomic context and uses that framework to explore the role of technology and innovation, global markets and geopolitics, and the regulation of externalities including climate change. The readings and coursework will use specific examples from the power, renewables, oil & gas, and environmental sectors from the United States and other select geographies to illustrate these forces in context. Students can tailor their final policy memo towards their topics of interest.
Instructor(s): Steele, D Terms Offered: Spring

PPHA 36922. Energy in the Developing World. 100 Units.
There is a remarkably clear relationship between the national income of countries across the globe and their energy consumption. The developed world uses more electricity. Meanwhile developing countries consume orders of magnitude less. Even today, there are about as many people alive who do not use electricity to light their homes as there were when Edison invented the light bulb. This course examines the nature of the energy-development relationship and selectively reviews recent research to investigate topics such as how access to electricity influences welfare, the reasons why many rural households lack power, whether decentralized renewables truly represent a solution to the energy access problem, the nature of consumer demand for electricity, and how social norms influence electricity markets in the developing world. Developing country settings are frequently characterized by dysfunctional domestic energy markets, high theft, low state capacity, widespread rationing, and subsidized tariffs. We will investigate how policy is framed in these settings and what we know about the factors that determine electricity supply and demand. The course includes space for detailed discussions with policy-makers to understand how energy policy is framed in practice and the extent to which academic research interacts with, and informs, state decision-making.
Terms Offered: TBD

PPHA 36930. Environmental Economics: Theory and Applications. 100 Units.
This course presents a broad based introduction to the theory and application of environmental economics. Topics are introduced in the context of real world environmental policy questions (with special emphasis on energy policy), then translated in to microeconomic theory to highlight the salient constraints and fundamental tradeoffs faced by policymakers. Topics include property rights, externalities, Pigouvian taxes, command and control regulation, cap and trade, valuation of environmental quality, cost benefit analysis, policymaking under uncertainty, and interregional competition.
Instructor(s): Wang, S Terms Offered: Winter

PPHA 36941. Strategic Behavior and Regulation of Firms. 100 Units.
Firm behavior is a critical aspect of any market-oriented economy. What strategies can firms employ to improve their bottom-lines, and when should regulators intervene? This course will address these questions using recent regulatory case studies, economic modeling, and a hands-on business strategy game.
Instructor(s): Baird, K Terms Offered: Autumn

PPHA 37003. Territorial Identities, State Formation, and the Experience of Modernity in the Iberian World. 100 Units.
During the last twenty years, scholars interested in the history of the crisis of the Spanish Monarchy focused on the development of the idea of nation and nationhood in the Spanish and Portuguese Atlantic. Criticizing the idea of the birth of post-colonial Latin American republics as the triumph of a national sentiment, historians
reconceptualized the nation as a result of the imperial crisis. However, considerably less attention has been paid to the parallel process of state building in the Iberian World. This course will offer an introductory overview of the process that led from imperial monarchy to national republics from the point of view of statehood formation. It will focus on the complexity of the process of emancipation as a transition from monarchical tutorship to the birth of modern “Administración,” while also addressing territorial identities as forms of non-national self-recognition that transitioned from colonial monarchy to post-colonial state.

Instructor(s): J. Portillo Valdés Terms Offered: Winter
Equivalent Course(s): LACS 35120, HIST 36221

PPHA 37040. Economic Growth and Development: Theory and Policy. 100 Units.
TBD
Instructor(s): Santos, M Terms Offered: Spring

PPHA 37103. Crime Prevention. 100 Units.
The goals of this course are to introduce students to some key concepts in crime policy and help develop their policy analysis skills, including the ability to frame problems and policy alternatives, think critically about empirical evidence, use cost-effectiveness and cost-benefit analysis to compare policy alternatives, and write effective policy memos. The course seeks to develop these skills by considering the relative efficacy of different policy approaches to controlling crime including imprisonment, policing, drug regulation, and gun-oriented regulation or enforcement, as well as education, social programs, and active labor market policies that may influence people’s propensity to commit crime or be victims of crime. While policy choices about punishment and crime prevention involve a range of legal and normative considerations, the focus in this class will be mostly on answering positive (factual) questions about the consequences of different policies.
Instructor(s): Ludwig, J Terms Offered: Autumn
Equivalent Course(s): SSAD 63200

PPHA 37105. Crime, Conflict and the State. 100 Units.
Scholars of civil war emphasize the importance, and perhaps primacy, of criminal profits for insurgencies, especially in the post-cold war era. But theories of civil war generally rest on an assumption that insurgents aim to replace state power. This seminar approaches the issue from the other end of the spectrum: armed conflict between states and “purely” criminal groups—particularly drug cartels. Cartel-state conflict poses a fundamental puzzle: Why attack the state if you seek neither to topple nor secede from it? After a brief survey of the literature on civil war and organized crime, we will study recent work on criminal conflict, particularly in Latin America. We will consider the related topics of prison-based criminal networks and paramilitaries, and explore how crime and political insurgency interact in places like West Africa and Afghanistan. Throughout, we evaluate the concepts, questions and designs underpinning current research.
Instructor(s): B. Lessing Terms Offered: Autumn
Equivalent Course(s): PLSC 48700, LACS 48700

PPHA 37106. Police Reform and Police Legitimacy. 100 Units.
This course introduces students to the concept of legitimacy in policing, the related reform efforts implemented in police departments throughout the United States in recent years, and the challenges to reform from activist movements to defund or abolish the police. Policing in the United States is in crisis. Ubiquitous video records of police-civilian interactions have changed the relationships among the police, the public, local political authorities, and the media. At the same time, policing itself is changing in profound ways. New technological capabilities have increased public expectations of transparency and efficiency in policing while raising concerns about privacy and due process rights. Local police have taken on an expanding portfolio of responsibilities, including presence in public schools, mental health crisis response, and counter-terrorism. This course will equip students to understand the issues at stake in the contemporary policy debates surrounding policing and the foundational scholarly knowledge underpinning those debates. Course topics include: the organizational structure of policing, its functional purpose, the normative expectations of citizens and communities that rely on the police for protection and how police performance is measured.
Instructor(s): Owens, R Terms Offered: Autumn

PPHA 37110. Competition Policy: Theory and Practice. 100 Units.
This course presents an economic analysis of monopoly power and efforts to limit monopoly power through competition policy. The course will focus on helping students understand the theoretical rationale for competition policy and on providing students with an understanding of the practice of competition policy by examining the recent prominent public and private antitrust actions. The first part of the course is devoted to an economic analysis of the welfare implications of monopoly power. The second half provides an overview of the legal and institutional framework of competition policy enforcement with particular emphasis on how the framework differs between the US and the EU and other countries. The final part of the course will address three types of anticompetitive conduct that represent the bulk of competition policy enforcement: collusion, exclusive contracting, and horizontal and vertical mergers. This section will present detailed studies of recent antitrust actions in the US including the US case against Microsoft and the Whole Foods and Wild Oats merger.
Instructor(s): Durkin, S Terms Offered: Autumn

PPHA 37115. Crime and Policing. 100 Units.
This class covers recent empirical work in crime and policing, including the effects of arrests, bail, criminal records, and incarceration on long-term outcomes, as well as interactions between family formation and the
criminal justice system. We also study the effects of officer diversity and police reforms, body cameras, and stop and frisk. We will examine both individual (e.g., officer, judge) racial discrimination as well as systemic racism in the justice system.

Instructor(s): Norris, S Terms Offered: Spring

PPHA 37225. Chicago by Design. 100 Units.
This course examines the theory and practice of urban design at the scale of block, street and building - the pedestrian realm. Topics include walkability, the design of streets, architectural style and its effect on pedestrian experience, safety and security in relation to accessibility and social connection, concepts of urban fabric, repair and placemaking, the regulation of urban form, and the social implications of civic spaces. Students will analyze normative principles and the debates that surround them through readings and discussion as well as first hand interaction with the urbanism of Chicago.

Instructor(s): E. Talen Terms Offered: Spring
Prerequisite(s): Offered at the Graduate level only
Equivalent Course(s): GEOG 34300, SOSC 36003

PPHA 37230. Seminar in City Planning. 100 Units.
This is a graduate seminar devoted to the topic of city planning history. Through visual and textual analysis, we will explore the history of physical plans, drawing from all time periods and cultures. Students will have the opportunity to contrast competing theories of good city-making, relating cultural and temporal variations to social, political, cultural and economic forces. Students will also explore the question of plan implementation and whether plans have had any tangible effect on urban pattern and form.

Instructor(s): E. Talen Terms Offered: Autumn
Equivalent Course(s): GEOG 36005, SOSC 36005

PPHA 37302. Key Issues in Healthcare: An Interdisciplinary Case Studies Approach. 100 Units.
This is a capstone course for the graduate program in health administration and policy. The course will explore how to approach persistent administrative and policy problems from an interdisciplinary approach. It will draw from the disciplinary skills and knowledge of students in the course and challenge students to use that knowledge in collaborative and creative ways to solve real-world problems. Students will take on an administrative, strategy, or policy problem in interdisciplinary teams. Building on each disciplinary strength—social welfare frameworks, policy analysis, and business (management, financial, etc.) strategy—students will provide an action plan and set of recommendations to approach the health problem. Topics will be chosen by students, but provided by instructor. Course will examine numerous case studies of interdisciplinary projects and consider how common challenges and pitfalls can be avoided.

Instructor(s): Staff Terms Offered: Spring
Equivalent Course(s): SSAD 46622

PPHA 37310. Racial Disparities in Health Care: A Trauma Surgeon’s Perspective. 100 Units.
Despite lockdowns, social distancing, and working from home, gun violence has not taken a hiatus during the COVID-19 pandemic. And like COVID-19, gun violence is a public health crisis with disproportionate impact on Black communities. Still, despite these challenging times, gun violence is preventable. This introductory course will examine race, violence, and medicine from the perspective of a frontline trauma surgeon and critical care specialist. Dr. Williams uses personal narratives from his twenty-year experience at some of the busiest urban trauma centers in the country to teach the intersection of gun violence, racial discrimination, and healthcare inequity.

Instructor(s): Williams, B Terms Offered: Spring

PPHA 37401. Organizations, Management, and Social Policy. 100 Units.
The public’s business is often performed by street-level bureaucracies, those public and private organizations directly responsible for policy delivery. This course examines how these complex organizations operate in a dynamic political environment and what that means for social policy. This course introduces students to alternative models for analyzing these types of organizations, using examples from a variety of social policy areas to assess organizational practices and management strategies. The course explores how organizations influence the production of social policy as well as the broader relationship between citizen and state.

Equivalent Course(s): SSAD 44612

PPHA 37411. Management Matters: Leadership, Strategy, and Getting Things Done. 100 Units.
More than ever before, the central role of a leader is to formulate objectives, organize to achieve those objectives, and convey such in a form attractive to employees and other stakeholders, whether investors, donors, customers, partners, or politicians. The leader and leadership team have point responsibility, but middle managers too are expected to play a role, and most certainly expected to shape their personal business responsibilities to broad organizational strategy. Leaders are less often trained to perform these responsibilities than they are simply expected to meet them. This course is about bringing people together to create and deliver value. It is about identifying opportunities, mobilizing resources around opportunities, and organizing to deliver on opportunities. In short: this course is about getting things done.

PPHA 37415. Exercising Leadership in the 21st Century. 100 Units.
At a time when rapid social, technological, and ecological shifts are forcing organizations to increase their capacity to adapt in order to survive, let alone thrive. Market shifts due to globalization, a population that is
nearing 8 billion, and increasing scarcity of natural resources, are but a sampling of the complex challenges we face. These new and emerging realities require the development of new skills in order to effectively lead others through complexity and enable change that is sustainable. The course is designed to build a student's adaptive capacity, which starts with thinking differently about leadership. The course will apply a breadth of theory and research on leadership, management, and human behavior in organization in order to understand what skills and practices are needed to tackle the complex and tough challenges we face today.

Instructor(s): Johnson, C Terms Offered: Autumn

PPHA 37425. Leadership and Public Policy: Winning in the Endgame. 100 Units.
This course will examine how to provide effective leadership and oversight to successfully impact on public policy. With the use of the political feasibility model, students will be able to assess the strength a leader's power base, evaluate risks and opportunities, explore historical precedents, and learn when to shift policy strategies. Importantly, students will learn the importance of maintaining an exit strategy to avoid going down in defeat. With the use of Harvard case studies and current events, students will learn how to effectively navigate constantly changing political environments to achieve success. Students will become adept at evaluating the political feasibility for bringing about policy changes at all levels of government, business, non-profit and community while providing effective leadership for winning in the endgame.
Instructor(s): Gibbs, R Terms Offered: Spring

PPHA 37710. Medicaid: Understanding the Public Policy of a Federal-State Partnership. 100 Units.
This course will provide an understanding of the application of health policy and analysis through the lenses of the Medicaid program. The course will begin with an overview of health policy and public health policy analysis and evaluation as it relates to the administration of the Medicaid program, a federal-state partnership and the largest health insurance program in the U.S., covering millions of low-income individuals and families. State Medicaid programs have been an important locus of innovation and improvement in health care delivery and financing as well as health outcomes. This course will also provide in-depth view of Medicaid policies from birth to the end of life, covering maternal and child health, mental health, long-term care, among other topics. This will include highlights of many state program approaches and innovations with designing their programs, applying the policies and evaluating the outcomes.
Instructor(s): Latham, C Terms Offered: Winter

PPHA 37720. Introduction to U.S. Health Policy and Politics. 100 Units.
The purpose of this course is to introduce students to the concepts needed to critically evaluate U.S. health policy issues. The course will 1) provide an overview of the U.S. health system including its institutions, stakeholders, and financing mechanisms, 2) describe the politics of health and illuminate how the structure of our political system shapes health policy outcomes, and 3) offer a framework for assessing the critical features central to health policy debates. Building upon this knowledge, the course will conclude with a discussion of strategies for influencing the health policy process and how they might be employed in future leadership roles within the health sector.
Instructor(s): Loren Saulsberry Terms Offered: Autumn
Prerequisite(s): None
Equivalent Course(s): PBHS 28500, SSAD 45011, HLTH 25500, PBHS 35500

PPHA 37730. Global Health Policy. 100 Units.
There is no economic health without public health. The interdependencies between national and international health are growing in the face of persistent health inequities within and between countries. This course begins with an introduction to the research and measurement tools needed to inform good policies and programs. We then examine the structures and institutions that influence global health, including the social determinants of health equity, global health governance and security, health behavior and incentives, and health systems and financing. We will also study several key topics for global health policy, including infectious diseases and immunization, nutrition and non-communicable diseases, and reproductive and maternal health. Many of the course readings are impact evaluations, and throughout the course students will be tasked with determining and defending what policy and programs recommendations they would make based on evidence.
Instructor(s): Johnson, C Terms Offered: Spring

PPHA 37820. Health Care Markets and Regulation. 100 Units.
This course analyzes the economics of health care markets and the way regulations impact those markets. We will study the unique institutional arrangements found in the health care sector (primarily, though not exclusively, in the United States) and examine how market forces manifest themselves in this setting. We will consider the behavior of health care providers, insurers' roles both as intermediaries and risk managers, patients' health care demand, and geographic differences in medicine. The study of government regulations, including their theoretical and empirical impacts on health care markets, will be integrated throughout these topics.
Instructor(s): Gottlieb, J Terms Offered: Spring

PPHA 37910. Race and Ethnic Differences in Health: Epidemiology, Behavior and Policy. 100 Units.
TBD
Instructor(s): Kaestener, R Terms Offered: Spring
PPHA 38010. Health Services Research Methods. 100 Units.
The purpose of this course is to better acquaint students with the methodological issues of research design and data analysis widely used in empirical health services research. To deal with these methods, the course will use a combination of readings, lectures, problem sets (using STATA), and discussion of applications. The course assumes that students have had a prior course in statistics, including the use of linear regression methods. 
Instructor(s): P. Sanghavi Terms Offered: Spring
Prerequisite(s): At least one course in linear regression and basic familiarity with STATA; or consent of instructor.
Equivalent Course(s): HLTH 29100, SSAD 46300, PBHS 35100

PPHA 38030. Health Care Policy. 100 Units.
This class will cover the basics of health economics and U.S. health care policy. We will discuss the value of health, the productivity of health care and the role of health insurance. We will also review the major sources of US health care (physicians, hospitals, and drugs) and health insurance (including Medicaid and Medicare). We will discuss the drivers of health care innovation and health care costs. We will also take up timely policy topics such as Medicare for All, drug pricing, medical bankruptcy, racial disparities in health, and hospital mergers. My aim is to provide a survey of the many views of health care markets and reforms.
Terms Offered: Winter
Note(s): Crosslist of LAWS 43346

PPHA 38290. Economic Analysis of Health Policies. 100 Units.
This course covers the foundations of the economics of health care as applied to current issues of health care policy. Content includes demand for health, medical care, and insurance; supply of medical care and behavior of health care practitioners; and economic perspectives on measurement in health care research.
Using a combination of lectures, readings, problem sets, and discussion of newspaper and journal articles, the goal is for students to acquire a basic understanding of economic knowledge and thinking and to be able to apply that knowledge in analyzing policies. The course is open to graduate students and a limited number of undergraduates. A prior course in microeconomics is recommended; for those students without this preparation, the beginning of the course will include a short primer on key concepts in microeconomics.
Instructor(s): T. Konetzka Terms Offered: Winter
Note(s): Microeconomics course recommended
Equivalent Course(s): PBHS 38010, HLTH 28010

PPHA 38300. Health Economics and Public Policy. 100 Units.
This course analyzes the economics of health and medical care in the United States with particular attention to the role of government. The first part of the course examines the demand for health and medical and the structure and the consequences of public and private insurance. The second part of the course examines the supply of medical care, including professional training, specialization and compensation, hospital competition, and finance and the determinants and consequences of technological change in medicine. The course concludes with an examination of recent proposals and initiatives for health care reform.
Instructor(s): Meltzer, D Terms Offered: Spring
Prerequisite(s): PBPL 20000 or ECON 20000 and one undergraduate course in quantitative research methods (Statistics or Econometrics) or the equivalent or consent of the instructor
Equivalent Course(s): ECON 27700, CCTS 38300, PBPL 28300

PPHA 38320. Health System Transformation. 100 Units.
The U.S. health care system is characterized by unsustainable costs, inconsistent quality, and unequal access. Health care leaders, managers and policy-makers must understand how to improve systems of care in a complex health care environment. This course will provoke critical thinking and address contemporary approaches to health care system change. Articles and case studies will be provided to illustrate how health care organizations improve quality, equity, and cost, and how policy incentives hinders constructive system change. Examples will mainly be drawn from the health care field; however, system transformation knowledge is important for the business, non-profit, government, and social services sectors as well, and students from these disciplines may apply concepts taught in class to their sector interests. Students will reflect on their professional experience and internships and consider how systems around them can be improved. Students will review literature from a variety of academic and professional disciplines relating to health care quality, health equity, science of improvement, and transformation, and apply this knowledge to local, state, and national settings. Prerequisite - preferred but not required: The U.S. Health Care System, PPHA 37510/SSAD 47512/HSTD 35411.
Instructor(s): Botwinick, L Terms Offered: Winter
Prerequisite(s): Recommended: PPHA 37510/ SSAD 47512/HSTD 35411
Equivalent Course(s): SSAD 48320

PPHA 38520. GIS Applications in the Social Sciences. 100 Units.
Geographic Information Systems (GIS) refers to tools and techniques for handling, analyzing, and presenting spatial data. GIS has become a powerful tool for social sciences applications over the past thirty years, permitting lines of scientific inquiry that would not otherwise be possible. This course provides an introduction to GIS with a focus on how it may be applied to common needs in the social sciences, such as economics, sociology, and urban geography, as distinct from physical or environmental sciences. Students will learn basic GIS concepts as applied to specific research questions through lectures, lab exercises, and in-class demonstrations. Examples of
the kinds of topics we will pursue include how we can use GIS to understand population trends, crime patterns, asthma incidence, and segregation in Chicago.
Instructor(s): English, N Terms Offered: Spring

PPHA 38550. Technology for Public Policy: Building Connected, Engaged, and Empowered Communities. 100 Units.
Technology has the power to connect people, quickly and widely distribute information, reduce waste and inefficiencies, and create accountable and transparency. This course will explore how governments, institutions, and engaged citizens can leverage the power of data and technology towards the public interest. This is not a course that teaches technical skills, rather a course that builds awareness, knowledge, and expertise in how technology works and how it can change the way governments and people operate in concert to make an impact in our communities.
Instructor(s): DuMerer, D Terms Offered: Spring

PPHA 38720. Urban Economics and Policy. 100 Units.
The course is devoted to understanding the economics of cities and regions. Applications to policy are an integral part of the course and will be analyzed along with urban theoretical models.
Instructor(s): Ierulli, K Terms Offered: Spring

PPHA 38751. Human Trafficking and the link to Public Corruption. 100 Units.
This course provides a comprehensive, practical introduction to the history and present-day reality of human trafficking both domestically and internationally. In the year of the 20th anniversary of the Palermo Protocol, the course will look back on how far individual states have come in their efforts to fulfill their obligations under the Protocol. By reviewing the challenges to criminal prosecution first, the course will explore alternative paths to eradicating this transnational human rights crime that impacts over 40 million individuals annually. Reviewing the array of supply chain laws domestically and internationally first and then exploring industry-wide practices, students will learn to examine solutions from an array of laws that reach beyond merely criminal prosecution. Recognizing that public corruption plays a significant and powerful role in aiding the crime to continue with little societal repercussions, the course will explore ways in which the Foreign Corrupt Practices Act and the TVPRA have mechanisms to enforce these violations that provide billions of dollars to the traffickers. Taught by federal district court judge, Hon. Virginia M. Kendall. This class requires a final paper of 20-25 pages. Participation may be considered in final grading.
Terms Offered: Winter

PPHA 38760. The Racialization Experiences of Immigrants and the Second Generation. 100 Units.
Public narratives often portray immigrants as outsiders. In the current environment of a global pandemic, economic recession, hyper-surveillance, and protests against police brutality, immigrants are continually constructed as the "Other". While the public is unlikely to recognize the distinctions between various immigrant groups, in reality, immigrants undergo a unique racialization experience as they adjust to life in the United States. It is therefore important to understand the racialization experiences of immigrants and their U.S.-born children. In light of the current political debate about immigration policy, which directly affects immigrants and the second generation, this course will cover this often-overlooked group. Although the course will deal with the United States as a whole, the experiences of immigrants in Chicago will also be highlighted.
Instructor(s): Okigbo, K. Terms Offered: Spring

PPHA 38765. The Politics of Authoritarian Regimes. 100 Units.
This course provides an overview of topics related to politics in authoritarian regimes. We begin by introducing the concept of authoritarianism: how it differs from democracy and how authoritarian regimes differ from each other. We then investigate the tools authoritarian rulers employ to maintain power, including institutions, policies, and tactics, and we examine the effects and side effects of these tools. Finally, we study transitions of power and of institutions, both on the way out of authoritarianism (democratization) and on the way in (democratic backsliding). Students who take this course will acquire a broad understanding of authoritarian politics and how it is covered in the literature.
Instructor(s): Scott Gehlbach; Zhaotian Luo Terms Offered: Winter
Prerequisite(s):
Note(s): Prior recommended coursework for undergraduates: one semester in Statistics (Stats 220 or equivalent) and current or prior training in game theory (PBPL 222, Social Science Inquiry core, or equivalent). Prior recommended coursework for graduate students: one semester of statistics and current or prior training in game theory.
Equivalent Course(s): PLSC 38765, PLSC 28765, PBPL 28765

PPHA 38790. Introduction to Peacebuilding. 100 Units.
This course aims to provide students with a solid foundation in the theories and practices of contemporary peacebuilding operations, paying attention to the role of external actors, namely international organizations, bilateral donors and non-governmental organizations. Students will gain an understanding of the complex and multifaceted dimensions of peacebuilding, including liberal-democratic statebuilding, stabilization operations, economic restructuring and gender reforms. We will explore these diverse and intersecting themes as they relate to the broader goal of supporting lasting peace and rebuilding war-affected states and societies in meaningful and effective ways. This course pays special attention to the current policy initiatives and operational challenges in Afghanistan, examining the prospects for peace after over more than a decade of international interventions.
Without doubt, international peacebuilding endeavors are complicated, costly and fraught with structural limitations and shortcomings. Students will gain familiarity with these challenges and will learn about the various approaches used by the international community to monitor and evaluate the impact of peace processes. Finally, this course concludes with critical theoretical perspectives on liberal peacebuilding and highlights alternative frameworks proposed by scholars to help mitigate future failures and advance successes.

Instructor(s): Chishti, M
Terms Offered: Spring

PPHA 38829. Artificial Intelligence for Public Policy. 100 Units.
It is hard to name a sector that will not be dramatically affected by artificial intelligence (or machine learning). There are many excellent courses that teach you the mechanics behind these innovations -- helping you develop an engineering skill set. This course takes a different approach. It is aimed at people who want to deploy these tools, either in business or policy, whether through start-ups or within a large organization. While this requires some knowledge of how these tools work, that is only a small part of the equation, just as knowing how an engine works is a small part of understanding how to drive. What is really needed is an understanding of what these tools do well, and what they do badly. This course focuses on giving you a functional, rather than mechanistic, understanding. By the end, you should be an expert at identifying ideal use-cases and thereby well-placed to create new products, businesses and policies that use artificial intelligence.

Instructor(s): J. Ludwig
Terms Offered: Winter

Prerequisite(s): Students should have some Statistics experience.
Equivalent Course(s): PBPL 28829

PPHA 38830. The Minds Behind the Machine: Artificial Intelligence in Modern Policy. 100 Units.
This course is designed to offer students an overview of the state of artificial intelligence technology and the implications it has for public policy. Students will hear first-hand insider perspectives from public and private sector professionals and international experts who both work on and with this cutting-edge technology. This course will explore how AI technology can be used, and abused, in creating public policy, and gain insight on AI technology, its role in governmental institutions, and ways it can be used in governance.

Instructor(s): Nikolich, A
Terms Offered: Autumn

PPHA 38840. Addressing Technology’s Wake: Emerging Risks and the Public Policy Imperative. 100 Units.
For many, technology and social progress are highly correlated, if not synonymous. The salutary impact of technology is indisputable. But with technological advancement comes consequences in the form of new economic risks which are often significant and typically born unequally by individuals and groups in modern society. Policies, programs and contractual schemes to address such risks, the joint province of government and private insurance businesses, usually significantly trail their emergence. The reason: a panoply of interests, both public and private, struggle to address questions of social responsibility, moral hazard, and actuarial probabilities in order to address new risks. In technology’s large wake, individuals and businesses face significant risk exposure while these interests negotiate and litigate what is both politically possible and commercially viable. This course applies a social science perspective to the problem of emerging risk in advanced, technologically driven societies and economies. It focuses on three particular risk domains that are both highly topical and inadequately addressed by either the private or public sector.

Instructor(s): J. Ludwig
Terms Offered: Winter

PPHA 38900. Environmental Science/Policy. 100 Units.
With a strong emphasis on the fundamental physics and chemistry of the environment, this course is aimed at students interested in assessing the scientific repercussions of various policies on the environment. The primary goal of the class is to assess how scientific information, the economics of scientific research, and the politics of science interact with and influence public policy development and implementation.

Instructor(s): Rachlin, S
Terms Offered: Spring

PPHA 3904. Inequality, Household Finance, and Tax Policy. 100 Units.
The first component of this course will feature seminar discussions of inequality in the US, with respect to income, gender and race, and how these interact with US tax policy. We will have a focus on income transfers to low-income households such as the Earned Income Tax Credit. We will also review current policy topics in Household Finance, the study of how households save, borrow, and/or use insurance to overcome unexpected changes in household income. In addition, we will discuss the process of filing tax returns, the prevalence of income tax refunds, and the various industries, both non-profit and for-profit, that have arisen around this phenomenon. Next, students will go into the field, and work as volunteer tax preparers for a local, Chicago non-profit, Ladder Up. Students will be trained as tax preparers (which requires a 3-hour training session), learn how these services are delivered, and will also learn about the various social goals and public benefits that are often coupled with this process. Tax season begins in late January, and the students will volunteer weekly for about 6 weeks, until the end of the quarter. Students are also encouraged, though not required, to continue to volunteer until the end of the tax season, April 15th. Finally, students will produce a final project as a part of a group project. This course counts towards the Finance & Policy Certificate, or the Markets & Regulation Certificate.

Instructor(s): Jones, D
Terms Offered: Winter

PPHA 39510. Food and Drug Law and Policy. 100 Units.
This course explores legal and policy issues in the federal regulation of foods, drugs, medical devices, and other products coming within the jurisdiction of the FDA. It will examine substantive standards applicable to these products and procedural issues in the enforcement of these standards. It will also address the tension between
state and federal regulation in this area, constitutional constraints on such regulation, the conflict between state
tort law and federal regulation, and a variety of other issues relating to the development and marketing of
regulated products. The student’s grade is based on class participation and a final examination or major paper.

PPHA 39519. Energy Law and Policy. 100 Units.
Energy markets and regulation have undergone significant changes in the past 20 years in the United States in
attempts to improve reliability, to reduce costs, and to address environmental impacts, while meeting increased
demand. Focusing primarily on electric power, this course will introduce students to energy economics and the
principles and administration of public utility regulation. The class will trace the historical development of the
regulated electric industry, review traditional sources of energy used to generate electricity (water, coal, and
natural gas), and examine the current structure of the electric industry and emerging issues, including wholesale
and retail competition, environmental effects (including climate change), renewable energy, conservation and
efficiency.

PPHA 39530. Macroeconomic Policymaking. 100 Units.
This course is about economic policymaking, with a focus on fiscal and monetary policy. It is structured around
two topics: (i) challenges of fiscal adjustment programs; (ii) implementing fiscal rules; (iii) interactions between
fiscal and monetary policies; (iv) inflation targeting regimes; (v) economic shocks through monetary policy;
and, (vi) financial programming. For each section, we will begin with a review of some materials that give
the student a broad perspective on the state-of-the-art knowledge in the particular topic, before turning to
the specific and practical policy issues. The course aims to give students: (i) a good understanding on what
policymakers should do in each policy area covered (the normative aspect); (ii) a sound explanation on why
policies are not always optimal and, many times, deviate from the desirable course of action, emphasizing the
obstacles for achieving optimality (for example, political constraints). Case studies will be drawn from recent
country experiences.
Instructor(s): Valdovinos, C Terms Offered: Spring

PPHA 39611. Economics of Cultural Policy. 100 Units.
What are the public policy issues facing arts practitioners in the United States in the 21st century? How will the
next generation of arts and culture leaders influence and shape policy beyond seeking appropriations of funds?
How can the arts operate both as intrinsically valuable and as key creative tools to apply to tough community
issues? Through a combination of lecture/discussion, engagement with leading voices from the field, and
scholarly research, this course will provide an overview of cultural policy in the US and explore the evolving
intersections of public policy and the arts in the current context.
Instructor(s): Coursey, D Terms Offered: Autumn Spring

PPHA 39750. Politics and Public Policy in Latin America. 100 Units.
This course will cover the politics of policy making in Latin America. The first part will focus on understanding
the problems of economic development in the region. It will address how and why Latin America is different
by looking at its economic outcomes, economic and social policies and political institutions. It will also look
at different examples of how political institutions shape policy outcomes. The second part will ground the
distinctiveness of Latin America in its history, and show why understanding this is critical for comprehending
why it is so different from the United States. It will explore how historical factors persist, for example,
how the legacy of authoritarianism shapes redistributive policies and how these historical foundations have
created the weak Latin American states we see today. The third part of the course will look at how groups such
as civil society or violent actors can also shape policymaking and welfare in this region. Finally, it will discuss
some perspectives on whether some countries in the region have managed to find ways to change their political
institutions and subsequently their social and economic policies with the prospect of creating a more prosperous
society. The aim of this course is for students to gain empirical knowledge on the region’s politics and policies as
well as a practical understanding of political factors that shape policy outcomes.
Instructor(s): Bautista, M Terms Offered: Spring

PPHA 39770. Introduction to Latin American Civilization II. 100 Units.
Winter Quarter addresses the evolution of colonial societies, the wars of independence, and the emergence of
Latin American nation-states in the changing international context of the nineteenth century.
Terms Offered: Winter
Equivalent Course(s): ANTH 23102, HIST 16102, HIST 36102, CRES 16102, LACS 16200, SOSC 26200, LACS 34700

PPHA 39780. Introduction to Latin American Civilization III. 100 Units.
Spring Quarter focuses on the twentieth century, with special emphasis on the challenges of economic, political,
and social development in the region.
Instructor(s): D. Borges Terms Offered: Spring
Equivalent Course(s): HIST 16103, SOSC 26300, LACS 34800, CRES 16103, LACS 16300, ANTH 23103, HIST 36103

PPHA 39830. Quantitative Security. 100 Units.
Since Quincy Wright’s A Study of War, scholars of war and security have collected and analyzed data. This
course guides students through an intellectual history of the quantitative study of war. The course begins
with Wright, moves to the founding of the Correlates of War project in the late 1960s, and then explores the
proliferation of quantitative conflict studies in the 1990s and 2000s. The course ends by considering the recent
focus on experimental and quasi-experimental analysis. Throughout the course, students will be introduced
to the empirical methods used to study conflict and the data issues facing quantitative conflict scholars. For students with limited training in quantitative methods, this course will serve as a useful introduction to such methods. For students with extensive experience with quantitative methods, this course will deepen their understanding of when and how to apply these methods.
Equivalent Course(s): PLSC 48401

PPHA 39921. The Brazil-Argentina Nuclear Cooperation Agreement and Thermoelectric Transition in Brazil. 100 Units.
In this course we present a history of Brazil-Argentina nuclear cooperation and how Brazil is planning the transition of its nuclear power toward a mix of increased share of nuclear power. Proliferation risks are a concern of international community when nuclear programs expansion is considered. The Brazilian-Argentine Agency for Accounting and Control of Nuclear Materials, created in 1991, has been fundamental in assuring the international community (via the International Atomic Energy Agency) that the nuclear materials and facilities of both countries are being used for peaceful purposes. Domestically, the debate has been environmental in nature, and concerns topics ranging from mining to power generation, and from radioactive materials disposal to radiation effects in living organisms and major accidents. These diplomatic, environmental, social and political issues are in turn dependent on technical details of the thermoelectric generating process, and this nexus of issues provides the topics for the course.
Instructor(s): Ramos, Alexandre Terms Offered: Autumn
Note(s): Tinker Visiting Professor Autumn 2018
Equivalent Course(s): HIPS 25121, LACS 35121, LACS 25121, CHSS 35121

PPHA 39925. Energy Policy and Human Behavior. 100 Units.
The success of many environmental and energy-related policies depends on the support and cooperation of the public. This course, drawing from multiple fields of behavioral science, will examine the psychological and social aspects of different energy-related behaviors, ranging from household energy conservation to public support and opposition for emergent energy technologies (e.g., wind farms, fracking, etc.). Through a mix of lecture and discussion, we will explore questions such as: what are potential motivations and barriers - beyond financial considerations - to the uptake of energy efficient and renewable energy technologies? How can policies be designed to encourage adoption? Why is climate change such a divisive issue and what are the psychological barriers that prevent concerned people from acting? Why do people support clean energy broadly but object to developments when proposed in their own communities? By taking a behavioral approach, the course aims to equip students with an enhanced framework for evaluating energy and environmental policies that goes beyond traditional economic and regulatory perspectives. There are no prerequisites.
Instructor(s): Wolske, K Terms Offered: Autumn

PPHA 39930. International Climate Policy. 100 Units.
Anthropogenic climate change is one of the most difficult challenges faced by modern society. A revolution in socioeconomic and environmental data, along with new and old insights from economics, can inform how we understand this global challenge. During the course, our focus will be on the impacts of climate change upon society, and the necessity of solutions that deal with the global scope and often unequal nature of the impacts. This interdisciplinary course covers the tools and insights from economic analysis, environmental science, and statistics that inform our understanding of climate change impacts, the design of mitigation and adaptation policies, and the implementation of these policies. Students will develop a mastery of key conceptual ideas from environmental economics relevant for climate change and acquire tools, both theoretical and empirical, for conducting analyses of climate impacts and policies. The latter parts of the course will hone students' ability in applying these insights and tools through policy debates and presentations. The goal is to help students become informed and critically-minded practitioners of climate-informed policy making.
Instructor(s): Jina, A Terms Offered: Winter

PPHA 40101. Policy Analysis: Meths/Apps. 100 Units.
This master's-level course provides students with the basic tools of policy analysis. Students will learn and apply tools of decision analysis in written group assignments and in an accompanying computer lab. Students will also learn and apply concepts of cost-effectiveness, cost-benefit, and cost-utility analysis with social service, medical, public health applications. Doctoral students and master's students who intend to take the course Advanced Applications of Cost-Effectiveness Analysis in Health will complete two additional laboratory assignments. Topics to be covered include: Decision trees for structured policy analysis, the economic value of information, analysis of screening programs for HIV and child maltreatment, sensitivity analysis, cost-effectiveness analysis of life-saving interventions and programs to reduce behavioral risk, valuing quality of life outcomes, ethical issues in cost-benefit analysis, analysis of irrational risk behaviors. Substantive areas covered include: HIV/substance use prevention, school-based prevention of sexual risk, smoking cessation, and housing policy. In the associated learning lab, students will use computer decision software to build and analyze decision trees in policy-relevant examples. They will conduct one-way and two-way sensitivity analysis to explore the impact of key parameters on cost-effectiveness of alternative policies. Students will receive an introduction to dynamic modeling in the context of HIV prevention, cancer screening, and transportation programs.
Equivalent Course(s): PBHS 45610, SSAD 45600
Courses

PPHA 40102. Political Economy I: Formal Models of Domestic Politics. 100 Units.
This course provides an overview of formal models of domestic politics-that is, the theory of domestic politics as formalized using the language of game theory. Building on Professor Gehlbach’s textbook of the same name, the course covers nine classes of models: electoral competition under certainty and uncertainty, special interest politics, veto players, delegation, coalitions, political agency, nondemocracy, and regime change. The material assumes prior coursework in game theory and proficiency in differential and integral calculus.
Instructor(s): Gehlbach, S Terms Offered: Winter
Prerequisite(s): PhD Students Only
Equivalent Course(s): PLSC 41105

PPHA 40310. Poverty and Social Welfare Policy. 100 Units.
This course examines the causes and consequences of poverty in the United States and reviews the major social policies used to reduce poverty. It will emphasize U.S. policy approaches but will also include material on other countries for a comparative perspective. The course will emphasize research (both quantitative and qualitative) from a broad range of sources including economics, political science, sociology, developmental psychology, and public health. The types of questions to be addressed include the following: What is poverty? Why is poverty so persistent? Why are poverty rates for certain groups so high? What is the causal impact of poverty on children and adults? What is the effect of social policies on poverty? What are the interrelationships among poverty, family structure, parental behavior, neighborhoods, education, labor market conditions, and public policies? Is poverty passed on from generation to generation?
Instructor(s): Kalil, A Terms Offered: TBD

PPHA 40321. The Modern Welfare State. 100 Units.
In 2016, Denmark was the happiest country in the world according to a United Nations happiness report. Denmark, along with Sweden and Finland have shared 20 years of relative prosperity and now are among the wealthiest countries in the world in terms of GDP per capita. They are also "welfare states" with very high levels of taxation and redistribution-policies at odds with traditional views on the power of incentives to encourage prosperity. The influence of this model is evident is policy discussion in the US on issues ranging from educational subsidies to family-friendly workplaces. What can policy makers in other countries learn from the successes and failures of the Welfare State? This class has three goals: 1. to familiarize you with Welfare State taxes and subsidies, 2. to help you understand why these policies are successful (or appear to be successful), and 3. to give you the tools to critically evaluate suggestions for similar policy implementation in the US.
Instructor(s): Gallen, Y Terms Offered: Winter

PPHA 40700. Early Childhood: Human Capital Development and Public Policy. 100 Units.
The goal of this course is to introduce students to the literature on early child development and explore how an understanding of core developmental concepts can inform social policies. Our substantive foci will be on early childhood poverty, the role of parenting and the home environment in shaping children's development, and the evidence base for intervention in early childhood for economically disadvantaged children. The course will cover evidence from neuroscience, psychology, economics, sociology, and public policy as it bears on these questions. In particular, we will explore the principles of early childhood development can guide the design of policies and practices that enhance the healthy development of young children, particularly for those living in adverse circumstances, and thereby build a strong foundation for promoting equality of opportunity, reducing social class disparities in life outcomes, building human capital, fostering economic prosperity, and generating positive social change. In doing so, we will discuss the evidence on whether the contexts of children's development are amenable to public policy intervention and the costs and benefits of different policy approaches.
Instructor(s): Kalil, A Terms Offered: Winter
Equivalent Course(s): CHDV 40770, PSYC 40710

PPHA 41021. Health Impacts of Transportation Policies. 100 Units.
Governments invest in transport infrastructure because it encourages economic growth and mobility of people and goods, which have direct and indirect benefits to health. Yet, an excessive reliance on motorized modes of transport harms population health, the environment and social well-being. The impact on population health is substantial: Globally, road traffic crashes kill over 1.3 million annually. Air pollution, to which transport is an important contributor, kills another 3.2 million people. Motorized modes of transport are also an important contributor to sedentary lifestyles. Physical inactivity is estimated to cause 3.2 million deaths every year, globally. This course will introduce students to thinking about transportation as a technological system that affects human health and well-being through intended and unintended mechanisms. The course will examine the complex relationship between transportation, land use, urban form, and geography, and explore how decisions in other sectors affect transportation systems, and how these in turn affect human health. Students will learn to recognize how the system level properties of a range of transportation systems (such as limited-access highways, urban mass transit, inter-city rail) affect human health.
Instructor(s): Bhal, K Terms Offered: Spring

PPHA 41102. Political Economy II: Intermediate Applied Theory. 100 Units.
In this course, students will delve into substantive debates in political economy and hone their empirical and analytical skills. We will focus on good research designs that answer important causal questions. In doing so, we will review the technical skills necessary to conduct credible empirical research such as differences-in-differences, instrumental variables, and regression discontinuity designs. More importantly, we will practice the
thinking necessary to develop and evaluate good research designs. The class will also incorporate the theoretical training that students received in Political Economy I and devote attention to the interplay between theory and empirical testing. This course is not an introduction to statistics or econometrics. The course is intended for PhD students who have already received training in these areas, have been exposed to the econometric tools used in the course, and have taken Political Economy I. Everyone other than Harris School PhD and MACRM students should consult the instructor before enrolling. Class sessions will primarily be discussion, but will include some lecture review of material. Some sessions will review a particular set of empirical methods in detail, others will involve the detailed discussion of a single paper, and others will involve a mix of lecture and discussion revolving around a substantive topic in political economy. Students are expected to prepare for each class session and participate in the discussions.

Instructor(s): Zelizer, A Terms Offered: Spring

PPHA 4120. Political Economy of Development. 100 Units.
This course is intended as an introduction for Ph.D. students to the research literature in the political economy of development. Its purpose is to give students both a sense of the frontier research topics and a good command of how social science methodological tools are used in the area.
Instructor(s): Blattman, C; Robinson, J Terms Offered: Spring
Prerequisite(s): Harris PhD or instructor permission required
Equivalent Course(s): ECON 35570, PLSC 46600

PPHA 41300. Cost-Benefit Analysis. 100 Units.
The goals of this course include learning (1) how to read, or judge, a cost-benefit analysis; (2) how to incorporate elements of cost-benefit analysis into policy work; and (3) when CBA is a good tool to use and when it isn’t. This class also presents an opportunity to reflect on big picture issues of how to treat uncertainty and risk; discount costs and benefits received in the future; value lives saved; and manage other difficult matters. In brief, this class offers a comprehensive treatment of the cost benefit analysis methodology, with attention devoted to the microeconomic underpinnings of the technique as well as applications drawn from many areas, including health, the environment, and public goods.
Terms Offered: Autumn Spring Winter

PPHA 41501. Game Theory. 100 Units.
This course introduces students to games of complete information through solving problem sets. We will cover the concepts of dominant strategies, rationalizable strategies, Nash equilibrium, subgame perfection, backward induction, and imperfect information. The course will be centered around several applications of game theory to politics: electoral competition, agenda control, lobbying, voting in legislatures and coalition games.
Instructor(s): Sonin, K Terms Offered: Autumn
Note(s): Harris PhD and MA CRM students only.

PPHA 41600. Survey Research Methodology. 100 Units.
Scientific social surveys provide a substantial proportion of the data on which policy decisions in government are based. In health services research, child and family research, education, and much of social and economic statistics, the dominant data source is the survey. This course is designed to introduce participants to the key components of the survey and how to evaluate them. The field of survey methodology draws on theories and practices from several academic disciplines - sociology, psychology, statistics, mathematics, computer science, and economics. This course will introduce the set of principles that are the basis of standard practice in the field. Topics include: inference in social research; survey design; coverage, sampling, and nonresponse; questionnaire and question design; modes of data collection; interviewing; post-collection processing; scientific integrity and ethics; history of survey research; evaluation of surveys. The course will include a quarter-long project in which small groups will design a survey to tackle a real-life survey issue and present the results at the end of the quarter.
Instructor(s): Datta, R Terms Offered: Winter
Prerequisite(s): At least one course in statistics at the level of PPHA 31000.

PPHA 41800. Survey Questionnaire Design. 100 Units.
The questionnaire has played a critical role in gathering data used to assist in making public policy, evaluating social programs, and testing theories about social behavior (among other uses). This course offers a systematic way to construct and evaluate questionnaires. We will learn to think about survey questions from the perspective of the respondent and in terms of cognitive and social tasks that underlie responding. We will examine the impact of questions on data quality and will review past and recent methodological research on questionnaire development. The course will help students to tell the difference between better and worse types of survey questions, find and evaluate existing questions on different topics, and construct and test questionnaires for their own needs. Prerequisites: Graduate standing (no undergraduate standing). Students enrolled in this class are expected to have completed at least one course on research methods. Some background in psychology is helpful, but it is not required.
Instructor(s): Bautista, R Terms Offered: Spring
Equivalent Course(s): PSYC 47500, SSAD 57500

PPHA 42000. Applied Econometrics I. 100 Units.
This course is the first in a three-part sequence designed to cover applied econometrics and regression methods at a fairly advanced level. This course provides a theoretical analysis of linear regression models for applied
researchers. It considers analytical issues caused by violations of the Gauss-Markov assumptions, including linearity (functional form), heteroscedasticity, and panel data. Alternative estimators are examined to deal with each. Familiarity with matrix algebra is necessary.

Instructor(s): Durlauf, S Terms Offered: Autumn
Prerequisite(s): This class is open only to PPHA PhD (Public Policy Studies) or PPHA-MAR (PubPol MA/CertRsch) Students Only or consent of instructor.
Note(s): Harris PhD & MA CRM students or instructor permission required.

PPHA 42100. Applied Econometrics II. 100 Units.
Public Policy 42100, the second in a three-part sequence, is a basic course in applied econometrics designed to provide students with the tools necessary to evaluate and conduct empirical research. It will focus on the analysis of theoretical econometric problems and the hands-on use of economic data. Topics will include non-linear estimation, multi-variate and simultaneous systems of equations, and qualitative and limited dependent variables. Some familiarity with linear algebra is strongly recommended. Required of all first-year Ph.D. students.
Instructor(s): Grogger, J Terms Offered: Winter
Prerequisite(s): PPHA 42100 or instructor permission required.

PPHA 42200. Applied Econometrics III. 100 Units.
Public Policy 42200, the final course in a three-part sequence, is a basic course in applied econometrics designed to provide students with the tools necessary to evaluate and conduct empirical research. Required of first-year PhD students.
Instructor(s): Ito, K Terms Offered: Spring
Prerequisite(s): PPHA 42100

PPHA 42500. Public Finance I. 100 Units.
This Ph.D.-level course provides the conceptual and theoretical foundations of public finance by dealing with a large number of concepts, models, and techniques that are used in the research on public finance. A command of the positive analysis of the incidence of government policies is fundamental to the study of most problems of public finance; positive analysis is emphasized throughout the course. Among the topics are: measurements of changes in welfare; economy-wide incidence of taxes; effects of taxation on risk-taking, investments, and financial markets; corporate taxation; taxation of goods and services; taxation of income; taxation and savings; positive problems of redistribution; and tax arbitrage, tax avoidance, tax evasion, and the underground economy.
Prerequisite(s): Open to Ph.D. students; other students may enroll with consent of the instructor.
Equivalent Course(s): ECON 36000

PPHA 42510. Applied Financial Management. 100 Units.
This course will cover topics in both corporate finance and investments. The goal is to provide students with the tools to solve problems and the practical knowledge to understand financial decision-making and financial markets. The focus will be resolutely practical - how these tools are actually used in the markets - but is built on solid theory combined with over twenty years of industry experience.
Instructor(s): Coleman, T Terms Offered: Spring
Note(s): Students should not take PPHA 42510 and PPHA 42510 - Financial Investments for Public Policy.

PPHA 42521. History of Financial Crises. 100 Units.
This course has an ambitious goal - to investigate both the tools of risk management at the firm level through hands-on training and practice, and the lessons of macroeconomic or systemic risk through examination of financial crises throughout history. These lessons are important - whether it is the South Sea Company crisis of 1700s or the mortgage debt crisis in the United States in the 2000s, financial crises have shaped our world. Understanding history is the first step towards intelligent policy. To examine the financial and economic history we will read some of the classic (and also some of the newer) texts in this area: &quot;A Monetary History of the United States, 1857-1960 by Milton Friedman &amp; Anna Jacobson Schwartz; Manias, Panics, and Crashes by Charles P. Kindleberger (for a history of financial panics); Extraordinary Popular Delusions and the Madness of Crowds by Charles Mackay (for a history of the 18th century South Sea Bubble in Britain and the Sword Blade Bank and Mississippi Company in France); This Time is Different - Eight Centuries of Financial Folly by Carmen Reinhart &amp; Kenneth Rogoff (for why this time is not different - financial folly has a long history); Fragile by Design by Charles Calomiris &amp; Stephen Haber (for a cogent and disciplined analysis of banking systems across time and across countries - US, Canada, UK, Mexico, and Brazil)
Instructor(s): T. Coleman Terms Offered: Spring

PPHA 42535. Bank Regulation and Management. 100 Units.
This course counts toward the Economic Policy certificate. This course presents the basics of the banking business and the development of the current financial regulatory environment for the United States, the European Union, the UK, and China, as well as the role of the Bank for International Settlements (BIS) in setting global standards.
Payment systems and bank management of financial risks, including credit, market and others, will be covered. The focus will be on the banking and money markets in each of these countries, with limited discussion of futures and equity exchanges, and unregulated financial activities. The course will provide an overview of the various regulatory bodies, which cover financial services in these countries. Further, the delineation of responsibilities and areas of overlap and potential conflict will be discussed. Major legislation in each country
will be presented and some discussion of the underlying legal, economic and financial theories that led to these laws will be discussed.

Instructor(s): Schabes, D Terms Offered: TBD
Note(s): Economic Policy Certificate course; Students pursuing certificate receive priority.

PPHA 42540. Fiscal and Monetary Policy in the 21st Century. 100 Units.
This course discusses public policy from macroeconomic perspective. We will examine how public policy effects the macroeconomy both in theory and in practice. The first part of the course studies household labor, savings, and consumption behavior in the face of various government policies and how these aggregate in the macroeconomy. In particular, we will pay special attention to (1) taxes, (2) transfer programs, and (3) social insurance programs including both their cyclical and long-run effects. We will then turn to the empirical analysis of social safety net programs, paying attention to cross-state and cross-country comparisons. We will conclude this section of the course by discussing the tradeoffs the government faces in providing social insurance, reducing inequality, and promoting efficiency. The second part of the course will study monetary policy, touching on money and banking. We will study several models of monetary policy and their public policy implications. We will conclude with a discussion of the U.S. Financial Crisis.
Instructor(s): Coleman, T Terms Offered: TBD

PPHA 42811. Foreign Relations Law. 100 Units.
This course examines the constitutional and statutory doctrines regulating the conduct of American foreign relations. Topics include the allocation of foreign relations powers between the three branches of the federal government, the status of international law in U.S. courts, the scope of the treaty power, the validity of executive agreements and the power to declare and conduct war. The course will also focus on the political question and other doctrines regulating judicial review in foreign relations cases. Where relevant, current events will be explored, such as ongoing controversies regarding individual rights during wartime, the post-September 11 war on terrorism, targeted killings, and drone strikes, among other topics. Grades will be based on a final examination.
Terms Offered: TBD

PPHA 42820. Law and Economic Development. 100 Units.
Why do some nations perform better than others, whether measured by income, happiness, health, environmental quality, educational quality, freedom, etc.? We explore the proximate causes of inequality across countries, including the role of human capital, natural resources, technology and market organization. We also explore the root causes of long term differences in welfare. We will consider the role of geography (e.g., location in tropical areas) and technological development (e.g., the impact of plow agriculture) on welfare. We will spend a substantial amount of time on the role of institutions, broadly defined, on development. We will explore the value of state capacity, democracy, and the common law. We will study the impact of disruptions such as the slave trade, colonialism and war. Ultimately, we will try to understand the implications of each explanation for development policy. Time permitting, we will also consider consider optimal, second-best rules for countries with weak state capacity and limited rule of law. Students will be required to complete a review and critical analysis of the literature on a specific topic in development (20-25 pages). The topic must be approved by the professor. (cross-listed as LAWS 43232)

PPHA 43450. Seminar on China Macro Policy. 100 Units.
During this seminar under the aegis of professor Thomas Coleman, students will explore a topic of their choosing on Chinese macroeconomic policy. Students will conduct guided research on a topic approved by the instructor at the beginning of the quarter. Students must submit to the instructor a proposal by the third week. Students must develop and submit to the instructor the reading list for their chosen topic. (Students must use a citation management system such as Zotero, EndNote, Mendeley.) Students should view this as a seminar where they teach other students (and faculty) about their topic, rather than as a course where the faculty teach the students. Thomas Coleman from Harris together with colleagues from the Paulson Institute will direct and supervise the independent study. The class will meet each week and students will present a critical summary of the most relevant reading and news on their topic and discuss their research progress with fellow students and the instructors. Students’ weekly presentations can include own info-graphics and charts to explain or summarize concepts and trends.
Instructor(s): Coleman, T Terms Offered: TBD

PPHA 43650. The Scale-up Effect in Public Policy: Understanding and addressing threats to scalability. 100 Units.
In recent years, citizens and lawmakers have become increasingly enthusiastic about adopting evidence-based policies and programs. Social scientists have delivered evidence on countless interventions that positively impact people’s lives. And yet, most programs, when expanded, have not delivered the dramatic societal impacts promised. In order to truly reap the benefits of evidence-based interventions (practices, programs, and policies), researchers and practitioners must figure out how to take these programs from small-scale experiments and implement at scale in a way that enables population-level impacts. This course builds on an economic model (The science of using science: towards an understanding of threats to scalability by Omar Al-Ubaydli, John List, and Dana Suskind) to explore the threats to scalability i.e. phenomenon by which the magnitude of a treatment effect changes when an intervention moves from research setting to population-wide implementation. This course will examine some of the most critical questions of public policy: Why have we failed to bring evidence-
based programs found to be effective in small-scale experiments to the population level? How can we scale such programs effectively? How can researchers, practitioners, and policymakers work together to bring fundamental changes in research and program design.

Instructor(s): Suskind, D; Gupta, S Terms Offered: Autumn
Equivalent Course(s): ECMA 31810

PPHA 44100. Advanced Microeconomics for Policy Analysis I. 100 Units.
Students should learn the neoclassical theories of consumer behavior, production, and competitive equilibrium. Students will also be introduced to the selection problem and basic approaches to the solving the selection problem.
Instructor(s): Espinosa, F Terms Offered: Autumn
Prerequisite(s): Harris PhD & MA CRM students or instructor permission required

PPHA 44200. Advanced Microeconomics for Policy Analysis II. 100 Units.
The course provides a rigorous foundation of microeconomics and the mathematical tools necessary for students who want to take graduate level courses in economics and public policy and understand articles in economics journals. It covers classical consumer theory, choice under uncertainty, and theory of production; competitive markets and general equilibrium; and an introduction to game theory with applications to signaling and principal-agent problems. The course is intended for students with a solid understanding of intermediate microeconomics (e.g. PPHA 32300 and PPHA 32400) and facility in (single-variable) calculus. Further mathematical tools will be introduced as needed. Required of all Ph.D. students.
Instructor(s): Jones, D Terms Offered: Winter
Prerequisite(s): PPHA 44100 or instructor permission required

PPHA 44320. Energy and Environmental Economics I. 100 Units.
This course will emphasize the economics of natural resource production and problems associated with externalities and common property, with a focus on the energy sector. Most lectures will be theoretical in nature, but we will spend considerable time studying applications that have an empirical component. The course has several complementary objectives: (1) provide a solid foundation in concepts like Hotelling’s Rule and Pigouvian taxation that are a prerequisite for understanding modern environmental and resource economics; (2) develop proficiency with theoretical, computational, and empirical tools that will be valuable for future self-directed research; and (3) gain experience in reading, presenting, and discussing modern research in energy and environmental economics.
Instructor(s): Kellogg Terms Offered: Autumn
Equivalent Course(s): ECON 36730

PPHA 44330. Environmental and Energy Economics II. 100 Units.
Graduate field sequence course focusing on energy and environmental economics.
Instructor(s): Michael Greenstone Terms Offered: Winter
Equivalent Course(s): ECON 36740

PPHA 44340. Energy and Environmental Economics III. 100 Units.
Optimal environmental regulation requires an analysis of the trade-offs between market and regulatory imperfections. Market allocations are inefficient in the presence of imperfections such as externalities, market power, and informational asymmetries. On the other hand, government intervention to mitigate these imperfections is not costless, and can even make market performance worse. This course focuses on recent empirical analysis of the costs and benefits of environmental and energy policies, including an introduction to the relevant econometric methodologies such as randomized controlled trials, regression discontinuity designs, bunching analysis, and structural estimation. Topics will include: energy demand and the energy efficiency gap, fuel economy and appliance efficiency standards, non-linear and real-time electricity pricing, wholesale electricity markets, renewable electricity policies, natural gas markets, retail gasoline markets, and technology innovations.
Instructor(s): Ito, K Terms Offered: Spring
Prerequisite(s): PPHA 44330
Equivalent Course(s): ECON 36750

PPHA 44401. Development Economics. 100 Units.
This course covers theoretical models and empirical methods in development economics. Topics include health, education, household economics, small and medium enterprise finance, technology adoption, corruption, and the intersection of behavioral economics and development. The course will also review a range of research designs including experiments, natural experiments, and structural approaches.
Instructor(s): Michael Kremer Terms Offered: Autumn
Equivalent Course(s): ECON 35600

PPHA 44550. Weak States and International Relations. 100 Units.
The course will begin with a review of the development of the modern state and the international system based on Westphalian concepts of state sovereignty. Then we will study the basic causes and consequences of weakness or fragility of states, and we will consider how the international system has responded to the challenges of weak states and failed states. The course will conclude with a focus on the search for better ways to support positive
political development in weak or fragile states. Students will be expected to write a paper that applies ideas from the course to a current or historical situation.

Instructor(s): Myerson, R; Miklaucic, M Terms Offered: Autumn

PPHA 44900. Social Experiments: Design and Generalization. 100 Units.
The pressure in many fields (notably medicine, health research, and education) for evidence-based results has increased the importance of the design and analysis of social investigations. This course will address three broad issues: the design and analysis of social experiments and quasi-experiments; the design and analysis of sample surveys; and how the interrelationships between the two approaches can inform generalization from experiments. There are two parallel streams in the course. First, the course will tackle the issues of generalization from three different perspectives: (i) the classic statistical design of experiments; (ii) the design of experiments and quasi-experiments in the social sciences; (iii) the design and analysis of sample surveys. Second, using a set of readings on research design in a variety of settings, we will consider how evidence from research is gathered and used. Randomized clinical trials in medicine, tests of interventions in education and manpower planning, and the use of scientific evidence in policy formulation will be among the examples.

Instructor(s): Omuirheartaigh, C Terms Offered: Winter

PPHA 45211. Regional Innovation and Growth. 100 Units.
This course will familiarize students with the process for growing a regional innovation economy, as demonstrated in the Bay Area, Boston, Tel Aviv, and Dortmund, Germany, and Akron, Ohio, to name just a few. We will cover the importance of applied research, the process of technology transfer, clusters, and the role of government support and public policy. Using Chicago, a city that has struggled to compete in technology, as a case study, we will design an exportable process for supporting entrepreneurship, manufacturing, and job creation in new industries.

Instructor(s): Day, T Terms Offered: Autumn

PPHA 45700. Environment and Development. 100 Units.
The course objective is to introduce and familiarize the students with the political approaches and methods of environmental analysis and assessment used to support decision-making and the development of policies and regulations at local, regional, national, and global scales.

Terms Offered: Autumn

PPHA 45710. Applied Microeconomics in Economic History. 100 Units.
TBD
Terms Offered: TBD
Equivalent Course(s): ECON 42400, BUSN 33917

PPHA 46350. Economics of Regulation. 100 Units.
This course is 1 of 2 required courses in the Markets and Regulation track of the Economic Policy certificate at Harris. This course will examine the evaluation and implementation of economic policies. This course also examines the structure and properties of different markets and regulatory schema.

Instructor(s): Ierulli, K Terms Offered: Winter

PPHA 46610. Workplace and Family Policy. 100 Units.
The topics covered in the course will include: the demographic transition, human capital accumulation, gender wage and employment gaps, discrimination in the workplace, family leave and childcare policies, tax policies including subsidies like the Earned Income Tax Credit (EITC), and related welfare policies. We will draw on the theory of static and dynamic labor supply, theories of labor demand, and labor market equilibrium to guide its investigation, and use empirical tools to answer research questions. For each topic covered in this course, I will introduce an elementary treatment of the canonical theoretical model and give examples of its empirical application. In studying empirical applications, we will often draw on analysis from international experience.

Instructor(s): Asai, Y Terms Offered: Spring

Note(s): Bautista, M; Chishti, M
Equivalent Course(s): GNSE 47400

PPHA 47400. Women, Development, and Politics. 100 Units.
This course will explore the dominant and emerging trends and debates in the field of women and international development. The major theoretical perspectives responding to global gender inequities will be explored alongside a wide range of themes impacting majority-world women, such as free market globalization, health and sexuality, race and representation, participatory development, human rights, the environment and participation in politics. Course lectures will integrate policy and practitioner accounts and perspectives to reflect the strong influence development practice has in shaping and informing the field. Course materials will also include anti-racist, postcolonial and post-development interruptions to dominant development discourse, specifically to challenge the underlying biases and assumptions of interventions that are predicated on transforming “them” into “us”. The material will also explore the challenges of women participating in politics and what are the consequences when they do or do not.

Terms Offered: Autumn

Equivalent Course(s): GNSE 47400

PPHA 47420. Women, Peace, and Security. 100 Units.
This course focuses on critical feminist theorizing and scholarship on militarization, war and masculinities, and on feminist articulations of peace and (demilitarized) security. Students will learn about the transnational
feminist research, policy and advocacy network known as the Women, Peace and Security (WPS) agenda, and the important inroads this network has made in establishing international and national policies in the fields of gender, conflict, peace and development. The course highlights the background, history and policy significance of the historic Security Council Resolution 1325 on Women, Peace and Security, as well as subsequent and related UN resolutions. Students will also learn about alternative feminist approaches and visions for international peace and security, through powerful case study examples of feminist activism, solidarity and diplomacy.

Instructor(s): Chishti, M Terms Offered: Winter

PPHA 47900. Fundamentals of Health Services Research: Theory, Methods and Applications. 100 Units.
This course is designed to provide an introduction to the fundamentals of health services research. The basic concepts of health services research will be taught with an emphasis on both their social scientific foundations and the methods needed for their practical application to empirically relevant research. Theoretical foundations will draw on principles from economics, sociology, psychology, and the other social sciences. Methodological topics to be covered will include techniques for data collection and analysis, including outcomes measurement, survey methods, large data set research, population-based study design, community based participatory research, research based in clinical settings, qualitative methods, cost-effectiveness analysis, and tools of economic and sociological analysis. The theoretical and empirical techniques taught will emphasize those relevant to the examination of health care costs, quality, and access. Major applications will include: measurement and improvement of health care quality, analysis of health disparities, analysis of health care technology, and analysis of health care systems and markets. Students prepare a grant proposal as the final assignment for this course.
Instructor(s): D. Meltzer, M. H. Chin Terms Offered: Summer
Equivalent Course(s): PBHS 35000, CCTS 45200

PPHA 48403. Optimization-Conscious Econometrics. 100 Units.
This course studies the core optimization concepts underlying econometric estimation and inference. The objective is to both develop a deep understanding of how estimators are computed, and to get a better theoretical and geometrical understanding of classical econometric estimators through the prism of optimization theory. Each optimization concept or method is studied using a well established econometric estimator as the working example: linear programming is taught through the example of quantile regression, duality is taught via nonparametric inference, numerical linear algebra is taught via partial identification questions in OLS, integer programming is taught as a solution method for instrumental variables quantile regression, and so on.
Instructor(s): G. Pouliot Terms Offered: Winter
Equivalent Course(s): ECON 31740

PPHA 50000. Internship: Public Policy. 100 Units.
Elective course credit may be received in conjunction with an internship if the student writes a paper of academic caliber under the supervision of a Harris School faculty advisor. Normally the advisor assigns readings, meets with the student, and conducts the course in the manner of an Individual Reading and Research course.

PPHA 50101. Leadership in Chicago. 000 Units.
This seminar will focus on Chicago and is described as "Eyes on Chicago: Individuals, Institutions and Initiatives that shape Chicago's future". The seminar will be taught by former Cook County Clerk, Found of Good Government Illinois, and Harris Senior Fellow, David Orr. Each week, the guest speakers will talk informally and off the record with students about careers, leadership and policy issues. Speakers generally allow plenty of time for student questions or comments. There are a few obligations incurred by signing up for the seminar. Students are expected to take on at least one task such as introducing a guest speaker, drafting thank you letters, and reviewing biographies. Most importantly, attendance is critical because the speakers are very busy and influential. A separate application process might be required to attend this seminar. A separate application process is required to attend this seminar.
Instructor(s): Orr, D Terms Offered: Autumn
Note(s): Students must apply through an application process.

PPHA 50200. Ph.D. Workshop. 25 Units.
This course provides students with an opportunity to present their research to faculty and other PhD students.

PPHA 50201. PhD Presentation Workshop. 100 Units.
This workshop is aimed at all PhD students and will actively involve those in the 3rd year or higher. The workshop will focus on the form of their PhD presentations - how to communicate and explain your research. This workshop will run parallel to the PhD workshop for all doctoral students. The format will be a discussion of presentation tools and tips, followed by student presentations. Students who present in the prior PhD workshop will present in this workshop. Students should consider this workshop a collaborative discussion of: 1) What went well in the prior PhD Workshop, 2) What went poorly during the presentation, and 3) How to modify and improve the presentation. The discussion will be on how to communicate and explain not the content of the presentation.
Instructor(s): Blattman, C Terms Offered: Autumn Spring Winter
PPHA 51200. Field Research. 000 Units.
This a non-credit course open only to Harris international students who are pursuing a paid internship via CPT. Permission to be enrolled in this course must be granted by the student’s Harris academic advisor. They must complete a 3-4 page reflection paper at the end of the internship, which should be turned into their advisor. The employer will also be asked to complete an evaluation form.

PPHA 51500. Public Policy and Economics Workshop. 100 Units.
This is a workshop; Only open to PhD students and is an audit only course.
Equivalent Course(s): ECON 56300

PPHA 51600. Workshop on Human Potential and Public Policy. 100 Units.
The Workshop on Human Potential is one of the core intellectual activities of the Center for Human Potential and Public Policy. It is an interdisciplinary forum for graduate students, post docs, and faculty whose work concerns behavior, health, and well-being across the lifespan and the ways in which technology and public policy shape human potential and achievement. The Workshop has active members in the areas of the social, behavioral, health, and policy sciences. The Workshop on Human Potential alternates between two types of sessions. Not only do we regularly invite outside speakers for a traditional “workshop” presentation, but we also provide a forum for faculty, post-doctoral fellows, and graduate students to present research-in-progress in order to receive critical and constructive feedback. PhD students enrolling in this course should expect to be registered as an auditor.

PPHA 51700. Energy Policy Practicum. 100 Units.
Course Search (https://intranet.chicagobooth.edu/pub/coursesearch/coursesearch/)
Equivalent Course(s): BUSN 33701

PPHA 51900. Center for Program Evaluation Workshop. 100 Units.
This course provides students with an opportunity to present their research to faculty and other PhD students. Faculty will also present their research.

PPHA 51910. Inequality Reading Group. 100 Units.
This is a workshop; This course provides students with an opportunity to present their research to faculty and other PhD students. Faculty will also present their research. Open only to PhD students and is an audit only course.

PPHA 52000. Individual Reading and Research Course. 100 Units.
The instructor and the student determine the nature of each Reading and Research Course. It is expected that they meet at least three or four times during the quarter and that the student write a substantial original paper.

PPHA 52500. Apprenticeship: Public Policy. 100 Units.
This course is only open to MA CRM students at the Harris School. Students work with a faculty member as a research assistant. They will also develop ideas for a research paper and begin writing under the faculty supervisor’s direction.

PPHA 52501. Energy and Environmental Policy Research Experience. 100 Units.
This course is only open to PhD students at the Harris School. Students work with a faculty member as a research assistant. They will also develop ideas for a research paper and begin writing under the faculty supervisor’s direction.
Terms Offered: TBD

PPHA 56101. Seminar: Political Economy. 100 Units.
This is a PE lunch/workshop; This course provides students with an opportunity to present their research to faculty and other PhD students. Faculty will also present their research. Open only to PhD students and is an audit only course.

PPHA 57000. Microeconomics for International Development. 100 Units.
This course is a required core course for the MA in International Development and Policy program and will discuss microeconomic principles required for economic development contexts.
Terms Offered: Autumn

PPHA 57100. Data Analysis for International Development. 100 Units.
This course is a required core course for the MA in International Development and Policy program and will discuss data analysis principles required for economic development contexts.
Terms Offered: Autumn

PPHA 57200. Analytical Politics for International Development. 100 Units.
This course is a required core course for the MA in International Development and Policy program and will analyze policy making principles required for international development contexts.
Terms Offered: Autumn

PPHA 57300. Economic Development and Policy (MAIDP) 100 Units.
This course is a required core course for the MA in International Development and Policy program and will discuss policy principles required for economic development contexts.
Instructor(s): Jina, A Terms Offered: Winter
Courses

PPHA 58001. Data Analytics I: Quantitative Analysis. 100 Units.
This course is a required core course for the Evening MA program and will discuss microeconomic and statistical principles required for practitioners in policy making.
Terms Offered: Autumn
Prerequisite(s): Fowler, A

PPHA 58002. Data Analytics II: Introduction to Program Evaluation. 100 Units.
The goal of this course is to introduce students to program evaluation and provide an overview of current issues and methods in impact evaluation. We will focus on estimating the causal impacts of programs and policy using social experiments, panel data methods, instrumental variables, regression discontinuity designs, and matching techniques.

PPHA 58050. Leadership, Negotiations & Management. 100 Units.
This course is a required core course for the Evening MA program and will discuss leadership principles required for practitioners in policy making.
Terms Offered: Autumn

PPHA 58101. Economic Analysis I: Microeconomics. 100 Units.
The goal of Economic Analysis I: Microeconomics is to introduce microeconomics with an emphasis on understanding market, market failures, and welfare analysis.

PPHA 58102. Economic Analysis II: Introduction to Cost Benefit Analysis. 100 Units.
Second of two course series. The goal of Economic Analysis II is to continue the analysis of microeconomics with an emphasis on understanding cost benefit analysis. Cost-benefit analysis (CBA) is the primary tool used to provide quantitative evidence to inform public policy decisions. Ideally, CBA will improve the efficiency of public policy by identifying public policies/projects that create the most "value" for society. The concept of CBA is easily understood. For any project/policy under consideration (versus current state of the world), do the following: add up all of the current and future monetary costs of the project/policy; add up all of the current and future monetary benefits of the project/policy; and then compare the benefits to costs. If benefits are greater than costs, then the project/policy is candidate to be implemented. Seems straightforward, right? Conceptually it is pretty straightforward, although there are some thorny theoretical and philosophical issues that arise. The conceptual difficulties, while important, are few in comparison, however, to the practical difficulties associated with conducting a CBA. This course will review the theoretical/conceptual foundations of CBA as applied in the public sector. The course will also review some of the philosophical issues central to the validity of CBA and practical difficulties in conducting CBA.
Terms Offered: Autumn Spring

PPHA 58103. Economic Analysis III: Public Finance and Budgeting. 100 Units.
This course is a required core course for the Evening MA program and will discuss public finance principles required for practitioners in policy making.
Instructor(s): Marlowe, J Terms Offered: Autumn Spring Winter

PPHA 58201. Analytical Politics I: Foundations. 100 Units.
This course is a required core course for the Evening MA program and will analyze the policy making principles required for practitioners in policy making.
Terms Offered: Autumn Spring

PPHA 58202. Analytical Politics II: Politics and Policy Making. 100 Units.
This course is the second of a two course series required for the Evening MA program. This course will analyze the policy making principles required for practitioners in policy making.
Terms Offered: Winter

PPHA 58500. Microeconomics for Health Policy. 100 Units.
The first of a two-part sequence in microeconomic theory, this course covers the theory of consumer choice, the theory of the firm and the concept of equilibrium. Part of the Double Executive Masters Program with the London School of Economics.
Terms Offered: Spring
Prerequisite(s): Admission to the Double Executive Masters Program.

PPHA 58600. Statistics for Health Policy. 100 Units.
This course aims to provide students with a basic understanding of statistical analysis for policy research and leadership. This course makes no assumptions about prior knowledge, apart from basic mathematics skills. Examples will draw on current events and global health debates when possible. Part of the Double Executive Masters Program with the London School of Economics.
Terms Offered: Spring
Note(s): Admission to the Double Executive Masters Program.

PPHA 58700. Leadership, Negotiation and Advocacy in Health Policy: Strategies and Tactics. 100 Units.
Discusses two major ‘soft skills’ that are critical to drive successful health policy engagement and reform: Leadership and Negotiation. Part of the Double Executive Masters Program with the London School of Economics.
Terms Offered: Spring
Note(s): Admission to the Double Executive Masters Program.

**PPHA 58800. The Fix: Health Policy Project. 100 Units.**
Led by Harris faculty, this is an intensive experiential learning initiative in which teams of students work under faculty supervision to apply their rigorous program education to resolve actual health policy challenges. Part of the Double Executive Masters Program with the London School of Economics.

Terms Offered: Summer

Prerequisite(s): Admission to the Double Executive Masters Program

**PPHA 59100. Current Topics in Public Policy I. 25 Units.**
First course in a four-course current topics seminar on contemporary public policy issues for the Harris Evening MA program.

Terms Offered: Autumn

**PPHA 59200. Current Topics in Public Policy II. 25 Units.**
Second course in a four-course current topics seminar on contemporary public policy issues for the Harris Evening MA program.

Terms Offered: Winter

**PPHA 59300. Current Topics in Public Policy III. 25 Units.**
Third course in a four-course current topics seminar on contemporary public policy issues for the Harris Evening MA program.

Terms Offered: Spring

**PPHA 59400. Current Topics in Public Policy IV. 25 Units.**
Fourth course in a four-course current topics seminar on contemporary public policy issues for the Harris Evening MA program.

Terms Offered: Spring

**PPHA 59500. Analytical Politics: The Policymaking Process. 100 Units.**
This course covers the normative foundations of policy making, how strategic interactions give rise to social dilemmas that create room for public policy to improve social welfare, and how technological, political and institutional factors constrain policymakers and sometimes prevent good policies from being enacted. Part of the Double Executive Masters Program with the London School of Economics.

Terms Offered: Spring

Prerequisite(s): Admission to the Double Executive Masters Program.

**PPHA 59501. Cost-effectiveness in Health Care. 100 Units.**
This course will introduce students to the basic notions of economic evaluation including cost-benefit analysis, cost-utility analysis and cost-effectiveness analysis as applied to the health care sector. The course will discuss notions of welfare economics and extra-welfarism, the identification and measurement of resource costs when markets do not exist (shadow prices), the measurement of health outcomes (including life years gained and Quality Adjusted life-years gained (QALYs)), methods of discounting and the basic calculations involved in estimating the cost-effectiveness of new health care technologies, including Markov modelling. The definition of the incremental cost-effectiveness ratio (ICER) will be outlined, as will the treatment of uncertainty (including structural (model) uncertainty, sensitivity analysis, and multivariate, parameter uncertainty). The use of bootstrap elements to estimate standard errors for the ICER will be described. Presentation of results, including the use of Acceptability curves, will also be covered. Finally, the use of cost-effectiveness in pharmaceutical pricing and reimbursement will also be detailed.

Instructor(s): Cohen, E Terms Offered: Spring

Note(s): Course is only for Double Executive Masters degree program in Health Policy with the London School of Economics.

**PPHA 59600. Health Policy Research Methods. 100 Units.**
Introduces students to a diverse range of mixed methods approaches to policy research and will provide them with a foundation in multiple disciplinary perspectives and methodological approaches. Part of the Double Executive Masters Program with the London School of Economics.

Terms Offered: Spring

Prerequisite(s): Admission to the Double Executive Masters Program.

**PPHA 59700. Microeconomics for Health Policy II. 100 Units.**
This second part of a two-course sequence on microeconomics explores why markets and policies can fail to be efficient and what policies and markets may be used to correct these inefficiencies. Part of the Double Executive Masters Program with the London School of Economics.

Terms Offered: Spring

Prerequisite(s): Admission to the Double Executive Masters Program.

**PPHA 59801. Dissertation in Health Economics and Policy. 100 Units.**
The dissertation could be on any topic in the field of health policy and economics. It should attempt to integrate approaches and knowledge learned across courses and present results to address a health policy, economic issue or a problem identified through the use of either primary or secondary data. It must demonstrate adequate knowledge of relevant theoretical and empirical literature in the field. In addition, careful analysis of the policy
implications and formulation of policy recommendations is essential. The main body of the dissertation should, in principle, include the background to the research, method of investigation, results of the analysis, discussion and policy implications and recommendations.

Instructor(s): Cohen, E Terms Offered: Spring

Note(s): Course is only for Double Executive Masters degree program in Health Policy with the London School of Economics.

**PPHA 60000. Policy Lab. 100 Units.**

In Harris Policy Labs, students work under faculty supervision to apply their Harris training to help government agencies and non-profit organizations address public policy challenges. Students effectively serve as policy consultants, working in interdisciplinary teams to conduct research, analyze complex data, and engage with clients and other experts to produce a set of solution-oriented final deliverables. In addition to gaining first-hand experience on a specific policy issue, students hone other skills that prepare them for policy careers such as working with imperfect data, navigating team dynamics, and communicating complex analyses and policy recommendations to a client’s leadership. In 2018-19, Policy Labs will be offered in Autumn, Winter and Spring Quarters. Each Lab will focus on a particular policy area or set of policy tools and engage two or three different client organizations. Clients will range from local to international organizations and are expected to include Metropolitan Planning Council, Chicago Park District, Oxfam America, Chicago Department of Family and Support Services, Advance Illinois, Illinois Department of Human Services, World Bank, NATO, Forefront, City of Gary, and others. Some projects may be of particular interest to students who are planning to complete Harris certificate programs.

Terms Offered: Autumn Spring Winter

**PPHA 65000. Current Topics in Public Policy Lecture Series. 000 Units.**

This course is a seminar on contemporary public policy issues for first-year Harris students enrolled in a full-time masters program. The seminar will illustrate how concepts and methods students study in their core curriculum can be applied to current public policy topics.

Terms Offered: Autumn

**PPHA 65500. Topics in Academic Research Career Preparation. 000 Units.**

Current topics lecture seminar on preparing for academic research careers for first-year PhD students at Harris. Terms Offered: Autumn

Note(s): This course will be NON graded.

**PPHA 65501. Education & Society Certificate Seminar. 000 Units.**

This course is a non-credit writing seminar for students admitted to the Education and Society Certificate. Terms Offered: Autumn Spring Winter

Note(s): This course will be NON (non-graded).

**PPHA 65555. Introduction to ESG and Impact Investing. 000 Units.**

This seminar provides an overview of the principles and techniques that underpin various models of ESG (environmental, social, and governance) investing and impact investing from the investor perspective. Students will come away from the course with a broad understanding of strategies to generate positive, measurable social or environmental impact alongside a financial return. In addition to discussing these theories and strategies, the lectures will address the rapidly changing role of the corporation and recent shifts in the US and international regulatory environment. Furthermore, there will be discussion on the increasingly influential role non-governmental organizations (NGOs) play in the industry on a variety of issues ranging from climate change to human rights.

Instructor(s): Oxtoby, J; Yablonka, L. Terms Offered: Winter

**PPHA 65560. Financial Statement Analysis for Governments and Non-Profits. 000 Units.**

This is a course on how to read, analyze, and discuss public sector organizations’ financial statements. Financial statement analysis is a valuable skill for students interested in municipal finance and management consulting, but also for those interested in state and local government management, policy analysis, and many other fields.

As such, this course is designed with all second year MPP students in mind, but is presented at the level of depth and sophistication that’s expected of candidates for analyst roles in the public sector divisions of the credit rating agencies, investment banks, management consulting firms, and similar employers.

Instructor(s): Marlowe, J Terms Offered: Autumn

**PPHA 65565. Data Storytelling: An Applied Short Course. 000 Units.**

By completing this seminar, students will improve their ability to develop and design professional quality visuals for presentations as well as convey their story to achieve maximum impact. Students will learn best practices and tools for designing effective visualizations and presentations. This seminar will include opportunities for students to work in teams on exercises to practice skills and techniques. Students will then work in teams to prepare short mock presentations for feedback. Enrolled students should be comfortable using SQL to access and manage data; R and R Studio to analyze data; and Tableau to depict and visualize data. Students should also expect to use tools from G Suite, including Docs, Sheets, Slides, and Drive. Seminar registration is by application only. Seminar is limited to Harris 2nd year students.

Instructor(s): Hartman, K Terms Offered: Autumn
PPHA 70000. Advanced Study: Public Policy Studies. 300.00 Units.
Advanced Study: Public Policy Studies
**The Curriculum**

**Course Overview**

**The Core**

The core curriculum draws on a variety of disciplines and fields, including economics, sociology, political science, statistics, econometrics, political economy, organizational theory, and program evaluation. These areas provide a foundation in critical analysis, reflecting the School’s belief that mastering quantitative and analytical skills prepares students to be effective public policy practitioners.

**Electives**

Electives allow students to explore special academic interests and fields, as well as to participate in internships and independent research complementing required coursework. Students may choose to focus on an area of public policy, register for courses in departments and schools across the University, and take advantage of opportunities for applying academic training to real-world problems. Electives offer students an opportunity to acquire training both in the theoretical and applied analysis of public policy issues, and to develop the skills necessary for a professional position in policy analysis.

**The Master of Public Policy (MPP)**

The Master of Public Policy is a two-year program for students interested in gaining a thorough training in analytical skills.

**Degree Requirements**

- Successful completion of 18 graduate-level courses (1800 units of credit) to earn the degree, not including any courses with grades of F, I, W, or courses with no reported grade.
- Completion of the following seven core courses with a C- or better (No core courses may be taken pass/fail):
  - PPHA 30800 Analytical Politics I: Strategic Foundations or PPHA 41501 Game Theory (with instructor approval)
  - PPHA 31610 Analytical Politics II: Political Institutions or PPHA 40102 Political Economy I: Formal Models of Domestic Politics (with instructor approval)
- Statistics Sequence I. Choose one of the following:
  - PPHA 31002 Statistics for Data Analysis I
  - PPHA 31202 Advanced Statistics for Data Analysis I
  - Any course in the PhD econometrics sequence (PPHA 42000, PPHA 42100, or PPHA 42200)
- Statistics Sequence II. Choose one of the following:
  - PPHA 31102 Statistics for Data Analysis II: Regressions
  - PPHA 31302 Advanced Statistics for Data Analysis II
  - Any course in the PhD econometrics sequence (PPHA 42000, PPHA 42100, or PPHA 42200)
- Microeconomics Sequence I. Choose one of the following:
  - PPHA 32300 Principles of Microeconomics and Public Policy I
  - PPHA 32310 Advanced Microeconomics for Public Policy I
  - PPHA 44100 Principles of Microeconomics and Public Policy I (PhD sequence)
- Microeconomics Sequence II. Choose one of the following:
  - PPHA 32400 Principles of Microeconomics and Public Policy II
  - PPHA 32410 Advanced Microeconomics for Public Policy II
  - PPHA 44200 Principles of Microeconomics and Public Policy II (PhD sequence)
- Completion of a minimum of 12 Public Policy (PPHA) courses
- Completion of a practical experience requirement (https://harris.uchicago.edu/academics/design-your-path/practical-experience/) - beginning with the Autumn 2020 incoming cohort of students
- A cumulative grade point average of 2.7 for all courses used toward the MPP degree, based on a 4.0 scale
- Completion of a math requirement
- No more than 2 reading/research, independent study, or internship courses
- No more than 2 courses taken pass/fail
MASTER OF SCIENCE IN COMPUTATIONAL ANALYSIS AND PUBLIC POLICY (MSCAPP)

The Master of Science in Computational Analysis and Public Policy is a two-year program offered with the Computer Science Department for students interested in the design, implementation, and rigorous analysis of data-driven policies.

DEGREE REQUIREMENTS
- Completion of eighteen graduate-level courses (1800 units of credit), not including any courses with grades of F, I, W, or courses with no reported grade
- Completion of the following required courses with a C- or better (No core courses may be taken pass/fail):
  - CAPP 30121 Computer Science with Applications I
  - CAPP 30122 Computer Science with Applications II
  - CAPP 30235 Databases for Public Policy
  - CAPP 30271 Mathematics for Computer Science and Data Analysis
  - CAPP 30524 Machine Learning for Public Policy
  - PPHA 30800 Analytical Politics I: Strategic Foundations or PPHA 41501 Game Theory (with instructor approval)
  - Statistics Sequence I. Choose one of the following:
    - PPHA 31002 Statistics for Data Analysis I
    - PPHA 31202 Advanced Statistics for Data Analysis I
    - Any course in the PhD econometrics sequence (PPHA 42000, PPHA 42100, or PPHA 42200)
  - Statistics Sequence II. Choose one of the following:
    - PPHA 31102 Statistics for Data Analysis II: Regressions
    - PPHA 31302 Advanced Statistics for Data Analysis II
    - Any course in the PhD econometrics sequence (PPHA 42000, PPHA 42100, or PPHA 42200)
  - Microeconomics Sequence I. Choose one of the following:
    - PPHA 32300 Principles of Microeconomics and Public Policy I
    - PPHA 32310 Advanced Microeconomics for Public Policy I
    - PPHA 44100 Principles of Microeconomics and Public Policy I (PhD sequence)
  - Microeconomics Sequence II. Choose one of the following:
    - PPHA 32400 Principles of Microeconomics and Public Policy II
    - PPHA 32410 Advanced Microeconomics for Public Policy II
    - PPHA 44200 Principles of Microeconomics and Public Policy II (PhD sequence)
  - PPHA 34600 Program Evaluation
  - 1 Policy Elective (PPHA prefix)
  - 1 Computer Science elective
- A cumulative grade point average of 2.7 or above for all courses used toward the degree, based on a 4.0 scale
- Completion of a practical experience requirement (https://harris.uchicago.edu/academics/design-your-path/practical-experience/)
- Completion of a Math Requirement
- No more than 2 reading/research, independent study, or internship courses
- No more than 2 courses taken pass/fail.

MASTER OF ARTS IN INTERNATIONAL DEVELOPMENT AND POLICY (MAIDP)

Please note, the MAIDP program is not currently open not accepting applications.

A one-year degree program that provides an introduction to policy design and analysis with particular emphasis on international development and policy.

DEGREE REQUIREMENTS
- Completion of nine graduate-level courses (900 units of credit), not including any courses with grades of F, I, or W, or courses with no reported grade
Completion of the following four core courses with a C- or better:

- PPHA 57000: Microeconomics for International Development
- PPHA 57100: Data Analysis for International Development
- PPHA 57200: Analytical Politics for International Development
- PPHA 57300: Economic Development & Policy

Completion of a minimum of 7 Public Policy (PPHA) courses

A cumulative grade point average of 2.7 for all courses used toward the degree, based on a 4.0 scale.

No more than one reading/research, independent study, or internship courses

No more than one course taken pass/fail (core courses cannot be taken pass/fail)

**MASTER OF ARTS EVENING PROGRAM**

The Evening Master of Arts in Public Policy program is a four quarter program that is intended for working mid-career professionals. Courses are offered during the autumn, winter, and spring 11-week quarters primarily in the evenings but with 1 weekend session per quarter. This allows students the opportunity to maintain a full-time work schedule and earn their degree over approximately 1 year and 3 months.

The course curriculum consists of eight 100-unit courses and four 25-unit short courses on current topics in public policy. Students will gain a foundation in data analytics, economic analysis, leadership, and the strategic foundations of public policy.

**DEGREE REQUIREMENTS**

- Completion of nine graduate-level courses (900 units of credit), not including any courses with grades of F, I, W, or courses with no reported grade
- Completion of the following courses with a C- or better:
  - Data Analytics I: Quantitative Analysis
  - Data Analytics I: Introduction to Program Evaluation
  - Economic Analysis I: Microeconomics
  - Economic Analysis II: Introduction to Cost Benefit Analysis
  - Economic Analysis II: Public Finance and Budgeting
  - Analytical Politics I: Foundations
  - Analytical Politics II: Politics and Policy Making
  - Current Topics in Public Policy I-IV
- A cumulative grade point average of 2.7 for all courses used toward the degree, based on a 4.0 scale

**MASTER OF ARTS WITH A CERTIFICATE IN RESEARCH METHODS (MACRM)**

The Master of Arts with certificate in Research Methods is 15-month program designed to prepare students for top-tier Ph.D. programs in economics and political science as well as other social sciences, policy, and business.

**DEGREE REQUIREMENTS**

- Successful completion of 12 graduate-level courses (1200 units of credit) to earn the degree, not including any courses with grades of F, I, W, or courses with no reported grade
- Completion of the following core courses with a C- or better (no core courses may be taken pass/fail):
  - PPHA 41501 Game Theory
  - PPHA 42000 Applied Econometrics I
• PPHA 42100 Applied Econometrics II
• PPHA 42200 Applied Econometrics III
• PPHA 44100 Advanced Microeconomics for Policy Analysis I
• PPHA 44200 Advanced Microeconomics for Policy Analysis II
• PPHA 52500 MACRM Apprenticeship (2 quarters, 200 units of credit total. Register for first course in spring of first year and second in autumn of second year.)
• Completion of a minimum of 7 Public Policy (PPHA) courses
• Completion of the Mathematical Methods for PhD and MACRM program prior to orientation
• Completion of a practical experience requirement (https://harris.uchicago.edu/academics/design-your-path/practical-experience/) - beginning with the Autumn 2020 incoming cohort of students
• A cumulative grade point average of 2.7 for all courses used toward the degree, based on a 4.0 scale
• No more than 1 course taken pass/fail
• No more than one (1) reading/research or internship course in addition to the apprenticeship courses.

DUAL DEGREE PROGRAMS

THE CENTER FOR MIDDLE EASTERN STUDIES - MPP/AM

Chicago Harris and the Center for Middle Eastern Studies at the University of Chicago offer students an opportunity to earn both a M.P.P. and an A.M. degree. Upon completion, students graduate with both a Master of Public Policy from Chicago Harris and a Master of Arts in Middle Eastern Studies from the University of Chicago. This joint degree program addresses the needs of students wishing to acquire a solid background in modern Middle Eastern languages, history, and civilization while developing their abilities in policy analysis in preparation for professional careers in scholarly, educational, governmental, non-governmental, and business environments in the United States and abroad.

Students in this program take 13 courses, instead of the usual 18, with Chicago Harris. Students also take 14 courses with Middle Eastern Studies.

PROGRAM REQUIREMENTS

• Successful completion of 27 graduate-level courses (2700 units of credit) to earn both degrees
• For the AM in Middle Eastern Studies degree, successful completion of 14 graduate-level courses (1400 units of credit) not including any courses with grades of F, I, W, or courses with no reported grade.
• For the MPP degree, successful completion of 13 graduate-level courses (1300 units of credit) not including any courses with grades of F, I, W, or courses with no reported grade.
• Completion of the following seven core courses with a C- or better:
  • PPHA 30800 Analytical Politics I: Strategic Foundations or PPHA 41501 Game Theory (with instructor approval)
  • PPHA 31610 Analytical Politics II: Political Institutions or PPHA 40102 Political Economy I: Formal Models of Domestic Politics (with instructor approval)
  • Statistics Sequence I. Choose one of the following:
    • PPHA 31002 Statistics for Data Analysis I
    • PPHA 31200 Mathematical Statistics for Public Policy I
    • Any course in the PhD econometrics sequence PPHA 42000, PPHA 42100, or PPHA 42200
  • Statistics Sequence II. Choose one of the following:
    • PPHA 31102 Statistics for Data Analysis II: Regressions
    • PPHA 31300 Mathematical Statistics for Public Policy II
    • Any course in the PhD econometrics sequence PPHA 42000, PPHA 42100, or PPHA 42200
  • Microeconomics Sequence I. Choose one of the following:
    • PPHA 32300 Principles of Microeconomics and Public Policy I
    • PPHA 32310 Advanced Microeconomics for Public Policy I
    • PPHA 44100 Principles of Microeconomics and Public Policy I (PhD sequence)
  • Microeconomics Sequence II. Choose one of the following:
    • PPHA 32400 Principles of Microeconomics and Public Policy II
    • PPHA 32410 Advanced Microeconomics for Public Policy II
    • PPHA 44200 Principles of Microeconomics and Public Policy II (PhD sequence)
• Completion of a minimum of 10 Public Policy (PPHA) courses.
• A cumulative grade point average of 2.7 for all courses used toward the M.P.P. degree, based on a 4.0 scale
• Completion of a math requirement
The Curriculum

- Completion of a practical experience requirement (https://harris.uchicago.edu/academics/design-your-path/practical-experience/) - beginning with the Autumn 2020 incoming cohort of students
- No more than 2 reading/research courses/independent study/internship
- No more than 1 course taken pass/fail

Students who wish to participate in this program must be admitted to both Harris and the Center for Middle Eastern Studies. A student who is already enrolled in one of the programs may apply during their first year for admission to the other school.

**THE DIVINITY SCHOOL - MPP/M.Div**

Chicago Harris and the Divinity School (http://www2.uchicago.edu/divinity/) offer a combined degree program that enables students to graduate with both a Master of Public Policy and a Master of Divinity.

The program provides an opportunity for students to combine their interest in examining pertinent issues related to the church as a public institution with their interest in public and urban ministry. The program allows students to complete both degrees within a total of four academic years; both degrees must be awarded in the same quarter. Students who wish to participate in this program must be admitted to both Harris and the Divinity School. Students already admitted to one of the Schools may apply during their first year for admission to the other.

**PROGRAM REQUIREMENTS**

- Successful completion of 36 graduate-level courses (3600 units of credit) to earn both degrees, not including any courses with grades of F, I, W, or courses with no reported grade
- For the MDiv degree, successful completion of 22 graduate-level courses (instead of the usual 27)
- For the MPP degree, successful completion of 14 graduate-level courses (instead of the usual 18)
- Completion of the following seven core courses with a C- or better:
  - PPHA 30800 Analytical Politics I: Strategic Foundations
  - PPHA 31610 Analytical Politics II: Political Institutions
  - Statistics Sequence I. Choose one of the following:
    - PPHA 31002 Statistics for Data Analysis I
    - PPHA 31200 Mathematical Statistics for Public Policy I
    - Any course in the PhD econometrics sequence PPHA 42000, PPHA 42100, or PPHA 42200
  - Statistics Sequence II. Choose one of the following:
    - PPHA 31102 Statistics for Data Analysis II: Regressions
    - PPHA 31300 Mathematical Statistics for Public Policy II
    - Any course in the PhD econometrics sequence PPHA 42000, PPHA 42100, or PPHA 42200
  - Microeconomics Sequence I. Choose one of the following:
    - PPHA 32300 Principles of Microeconomics and Public Policy I
    - PPHA 32310 Advanced Microeconomics for Public Policy I
    - PPHA 44100 Principles of Microeconomics and Public Policy I (PhD sequence)
  - Microeconomics Sequence II. Choose one of the following:
    - PPHA 32400 Principles of Microeconomics and Public Policy II
    - PPHA 32410 Advanced Microeconomics for Public Policy II
    - PPHA 44200 Principles of Microeconomics and Public Policy II (PhD sequence)
- Completion of a minimum of 10 Public Policy (PPHA) courses
- A cumulative grade point average of 2.7 for all courses used toward the MPP degree, based on a 4.0 scale
- Completion of a math requirement
- Completion of a practical experience requirement (https://harris.uchicago.edu/academics/design-your-path/practical-experience/) - beginning with the Autumn 2020 incoming cohort of students
- No more than 2 reading/research, independent study, or internship courses
- No more than 1 courses taken pass/fail

**THE UNIVERSITY OF CHICAGO BOOTH SCHOOL OF BUSINESS - MPP/MBA**

Chicago Harris and Chicago Booth School of Business at the University of Chicago offer a combined degree program leading to the MPP and MBA degrees. Upon completion, students graduate with both a Master of Public Policy from Chicago Harris and a Master of Business Administration from the Graduate School of Business. The joint degree program allows students who are interested in policy issues and business administration to have an integrated and comprehensive course of study. Students already admitted to one of the schools may apply during their first year for admission to the other.
Students in this program take 13 courses, instead of the usual 18, with Harris. Students also take 14 courses (instead of the usual 20) with the Booth, thus earning both degrees in a total of three years. Both degrees must be awarded in the same quarter.

PROGRAM REQUIREMENTS

- Successful completion of 27 graduate-level courses (2700 units of credit) to earn both degrees, not including any courses with grades of F, I, W, or courses with no reported grade
- For the M.B.A. degree, successful completion of 14 graduate-level courses (1400 credits)
- For the M.P.P. degree, successful completion of 13 graduate-level courses (1300 credits)
- Completion of the following seven core courses with a C- or better (no core course can be taken pass/fail):
  - PPHA 30800 Analytical Politics I: Strategic Foundations or PPHA 41501 Game Theory (with instructor approval)
  - PPHA 31610 Analytical Politics II: Political Institutions or PPHA 40102 Political Economy I: Formal Models of Domestic Politics (with instructor approval)
- Statistics Sequence I. Choose one of the following:
  - PPHA 31002 Statistics for Data Analysis I
  - PPHA 31200 Mathematical Statistics for Public Policy I
  - Any course in the PhD econometrics sequence PPHA 42000, PPHA 42100, or PPHA 42200
- Statistics Sequence II. Choose one of the following:
  - PPHA 31102 Statistics for Data Analysis II: Regressions
  - PPHA 31300 Mathematical Statistics for Public Policy II
  - Any course in the PhD econometrics sequence PPHA 42000, PPHA 42100, or PPHA 42200
- Microeconomics Sequence I. Choose one of the following:
  - PPHA 32300 Principles of Microeconomics and Public Policy I
  - PPHA 32310 Advanced Microeconomics for Public Policy I
  - PPHA 44100 Principles of Microeconomics and Public Policy I (PhD sequence)
- Microeconomics Sequence II. Choose one of the following:
  - PPHA 32400 Principles of Microeconomics and Public Policy II
  - PPHA 32410 Advanced Microeconomics for Public Policy II
  - PPHA 44200 Principles of Microeconomics and Public Policy II (PhD sequence)
- Completion of a minimum of 10 Public Policy (PPHA) courses
- A cumulative grade point average of 2.7 for all courses used toward the MPP degree, based on a 4.0 scale
- Completion of a math requirement
- Completion of a practical experience requirement (https://harris.uchicago.edu/academics/design-your-path/practical-experience/) - beginning with the Autumn 2020 incoming cohort of students
- No more than 2 reading/research, independent study, or internship courses
- No more than 1 courses taken pass/fail

THE LAW SCHOOL - MPP/JD

Chicago Harris and the Law School at the University of Chicago offer students an opportunity to obtain both a M.P.P. and a J.D. degree. Upon completion, students graduate with both a Master of Public Policy from Chicago Harris and a Doctor of Law from the Law School.

The dual degree program allows students who are interested in the application of the law to public policy issues to have a comprehensive course of study. All 14 courses required for the MPP are taken during the four quarters of registration at Harris. Students may apply one academic quarter of up to four 100 unit courses taken within Harris toward the hours required to obtain their law degree. This enables students to earn both degrees in four years. Both degrees must be awarded in the same quarter.

Students who wish to participate in this program must complete the separate admission processes to both Harris and the Law School. Students already admitted to Harris may apply during their first year to the Law School; those admitted to the Law School may apply during their first or second year to Harris.

PROGRAM REQUIREMENTS

- For the MPP degree, successful completion of 14 graduate-level courses (1400 units of credit) not including any courses with grades of F, I, W, or courses with no reported grade.
- Completion of the following seven core courses with a C- or better:
  - PPHA 30800 Analytical Politics I: Strategic Foundations or PPHA 41501 Game Theory (with instructor approval)
• PPHA 31610 Analytical Politics II: Political Institutions or PPHA 40102 Political Economy I: Formal Models of Domestic Politics (with instructor approval)
• Statistics Sequence I. Choose one of the following:
  • PPHA 31002 Statistics for Data Analysis I
  • PPHA 31200 Mathematical Statistics for Public Policy I
  • Any course in the PhD econometrics sequence PPHA 42000, PPHA 42100, or PPHA 42200
Statistics Sequence II. Choose one of the following:
  • PPHA 31102 Statistics for Data Analysis II: Regressions
  • PPHA 31300 Mathematical Statistics for Public Policy II
  • Any course in the PhD econometrics sequence PPHA 42000, PPHA 42100, or PPHA 42200
Microeconomics Sequence I. Choose one of the following:
  • PPHA 32300 Principles of Microeconomics and Public Policy I
  • PPHA 32310 Advanced Microeconomics for Public Policy I
  • PPHA 44100 Principles of Microeconomics and Public Policy I (PhD sequence)
• Microeconomics Sequence II. Choose one of the following:
  • PPHA 32400 Principles of Microeconomics and Public Policy II
  • PPHA 32410 Advanced Microeconomics for Public Policy II
  • PPHA 44200 Principles of Microeconomics and Public Policy II (PhD sequence)
  • PPHA 32300, 32310 or 44100 Principles of Microeconomics and Public Policy I
  • PPHA 32400, 32410 or 44200 Principles of Microeconomics and Public Policy II
• Completion of a minimum of 10 Public Policy (PPHA) courses.
• A cumulative grade point average of 2.7 for all courses used toward the M.P.P. degree, based on a 4.0 scale
• Completion of a math requirement
• Completion of a practical experience requirement (https://harris.uchicago.edu/academics/design-your-path/practical-experience/) - beginning with the Autumn 2020 incoming cohort of students
• No more than 2 reading/research courses/independent study/internship
• No more than 1 course taken pass/fail

THE SCHOOL OF SOCIAL SERVICE ADMINISTRATION - MPP/AM WITH SSA

Harris and the School of Social Service Administration offer a combined degree program leading to the MPP and AM degrees. Upon completion, students graduate with both a Master of Public Policy from Chicago Harris and a Master of Arts from the School of Social Service Administration.

The joint degree program is intended for students who are interested in social welfare policy, and social policy more broadly, and students who want to be social workers involved in the public policy issues that influence their profession. Students who wish to participate in this program must be admitted to both Harris and the School of Social Service Administration. A student who is already enrolled in one of the Schools may apply during their first year for admission to the other school.

PROGRAM REQUIREMENTS
• Successful completion of 27 graduate-level courses (2700 units of credit) to earn both degrees, not including any courses with grades of F, I, W, or courses with no reported grade
• For the MA in SSA degree, successful completion of 13 graduate-level courses (1400 units of credit)
• For the MPP degree, successful completion of 14 graduate-level courses (1300 units of credit)
• Completion of the following seven core courses with a C- or better (no core courses can be taken pass/fail):
  • PPHA 30800 Analytical Politics I: Strategic Foundations or PPHA 41501 Game Theory (with instructor approval)
  • PPHA 31610 Analytical Politics II: Political Institutions or PPHA 40102 Political Economy I: Formal Models of Domestic Politics (with instructor approval)
• Statistics Sequence I. Choose one of the following:
  • PPHA 31002 Statistics for Data Analysis I
  • PPHA 31200 Mathematical Statistics for Public Policy I
  • Any course in the PhD econometrics sequence PPHA 42000, PPHA 42100, or PPHA 42200
Statistics Sequence II. Choose one of the following:
  • PPHA 31102 Statistics for Data Analysis II: Regressions
  • PPHA 31300 Mathematical Statistics for Public Policy II
  • Any course in the PhD econometrics sequence PPHA 42000, PPHA 42100, or PPHA 42200
Microeconomics Sequence I. Choose one of the following:
• PPHA 32300 Principles of Microeconomics and Public Policy I
• PPHA 32310 Advanced Microeconomics for Public Policy I
• PPHA 44100 Principles of Microeconomics and Public Policy I (PhD sequence)

• Microeconomics Sequence II. Choose one of the following:
  • PPHA 32400 Principles of Microeconomics and Public Policy II
  • PPHA 32410 Advanced Microeconomics for Public Policy II
  • PPHA 44200 Principles of Microeconomics and Public Policy II (PhD sequence)

• PPHA 32300, 32310 or 44100 Principles of Microeconomics and Public Policy I
• PPHA 32400, 32410 or 44200 Principles of Microeconomics and Public Policy II

• Completion of a minimum of 10 Public Policy (PPHA) courses
• A cumulative grade point average of 2.7 for all courses used toward the MPP degree, based on a 4.0 scale
• Completion of a math requirement
• Completion of a practical experience requirement (https://harris.uchicago.edu/academics/design-your-path/practical-experience/) - beginning with the Autumn 2020 incoming cohort of students
• No more than 2 reading/research, independent study, or internship courses
• No more than 1 courses taken pass/fail

COOPERATIVE MASTERS PROGRAMS

DUAL A.M./M.A. WITH THE COMMITTEE ON INTERNATIONAL RELATIONS

The Harris School of Public Policy and the Committee on International Relations (CIR) offer a two-year program leading to two master of arts degrees: in public policy and international relations. This program is designed for students who want to combine training in public policy analytical tools with a substantive emphasis on international affairs.

PROGRAM REQUIREMENTS
• For the MA in International Relations: successful completion of 9 courses (900 units of credit), approved by their CIR advisors and preceptors, which serve to build the foundation for the required M.A. thesis.
• For the MA in Policy: See regular MA degree requirements

LONDON SCHOOL OF ECONOMICS (LSE)-UCHICAGO DOUBLE EXECUTIVE MASTERS PROGRAM IN HEALTH POLICY – MA/MSc

Please note, the LSE-UChicago Double Executive Masters Program is not currently open not accepting applications.

Chicago Harris and the London School of Economics and Political Science (LSE) offer a degree program leading to a Master of Arts in Public Policy from Chicago Harris and a Master of Science in Health Economics and Policy from LSE.

Designed for working executives, the double masters program is taught evenly between Chicago and London in compressed, executive-style teaching modules. The two-year program consists of four two-to-three-week modules completed in person and two summer practicums completed remotely.

In each year of the two-year program, participants spend two to three weeks in London in the fall and two to three weeks in Chicago in the spring, working through an intensive curriculum that covers foundations in global health policy and health care economics, including health care finance, measuring health system performance, pharmaceutical economics, health policy analysis, and negotiation and advocacy in health policy, among other topics.

The first year of the program culminates in a health policy project, and the second year concludes with a written dissertation. Both degrees are awarded in the autumn after completion of the second year.

Select courses offered by LSE will be counted toward the Harris degree requirements and vice versa. Learn more at lse.uchicago.edu.

PROGRAM REQUIREMENTS

Successful completion of 14 graduate-level courses to earn both degrees. 7 of these courses are administered by UChicago and 7 are administered by LSE.

• 9 of these courses will count toward the MA in Public Policy degree
• 9 of these courses will count toward the MSc in Health Economics and Policy degree

Completion of the following courses, organized by module:
The Curriculum

Autumn I at London School of Economics
• PPHA 58501/HP4E1E Global Health Policy
• PPHA 58601/HP4E2E Paying for Health Care
• PPHA 58701/HP4E3E Evidence Review and Synthesis

Spring I at Chicago Harris
• PPHA 58500 Microeconomics for Health Policy
• PPHA 58600 Statistics for Health Policy
• PPHA 58700 Leadership, Negotiation, and Advocacy in Health Policy: Strategies and Tactics

Summer I – administered by Chicago Harris, completed remotely
• PPHA 58800 The Fix: Health Policy Project

Autumn II at London School of Economics
• PPHA 59501/HP4E4E Cost-effectiveness in Health Care
• PPHA 59601/HP4E5E Economics of the Pharmaceutical Sector
• PPHA 59701/HP4E6E Measuring the Performance of Health Services and Systems

Spring II at Chicago Harris
• PPHA 59500 Analytical Politics: The Policymaking Process
• PPHA 59600 Health Policy Research Methods
• PPHA 59700 Microeconomics for Health Policy II

Summer II – administered by London School of Economics, completed remotely
• PPHA 59801/HP4E7E Dissertation in Health Economics and Policy

PH.D. PROGRAM

The doctoral program (PhD) at Chicago Harris prepares qualified students interested in research-oriented careers involving the substantive and institutional aspects of public policy. The program emphasizes the acquisition of skills needed to design and conduct policy-relevant research, and allows students to develop individualized and innovative courses of study in which they work closely with faculty members of the School and the University.

Director, PhD Program
Scott Ashworth (http://harrisschool.uchicago.edu/directory/faculty/scott_ashworth/), professor
PhD Program Coordinator and PhD Student Academic Advisor
Cynthia Cook-Conley (clcook@uchicago.edu)

COURSE WORK

Ph.D. students should expect to complete their program of study after a minimum of four to five years in residence. Ph.D. students must complete a minimum of 27 courses, including demonstrated mastery of the School’s core subjects, unless they enter the program with a master’s degree in the same or a related field, in which case the number of required courses may be reduced by up to 9 courses. While earning their Ph.D., if doctoral students meet the requirements of the A.M. or M.P.H., they may petition to earn that degree.

Ph.D. students must complete a minimum of 8 courses in the first year and 6 courses in the second year, all for quality grades (Individual areas of focus (AOFs) might require more than these minimums. All core courses must be completed with an average B+ (3.3) grade point average (GPA). The core courses consist of two courses in microeconomics, three courses in econometrics, and one course in game theory.

Following completion of their coursework and examinations, Ph.D. students will be able to take advantage of opportunities to obtain financial support for their doctoral research from internal and external sources and to participate in research projects in the School and the University. Students receiving internal financial support will also serve as course assistants beyond their first year of study.

ADDITIONAL REQUIREMENTS

Beyond the successful completion of required course work, Ph.D. students must fulfill the following requirements:

Qualifying Examinations
Ph.D. students are required to pass a qualifying exam in a specialized field as specified by the AOF. The exam can take the form of passing two or three courses with adequate grades rather than a separate exam.

Qualifying Paper
A qualifying paper must be completed by the end of the second year of study. During their third year of study, Ph.D. students make the transition from coursework to dissertation research. An acceptable qualifying paper will show evidence that the student is developing the capacity for formulating and conducting an independent research project and for creating a scholarly argument. Ideally, the qualifying paper will constitute a step toward completion of a dissertation proposal.
**Dissertation Proposal**
Following completion of the qualifying paper, students will write and defend a dissertation proposal before the student's dissertation committee and other interested University faculty and doctoral students. The proposal hearing will ordinarily be held by the Autumn Quarter of the fourth year of study, after which the student is admitted to candidacy for the Ph.D. The hearing must precede the defense of the dissertation itself by at least 8 months.

**Dissertation Defense**
The dissertation should be a significant public policy research project carried out under the supervision of the student's dissertation committee, composed of at least three qualified members approved by the director of doctoral studies. The dissertation defense is a public meeting of faculty and students directed by the chair of the dissertation committee. The dissertation is expected to constitute an original contribution to public policy knowledge and to demonstrate mastery of relevant theories and research methods.

Required courses:
- PPHA 41501 Game Theory
- PPHA 42000 Applied Econometrics I
- PPHA 42100 Applied Econometrics II
- PPHA 42200 Applied Econometrics III
- PPHA 44100 Principles of Microeconomics for Public Policy I
- PPHA 44200 Advanced Microeconomics for Policy Analysis

---

**CERTIFICATES**

**CERTIFICATE IN DATA ANALYTICS**

**Faculty Director:** Peter Ganong

**Program Description:** In recent years, the movement toward open data has made data sets available that have enormous potential value for policymakers, governments, and think tanks. But the ability to sift through all that data and analyze it in a way that is useful for organizations has lagged behind, leading to new staff roles for data analytics.

With the Certificate in Data Analytics, students will acquire sought-after skills in programming, manipulating data sets, and creating insightful visualizations. Students will also learn to harness the power of machine learning to optimize their analysis. Hands-on experience is key to the curriculum, and students will have the opportunity to work with real data sets to tackle important and current public policy questions.

**Certificate Requirements**
The Certificate in Data Analytics for Public Policy will be awarded to students who complete the following.

**Required Courses**
Students must complete the following two-course sequence:
- PPHA 30535 Data and Programming for Public Policy I
- PPHA 30536 Data and Programming for Public Policy II

Students must complete one of the following courses:
- PPHA 30545 Machine Learning
- BUSN 41204 Machine Learning
- CMSC 35300 Mathematical Foundations of Machine Learning
- MACS 33002 Introduction to Machine Learning

**Elective Courses**
Students must complete one of the following courses to fulfill the four-course requirement:
- PPHA 30560 Data Visualization (tentative for 2021-2022)
- PPHA 30581 Civic Data and Technology Clinic
- PPHA 34600 Program Evaluation
- PPHA 38829 Artificial Intelligence for Public Policy
- PPHA 41400 Applied Regression Analysis
- PPHA 42000 Applied Econometrics I
- PPHA 42100 Applied Econometrics II
- PPHA 60000 Policy Labs
The Curriculum

- BUSN 37304 Digital and Algorithmic Marketing
- BUSN 41100 Applied Regression Analysis

The certificate requires completion of three required courses, along with one additional course (four courses total). Students must achieve at least a B- grade in each course with the exception of the last term prior to graduation. No certificate course may be taken on a no pass/fail grading basis. Students should complete the formal signup process to indicate their intention to pursue the certificate.

Certificate in Energy and Environmental Policy

Faculty Director: Ryan Kellogg

Program Description: Providing society with affordable and reliable energy, while limiting its negative social and environmental impacts, is one of the great global challenges of the 21st century. The Harris Energy and Environmental Policy Certificate is designed to provide students with the background, concepts, and tools necessary to understand and address pressing energy and environmental policy problems.

Certificate Requirements

The certificate requires completion of at least two courses from the “Required courses” list, along with two additional courses that come from either the “Required courses” list or the “Elective courses” list (four courses total). Students must achieve at least a B- grade in each course with the exception of the last term prior to graduation. No certificate course may be taken on a pass/fail grading basis, with the exception of PPHA 39519: Energy Law and Policy. The courses do not need to be taken in a particular order. Students should complete the formal signup process to indicate their intention to pursue the certificate.

Required Courses

Students must complete two of the following courses:

- PPHA 30810: Political Economy of Natural Resources
- PPHA 36930: Environmental Economics: Theory and Applications
- PPHA 38900: Environmental Science and Policy
- PPHA 39925: Energy Policy and Human Behavior
- PPHA 39930: International Climate Policy
- PPHA 41210: Physics and Technology for Future Policy Wonks

Elective Courses

In addition to courses from the core list above, students must complete enough of the below courses in order to complete four total courses in the certificate:

- PPHA 32750: Hydropolitics: Water Policy and Conflict
- PPHA 33510: Nuclear Policy
- PPHA 34600: Program Evaluation (Energy and Environment Applications)
- PPHA 36921: Energy Economics and Policy
- PPHA 36922: Energy in the Developing World
- PPHA 39519: Energy Law and Policy
- PPHA 51700: Energy Policy Practicum
- PPHA 60000: Policy Labs (Energy and Environment Policy Lab)
- ENSC 24400 / BIOS 20196: Ecology and Conservation
- GEOS 24705 / ENSC 21100: Energy: Science, Technology, and Human Usage
- GEOS 24750 / ENSC 21150: Humans in the Earth System
- GEOS 13300 / ENSC 13300: The Atmosphere

Certificate in Finance and Policy

Faculty Director: Tom Coleman

Center Name: Center for Economic Policy

Program Description: The Certificate in Economic Policy and Markets offered by the Center for Economic Policy integrates the study of financial markets with public policy and regulation. The certificate curriculum provides students with required and elective courses focused on Economic Policy, Financial Markets, and Regulation. The Center for Economic Policy also undertakes targeted research programs relevant to finance and public policy in the University of Chicago tradition that ties education closely with rigorous and disciplined research. The Center aims to train certificate holders for positions at government agencies and private institutions that operate at the intersection of economic policy-making and financial markets, positions that require a combination of strong economic training, technical skills, and an understanding of financial markets. The
Economic Policy Certificate currently offers two course sequences that provide students with training in particular domains of expertise.

CERTIFICATE REQUIREMENTS

The certificate requires completion of two required courses, along with one additional elective course. Students must achieve at least a B- grade in each course with the exception of the last term prior to graduation. No certificate course may be taken on a no pass/fail grading basis. Students should complete the formal signup process to indicate their intention to pursue the certificate.

REQUIRED COURSES

Students must complete one of the following courses to fulfill the requirement:

- PPHA 42510 Applied Financial Management
- PPHA 36101 Financial Investments for Public Policy
- BUSN 35001 Introductory Finance
- BUSN 35000 Investments

Students must complete one of the following courses to fulfill the requirement:

- PPHA 34410 Corporate Finance
- BUSN 35200 Corporate Finance
- BUSN 35001 Introductory Finance

ELECTIVE COURSES

Students must complete one of the following courses to fulfill the requirement:

- PPHA 34241 Household Finance: Theory and Applications
- PPHA 34500 Macroeconomics for Public Policy or BUS 33040 Macroeconomics
- PPHA 35310 International Trade, Banking and Capital Markets
- PPHA 36150 Environmental, Social, Corporate Governance, and Impact Investing
- PPHA 39404 Practicum on Inequality, Household Finance, and Tax Policy
- PPHA 39530 Macroeconomic Policymaking
- PPHA 42521 History of Financial Crises
- PPHA 42535 Bank Regulation and Management
- PPHA 42540 Fiscal and Monetary Policy in the 21st Century
- FINM 32600 Computing for Finance in C++
- BUSN 30131 Advanced Financial Analysis and Valuation of Global Firms
- BUSN 33502 International Financial Policy
- BUSN 35210 International Corporate Finance
- A finance-oriented Harris Policy Labs PPHA 60000 project (with the approval of the Certificate Director)

RECOMMENDED CO-CURRICULAR ACTIVITY

During their second year, students should attend two events (out of six) from the “Harris Speakers on Economic Policy and Markets” or “History of Chicago Economics” speaker series.

THE PEARSON INSTITUTE CERTIFICATE IN GLOBAL CONFLICT STUDIES

Faculty Director: Oeindrila Dube, Alex Carr (Administrative Director)

Program Description: While past generations witnessed world wars, current generations have grappled with the phenomena of violent extremism, large-scale displacement, and failed nations. In a world where global conflict has evolved from involving not only superpowers but also state, sub-state and non-state groups, future leaders must also evolve their empirical approach to understanding conflict.

By enrolling in the Certificate in the Study of Global Conflicts, offered through the Harris School of Public Policy in conjunction with The Pearson Institute for the Study and Resolution of Global Conflicts, students will engage in analysis that moves beyond the headlines toward a deeper understanding of how data-driven solutions can be applied toward ever-evolving issues that global conflicts present.

By focusing on comparative development, political economy, and applied methodology, this interdisciplinary course of study will prepare graduate students of diverse interests for careers in government, NGOs, international organizations, or multi-national corporations.

CERTIFICATE REQUIREMENTS:

The certificate will be awarded to students who complete any three of the qualifying courses. Students must achieve at least a B- grade in each course with the exception of the last term prior to graduation, and there is no
pass/fail option. Students should complete the formal signup process to indicate their intention to pursue the certificate.

**Required courses**

The following two courses are recommended as a fundamental sequence of the certificate:

- PPHA 35560: Conflict and Humanitarian Intervention: Blurring Humanitarian, Development, and Security Policy
- PPHA 38740: Conflict: Root Causes, Consequences, and Solutions for the Future

**Other Qualifying Certificate Courses**

- PPHA 32740 Order and Violence (not offered in 2020-2021)
- PPHA 32750 Hydropolitics: Water Policy and Conflict
- PPHA 33510 Nuclear Policy
- PPHA 37105 / PLSC 48700 Crime, Conflict, and the State
- PPHA 38790 Introduction to Peacebuilding
- PPHA 39830 / PLSC 48401 Quantitative Security
- PPHA 44550 Weak States and International Relations
- PPHA 60000 Global Conflict and International Development Policy Lab
- SSAD 47812 Human Rights Policy and Practice
- LAWS 43262 / PPHA 38752 International Human Rights
- SSAD 46922 Structuring Refuge: U.S. Refugee Policy and Resettlement Practice

**Application Process**

The certificate is open to any University of Chicago graduate student. If you are a non-Harris student and intend to complete the requirements for the certificate please submit the Harris Certificate Application for Non-Harris Students (https://uchicagoharris.wufoo.com/forms/zas37xd039saly/) to indicate you are pursuing this certificate.

**Certificate in Health Policy**

**Faculty Director:** David Meltzer, Ellen Cohen (Administrative Director)

**Program Description:** Health Policy currently ranks high, and sometimes highest, among public policy issues and reform agendas both in the US and internationally. Indeed, most countries around the world are leading multiple health system reform cycles but most still struggle to mitigate health policy issues like healthcare financing, provider payment, aging and the prevention and management of chronic diseases. During the recent economic crisis, the only major sector of the U.S. economy that exhibited continuing growth was health care.

**Certificate Requirements**

The certificate requires completion of three certificate courses. No certificate course may be taken on a pass/fail basis. Students should complete the formal signup process to indicate their intention to pursue the certificate.

**Required Courses**

Students must complete one of the following courses to fulfill the requirement:

- PPHA 37720 / PBHS 35500 U.S. Health Policy and Politics. (Only open to GPHAP students. Typically offered in Spring.)
- PPHA 38300 Health Economics

**Elective Courses**

Students must complete two of the following courses to fulfill the requirement:

- PPHA 37710 Medicaid: Understanding the Public Policy of a Federal-State Partnership
- PPHA 37302 / SSAD 46622 Key Issues in Health Care: An Interdisciplinary Case Studies Approach (Only open to GPHAP students.)
- PPHA 37820 Health Care Markets and Regulation
- PPHA 3829 / PBHS 38010 Introduction to Health Economics
- PPHA 39510 Food and Drug Law and Policy (cross-listed with Law)
- BUSN 40205 Healthcare Data Analytics
- HMRT 31400 Health and Human Rights
- PBHS 30910 Epidemiology and Population Health
• PBHS 31450 Social Inequalities in Health: Race & Ethnicity
• PBHS 38400 Advanced Topics in Health Economics (Offered every other year)
• SSAD 46622 / PPHA 37302 Key Issues in Health Care: An Interdisciplinary Case Studies Approach (Only open to GPHAP students. Typically offered in Spring.)
• SSAD 62912 Global Development and Social Welfare
• SSAD 63300 International Perspectives on Social Policy & Practice

APPLICATION PROCESS

The certificate is open to any University of Chicago graduate student. If you are a non-Harris student and intend to complete the requirements for the certificate please submit the Harris Certificate Application for Non-Harris Students (https://uchicagoharris.wufoo.com/forms/zas37xd039saly/) to indicate you are pursuing this certificate.

THE PEARSON INSTITUTE CERTIFICATE IN INTERNATIONAL POLICY AND DEVELOPMENT

Faculty Director(s): Christopher Blattman, Rebecca Wolfe

Program Description: In many ways, our world is becoming increasingly interconnected. At the same time, many in the global North as well as the global South have come to question traditional relationships and dynamics of power. In this context, it is crucial for students across disciplines to develop not only a robust understanding of these changing international structures, but also the tools with which to evaluate these issues.

By enrolling in the Certificate in the Study of International Development, offered through The Harris School of Public Policy in conjunction with The Pearson Institute for the Study and Resolution of Global Conflicts, students will learn to seek data-driven solutions to development issues across multiple sectors including but not limited to economy, education, energy, security, and the environment.

By focusing on comparative development, political economy, and applied methodology, this interdisciplinary course of study will prepare graduate students of diverse interests for careers in government, NGOs, international organizations, or multi-national corporations.

CERTIFICATE REQUIREMENTS

The certificate requires completion of three certificate courses. Students must achieve at least a B- grade in each course with the exception of the last term prior to graduation. No certificate course may be taken on a pass/fail grading basis. The courses do not need to be taken in a particular order. Students should complete the formal signup process to indicate their intention to pursue the certificate.

The certificate will be awarded to students who complete any three of the qualifying courses; however, the following two courses are recommended as a fundamental sequence of the certificate:

• PPHA 35550 Economic Development and Policy
• PPHA 35556 Political Economics of Developing Countries

The following courses also fulfill the requirement for the International Development and Policy certificate:

• PPHA 30810 The Political Economy of Natural Resources (not offered in 2020-2021)
• PPHA 32736 Economics, Politics and African Societies
• PPHA 35240 Education in Developing Contexts
• PPHA 34600 Program Evaluation (International Development Focus)
• PPHA 35565 Infrastructure and Development
• PPHA 35570 Translating Evidence for Policy and Program Design
• PPHA 35580 Doing Business in Africa (not offered in 2020-2021)
• PPHA 36922 Energy in the Developing World
• PPHA 39750 Politics and Public Policy in Latin America
• PPHA 39930 International Climate Policy
• PPHA 47400 Women, Development and Politics
• PPHA 60000 International Development Policy Lab
• LAWS 43232/ PPHA 42820 Law and Economic Development
• SSAD 62912 / PPHA 32760 Global Development and Social Welfare
• SSAD 63301/63302 International Perspectives on Social Policy and Social Work Practice
• SSAD 63800 Program Evaluation in International Settings

APPLICATION PROCESS

The certificate is open to any University of Chicago graduate student. If you are a non-Harris student and intend to complete the requirements for the certificate please submit the Harris Certificate Application for Non-
Harris Students (https://uchicagoharris.wufoo.com/forms/zas37xd039saly/) to indicate you are pursuing this certificate.

**Certificate in Markets and Regulation**

**Faculty Director(s):** Kathryn Ierulli  
**Center Name:** Center for Economic Policy

**Program Description:** The Markets and Regulation Certificate educates students in the structures and characteristics of regulated markets by analyzing the outcomes of markets for consumers and producers, evaluating how government policies alter post-regulation market outcomes, and considering costs and benefits of economic regulation.

Students who complete this certificate will be able to:

- Analyze market structure and firm behavior, identify resulting problems with markets, and evaluate the consequences of a variety of economic policies
- Evaluate regulatory policy as an economic phenomenon, modeling the goals of consumers, regulators, and firms, with an emphasis on institutional frameworks and career incentives of regulators and politicians who engage in regulatory processes
- Engage in economic policy work with background in the strengths and weaknesses of different policy alternatives, evaluated both analytically and through case studies

The certificate's broad choices of electives encompass multiple fields and schools at the University, illustrating the many applications of regulation across public policy, law, and business. The electives cover regulation in a variety of contexts, including financial regulation, antitrust policy, intellectual property, environmental regulation, regulation and capitalism, and industrial organization.

**Application Process**

The certificate is open to Harris Public Policy graduate students only.

**Certificate Requirements**

The certificate requires completion of one required course, along with two elective courses. Students must achieve at least a B- grade in each course with the exception of the last term prior to graduation, and there is no pass/fail option. Students should complete the formal signup process to indicate their intention to pursue the certificate.

**Required Courses**

Students must complete the following course:

- PPHA 46350 Economics of Regulation

**Elective Courses**

Students must complete two of the following courses to fulfill the requirement:

- PPHA 32100 State and Local Public Finance
- PPHA 34241 Household Finance: Theory and Applications
- PPHA 35310 International Trade, Banking and Capital Markets
- PPHA 35302 International Trade: Theory, Evidence and Policy
- PPHA 36930 Environmental Economics: Theory and Applications
- PPHA 36941 Strategic Behavior and Regulation of Firms
- PPHA 37110 Competition Policy: Theory and Practice
- PPHA 39404 Practicum on Inequality, Household Finance, and Tax Policy
- PPHA 42521 History of Financial Crises
- PPHA 42535 Banking Regulation and Management
- PPHA 60000 Policy Labs (with permission of the Certificate Director)
- ECON 28620 / BUSN 28620 Crony Capitalism
- BUSN 35123 The FinTech Revolution

**Certificate in Municipal Finance**

**Faculty Director(s):** Paula Worthington, Chris Berry  
**Center Name:** Center for Municipal Finance

**Program Description:**

The Certificate in Municipal Finance is a one-of-a-kind offering that prepares Harris students for careers in local and state governments, as well as private-sector financial and consulting firms. It is awarded upon completion
of a four-course curriculum that will equip students with the skills to diagnose and manage state and local government financial activities.

This coursework will provide students with a strong background in the process, politics, and economics of public revenue and expenditure decisions; practices and techniques of modern financial administration; and the operation of the municipal securities market. Such policy expertise is essential for raising, spending, and borrowing money to provide basic local government services as well as for tackling many pressing municipal problems that are dependent on resources provided by the budget, such as funding public pensions and health care.

Application Process
The certificate is open to Harris Public Policy graduate students only.

REQUIRED COURSES
The certificate requires completion of two required courses, along with one additional elective course. Students must achieve at least a B- grade in each course with the exception of the last term prior to graduation, and there is no pass/fail option. Students should complete the formal signup process to indicate their intention to pursue the certificate.

Students must complete both of the following courses:

• PPHA 32530 Fundamentals of Municipal Bonds
• PPHA 32100 State and Local Public Finance

ELECTIVE COURSES
Students must complete one of the following courses to fulfill the requirement:

• PPHA 35565 Infrastructure and Development
• PPHA 36101 Financial Investments for Public Policy
• PPHA 36055 Understanding State and Local Government Accounting (tentative for 2020-2021)
• PPHA 38720 Urban Economics and Policy
• PPHA 42510 Applied Financial Management
• PPHA 60000 Harris Policy Lab (selected sections only and with permission of certificate director)
• ECON 26060 Public Sector Economics
• SSAD 49600 Financial Management for Nonprofit Organizations
• LAWS 53110 Project and Infrastructure Development and Finance
• LAWS 53193 Topics in State and Local Finance (cannot take both PPHA 32100 and LAWS 53193)

The certificate requires completion of two required courses, along with one additional elective course. Students must achieve at least a B- grade in each course with the exception of the last term prior to graduation, and there is no pass/fail option. Students should complete the formal signup process to indicate their intention to pursue the certificate.

CERTIFICATE IN POLICY ANALYSIS

Faculty Directors: Dan Black

Program Description: The Certificate in Policy Analysis enables students to learn technical and analytical tools in the classroom and subsequently to apply them to a real-world project for a real-world client in a supported environment. Students will also learn valuable project management, communications, and other professional skills. Students earning the Certificate in Policy Analysis will be well positioned for careers in local and state governments as well as the private sector financial and consulting firms who serve them.

Certificate Requirements
The certificate requires completion of three required courses. Students must take either Program Evaluation or Cost Benefit Analysis before enrolling in the Policy Lab. No certificate courses may be taken on a pass/fail grading basis. Students should complete the formal signup process to indicate their intention to pursue the certificate.

• PPHA 34600 Program Evaluation
• PPHA 41300 Cost-Benefit Analysis
• Choose one Harris Policy Lab

Application Process
The certificate is open to any University of Chicago graduate student. If you are a non-Harris student and intend to complete the requirements for the Survey Research certificate please submit the Harris Certificate
Application for Non-Harris Students (https://uchicagoharris.wufoo.com/forms/zas37xd039saly/) to indicate you are pursuing this certificate.

**CERTIFICATE IN POLITICAL CAMPAIGNS**

**Faculty Director:** Ethan Bueno de Mesquita, Marc Farinella (Administrative Director)
**Center Name:** Center for Policy Entrepreneurship
**Center Website:** http://harris.uchicago.edu/centers/policy-entrepreneurship/home

**Program Description:** The Center for Policy Entrepreneurship sponsors the Certificate in Political Campaigns. Through this certificate program, students learn the core analytic and technical skills used in modern political campaigns, as well as the social scientific principles to evaluate and apply these skills appropriately. Such expertise is essential to the running of modern electoral and advocacy campaigns.

**CERTIFICATE REQUIREMENTS**

The certificate requires completion of one required course, along with two additional courses. No certificate course may be taken on a pass/fail grading basis. The courses do not need to be taken in a particular order. Students should complete the formal signup process to indicate their intention to pursue the certificate.

**REQUwES COURSE**

- PPHA 31720 The Science of Elections and Campaigns

**ELECTIVE COURSES**

Students must complete two of the following courses to fulfill the requirement:

- PPHA 30545 Machine Learning or BUSN 41204 Machine Learning or MACS 33002 Introduction to Machine Learning or CMSC 35300 – Mathematical Foundations of Machine Learning
- PPHA 31730 The Strategic Uses of Survey Research in Political Campaigns (tentative for 2020-2021)
- PPHA 32810 Winning Issue Campaigns (not offered in 2020-2021)
- PPHA 33910 Digital Media in Policy and Politics: Practices, Problems and Policy Issues

**APPLICATION PROCESS**

The certificate is open to any University of Chicago graduate student. If you are a non-Harris student and intend to complete the requirements for the certificate please submit the Harris Certificate Application for Non-Harris Students (https://uchicagoharris.wufoo.com/forms/zas37xd039saly/) to indicate you are pursuing this certificate.

**CERTIFICATE IN SURVEY RESEARCH**

**Faculty Directors:** Colm O’Muircheartaigh, Marc Farinella (Administrative Director)
**Center Name:** Center for Survey Methodology
**Center Website:** http://harris.uchicago.edu/centers/survey-methodology (http://harris.uchicago.edu/centers/survey-methodology/)

**Program Description:** The Chicago Harris Center for Survey Methodology was established in 2014. The center supports research projects on the methodology of data collection and evaluation, hosts guest speakers, organizes small group meetings and conferences, and manages the Chicago Harris Certificate in Survey Research, which will be offered for the first time in 2015. The Center for Survey Methodology works closely with other academic units in the University as well as with the National Opinion Research Center at the University of Chicago (NORC). The oldest university-based social research organization in the United States, NORC engages in research and data analysis in numerous public policy fields including health, education, economics, crime, justice, energy, security, and the environment.

In addition to being an intellectually vibrant area in social research methodology, survey research is a field that provides professional opportunities for our students. Students earning the Certificate in Survey Research will be well positioned for careers in both the public and the private sectors. Furthermore, in combination with other certificates, such as the Certificate in Political Campaigns and the Certificate in Health Policy, it can give students a distinct advantage in certain job markets.

The Center’s Academic Director is Colm O’Muircheartaigh, professor in Chicago Harris, who served as dean of the Harris School from 2009 to 2014; he is also a senior fellow in NORC. Marc Farinella, former COO of Harris, lecturer and Harris Senior Fellow, serves as the Center’s Executive Director.

**CERTIFICATE REQUIREMENTS**

The certificate requires completion of one required course, along with two additional courses. No certificate course may be taken on a pass/fail grading basis. The courses do not need to be taken in a particular order. Students should complete the formal signup process to indicate their intention to pursue the certificate.

The certificate will be awarded to students who complete the following course:
and at least two of the following courses:

- PPHA 38520 GIS Applications in the Social Sciences
- PPHA 41800 Survey Questionnaire Design
- PPHA 31730 The Strategic Uses of Survey Research in Political Campaigns
- PPHA 44600 Using Longitudinal Data for Policy Analysis
- PPHA 30525 Next Generation Data: Sources, Access, Analytics
- STAT 33100 Sample Surveys

**APPLICATION PROCESS**

The certificate is open to any University of Chicago graduate student. If you are a non-Harris student and intend to complete the requirements for the certificate please submit the Harris Certificate Application for Non-Harris Students (https://uchicagoharris.wufoo.com/forms/zas37xdil039alys/) to indicate you are pursuing this certificate.

**GRADUATE PROGRAM IN HEALTH ADMINISTRATION AND POLICY**

The Graduate Program in Health Administration and Policy (GPHAP), trains students to guide health care organizations through various economic, ethical, and social issues, as well as the financial demands of this complex field. Students can earn either a Certificate in Health Administration and Policy or a Certificate in Health Administration and Policy with a Concentration in Global Health.

Applicants must be enrolled in or admitted to one of the participating professional schools. For more information, visit gphap.uchicago.edu or (http://www.ssa.uchicago.edu/gphap/) contact Laura Botwinick, Director, GPHAP at lbotwinick@uchicago.edu.

**HONORS**

Any master’s student who has a 3.75 or better cumulative GPA after their final quarter will earn honors. Students in joint degree programs will use only the courses/grades counted toward the MPP portion of the joint degree for the purposes of determining honors.
Anjali Adukia is an assistant professor at the University of Chicago Harris School of Public Policy and the College. Her primary interests concern improving access to education in developing countries, particularly at the intersection of education and health. Her current work examines the impact of sanitation on education and health outcomes in rural Indian schools.

Originally from Illinois, Anjali earned her master’s and doctoral degrees from Harvard and her bachelor’s from the University of Illinois at Urbana-Champaign in Molecular and Integrative Physiology. She has a background in non-profit management and higher education administration. Before moving to Boston, Anjali handled volunteer management and training with the Make-A-Wish Foundation and community relations and program coordination with the Forum for Women Entrepreneurs in San Francisco. After her master’s degree, Anjali served as a Visiting Administrative Fellow in the Office of the President and Provost at Harvard and then worked for the Democratic National Convention Committee. Her international interests took her to India where she started a city-wide service initiative in Ahmedabad, Gujarat and worked with tsunami rehabilitation coordination in coastal Tamil Nadu with Indicorps. Her past research projects include examining the role of transcriptional and growth factors in cancer and organ development at Northwestern Medical School, aiding with research and data collection for studies on affirmative action with the Civil Rights Project at Harvard, and consulting with the Broadmoor Neighborhood Project in New Orleans as part of rehabilitation and reconstruction efforts post-Hurricane Katrina with the Harvard Kennedy School. Anjali continues to work with non-governmental organizations in India such as UNICEF and Manav Sadhna.

Moving forward, Anjali will be teaching subjects related to education and development economics and pursuing research and other relationships with organizations that positively influence education policy in developing contexts.

Costel Andonie is a Research Assistant Professor at the Harris School of Public Policy. His research interests are in the field of political economy and microeconomic theory. His research studies alternative, in particular behavioral, approaches to existing rational models in the field of political economy and investigates the normative consequences of such models.

Costel holds a MA and PhD from Northwestern University and previously was an Assistant Professor at City University of Hong Kong.

Jeannie Annan is a Senior Research Associate at the University of Chicago Harris School of Public Policy. Her works aims to improve humanitarian policy and programs through conducting rigorous research and supporting practitioners and policy makers to use evidence in decision-making. Her research focuses on developing and testing interventions that prevent and mitigate the consequences of violence against women and children in areas of armed conflict. Annan is the Senior Director of Research and Evaluation for an international humanitarian organization, the International Rescue Committee, a global leader in humanitarian response and recovery. Her research has been in northern Uganda, the Democratic Republic of the Congo, Burundi, Cote D’Ivoire, Liberia, Lebanon, and the Thai-Burna border.

Annan completed her doctoral degree in counseling psychology at Indiana University-Bloomington. She has held several research positions, including as a visiting scientist at the Harvard T.H. Chan School of Public Health, postdoctoral fellow at Yale University School of Public Health in the Center for Interdisciplinary Research on AIDS (CIRA), a postdoctoral fellow at NYU School of Medicine in the Program for Survivors of Torture, and a visiting scholar at the Human Rights Center at the Innovations for Poverty Action and a Coordinating Group Member at the Sexual Violence Research Initiative.

Scott Ashworth is an associate professor and director of the University of Chicago Harris School of Public Policy Ph.D. program. His research uses game-theoretic models to study a variety of issues in political science, with a special emphasis on campaigns and elections.

Ashworth’s recent research has examined the welfare economics of campaign finance, the sources of the incumbency advantage, the media’s influence on policy choice, and some methodological pitfalls in the study of suicide terrorism. His current research has two main foci. The first uses nonstandard models of beliefs to study issues including optimal delegation and targeting in electoral campaigns. The second uses canonical ideas from the theory of contracts to study the impact of domestic politics on international conflict.

Before joining Chicago Harris, Ashworth was an assistant professor in the department of government at Harvard University and in the department of politics at Princeton University. Ashworth received his B.S. in economics from the University of Pennsylvania and his Ph.D. in economics from the Massachusetts Institute of Technology.

Katherine Baicker

Katherine Baicker, a leading scholar in the economic analysis of health care policy, commenced as Dean and the Emmett Dedmon Professor at the University of Chicago Harris School of Public Policy in August 15, 2017.
Baicker’s research focuses primarily on the factors that drive the distribution, generosity, and effectiveness of public and private health insurance, with a particular focus on health insurance finance and the effect of reforms on the distribution and quality of care. She is currently one of the leaders of a research program investigating the many effects of expanding health insurance coverage in the context of a randomized Medicaid expansion in Oregon. Her research has been published in journals such as the New England Journal of Medicine, Science, Health Affairs, and the Quarterly Journal of Economics.

Before coming to the University of Chicago, Baicker was the C. Boyden Gray Professor of Health Economics in the Department of Health Policy and Management at the Harvard T.H. Chan School of Public Health. She holds appointments as a research associate at the National Bureau of Economic Research; as an affiliate of the Abdul Latif Poverty Action Lab; and serves on the Congressional Budget Office’s Panel of Health Advisers; on the Board of Directors of Eli Lilly; and on the editorial boards of Health Affairs and the Journal of Health Economics. Baicker is an elected member of the National Academy of Medicine (iOM) and the National Academy of Social Insurance.

Baicker has been a member of the faculty of the Department of Public Policy in the School of Public Affairs at the University of California, Los Angeles; the Economics Department at Dartmouth College; and the Center for the Evaluative Clinical Sciences and the Department of Community and Family Medicine at Dartmouth Medical School. She has served as Chair of the Massachusetts Group Insurance Commission; Chair of the Board of Directors of AcademyHealth; Commissioner on the Medicare Payment Advisory Commission and a nonresident senior fellow of the Brookings Institution. From 2005-2007, she served as a Senate-confirmed Member of the President’s Council of Economic Advisers, where she played a leading role in the development of health policy. Baicker earned her B.A. in economics from Yale and her Ph.D. in economics from Harvard.

Maria Bautista is an Assistant Professor at the University of Chicago Harris School of Public Policy. Maria’s research focuses on the political, economic and social consequences of state-led repression. Her PhD dissertation studied the case of military dictatorship in Chile based on a unique dataset she collected and explores the extent to which repression affected individual political preferences, behavior and economic outcomes by comparing subjects who were victims of political torture or imprisonment by the state to subjects who did not. She also studies the heterogeneous effects and the intergenerational consequences of repression.

Christopher R. Berry is an associate professor at the University of Chicago Harris School of Public Policy. His research interests are in the political economy of American local government and the politics of federal spending. He is currently engaged in two major lines of research. The first explores how the institutional design of local government influences political accountability and public policy. The second is an analysis of the ways in which executive and legislative politics influence the geographic distribution of federal outlays. Professor Berry is the author of Imperfect Union: Representation and Taxation in Multilevel Governments, published by Cambridge University Press, as well as many other scholarly publications. For access to Professor Berry’s writings, please visit his research web page.

Prior to joining Chicago Harris, Berry was a post-doctoral fellow at Harvard University in the Department of Government’s Program on Education Policy and Governance. He received his BA from Vassar College, Master of Regional Planning (MRP) from Cornell University, and PhD from the Department of Political Science at the University of Chicago. Professor Berry is also active in community development and was formerly a director in the MetroEdge division of ShoreBank, America’s oldest and largest community development financial institution.

Dan A. Black is a professor at the University of Chicago Harris School of Public Policy. He also serves as a senior fellow at the National Opinion Research Center. Black is the project director for the National Longitudinal Survey of Youth and is on the editorial board of the Journal of Labor Economics, Labour Economics, and Journal of Urban Economics. His research focuses on labor economics and applied econometrics. His papers have appeared in the top journals in economics, statistics, and demography. He has served on panels for the Census Bureau, the Department of Education, the Environmental Protection Agency, the National Science Foundation, and the National Academy of Science and has served as a consultant for the New Zealand and Australian governments.

Before joining Chicago Harris, he was on faculty at the University of Kentucky and Syracuse University, held visiting appointments at the University of Chicago, Australian National University, and Carnegie Mellon University. Black holds a BA and MA in history from the University of Kansas and an MS and PhD in economics from Purdue University.

Christopher Blattman is the Ramalee E. Pearson Professor of Global Conflict studies at the University of Chicago Harris School of Public Policy. As an economist and political scientist, Blattman uses field study, surveys, natural experiments, and field experiments to study the dynamics of poverty and participation, and to consider which development programs work and why. A number of studies are presently underway in Uganda and Liberia, where he is exploring new strategies to alleviate poverty and is exploring how these strategies impact violence, unrest, and other social and political behavior. He has published articles in American Economic Review, Quarterly Journal of Economics, American Political Science Review, Journal of Economic Literature, Journal of

Previously, Blattman was a business consultant and an accountant at Deloitte & Touche. He then served as an assistant professor of political science and economics at Yale University and most recently as an associate professor at Columbia University’s School of International and Public Affairs and Department of Political Science. He holds a PhD in economics from the University of California at Berkeley and a master’s degree in public administration and international development from Harvard University’s Kennedy School of Government.

Norman Bradburn is the the Tiffany and Margaret Blake Distinguished Service Professor Emeritus, serves on the faculties of the University of Chicago Harris School of Public Policy, Booth School of Business, Department of Psychology, and the College. At the University of Chicago, he is a former provost of the University (1984–1989), chairman of the Department of Behavioral Sciences (1973–1979), and associate dean of the Division of the Social Sciences (1971–1973). From 2000 to 2004, he was the assistant director for Social, Behavioral, and Economic Sciences at the National Science Foundation. Bradburn is currently a senior fellow at the independent research organization, NORC at the University of Chicago. Associated with NORC since 1961, he has been director of NORC and president of its Board of Trustees.

Bradburn is the chair of the Chapin Hall Center for Children Board of Directors. He was chair of the Committee on National Statistics of the National Research Council/National Academy of Sciences (NRC/NAS) from 1993 to 1998, and is past president of the American Association of Public Opinion Research (1991–1992). Bradburn chaired the NRC/NAS panel to advise the Census Bureau on alternative methods for conducting the 2000 Census. The report, published as Counting People in the Information Age, was presented to the Census Bureau in October 1994. He was a member of the NRC/NAS panel to review the National Assessment of Educational Progress and the panel to assess the 2000 Census. He is currently a member of the Board on Research Data and Information at the National Academy of Sciences. Bradburn was elected to the American Academy of Arts and Sciences in 1994. In 1996, he was named the first Wildenmann Guest Professor at the Zentrum für Umfragen, Methoden, und Analysen in Mannheim, Germany. He is currently on a National Academy Committee on the use of social science evidence in public policy. He is also advising the UN Economic Commission on Europe on the development of an annual survey of energy experts in the countries covered by the Commission (essentially all European countries plus the states of the former Soviet Union) to assess risks to energy security.

Zarek Brot-Goldberg is an Assistant Professor at the University of Chicago Harris School of Public Policy. His work is concerned with market structure, organizational structure, and regulatory design in the U.S. health care sector. In prior and ongoing research, he has studied the efficiency of high-deductible health plans in reducing health care spending; the effects of vertical integration in physician markets on patient referral patterns; the extent of ‘mistakes’ in insurance choice in Medicare Part D; and measuring the costs and benefits of paperwork for physicians. He received the NIHCM Foundation Research Award for best health economics research paper in 2018. He received his PhD in economics from UC Berkeley in 2019, funded by the National Science Foundation’s Graduate Research Fellowship Program.

Ethan Bueno de Mesquita is a professor and deputy dean for the faculty at the University of Chicago Harris School of Public Policy. He is an applied game theorist whose research focuses on political violence—especially terrorism and insurgency—and on democratic accountability. His writing in these areas appears in numerous leading scholarly journals in both political science and economics.

Bueno de Mesquita’s current research focuses on two aspects of insurgency and counterinsurgency. One project considers the determinants of insurgent tactical choice. In particular, it asks when insurgents employ terrorist and other guerrilla tactics and when they focus on more traditional forms of war fighting. A second project examines the implications of internal divisions within insurgent organizations for government-insurgent negotiations. He has also studied terrorist recruitment, the sources of internal division and internecine violence within terrorist organizations, the use of terrorism to spark large-scale revolutionary mobilization, peace processes, and counter-terrorism policy.

Bueno de Mesquita’s work on accountability examines how changes in institutional and electoral environments affect political and policy outcomes including public goods provision, the quality of fiscal management, the incumbency advantage, corruption, and party strength. He is also concerned with more foundational questions regarding the nature of representation and accountability in democratic systems. Bueno de Mesquita has also written on several topics in law and politics, including the emergence of judicial norms such as deference to precedent, the effect of formal legal institutions on informal economic and social networks, and judicial oversight of the bureaucracy.

Before coming to Chicago Harris, Bueno de Mesquita taught in the department of political science at Washington University in St. Louis and was a Lady David Fellow in political science and visiting fellow in the Center for the Study of Rationality at the Hebrew University of Jerusalem. His research has been funded by the National Science Foundations, the Office of Naval Research, and the United States Institute of Peace. Bueno de Mesquita received his BA in political science from the University of Chicago and his MA and PhD in political science from Harvard.
Fiona Burling is an Assistant Professor at the University of Chicago Harris School of Public Policy. She studies energy and environmental economics, with a focus on the developing world. Her recent research examines the impacts of rural electrification in India, uses machine learning methods to quantify the effectiveness of energy efficiency upgrades, and proposes tools for designing randomized controlled trials. Prior to joining Harris, Fiona was a Postdoctoral Scholar in the Department of Economics and Energy Policy Institute (EPIC) at the University of Chicago. She holds a PhD in agricultural and resource economics from the University of California, Berkeley, and a BA in economics, political science, and German from Williams College.

John Burrows is senior lecturer in leadership at the University of Chicago Harris School of Public Policy and an associate fellow at Oxford University’s Said Business School. He also teaches healthcare leadership in a newly launched double masters degree program in health policy taught jointly by the University of Chicago and the London School of Economics & Political Science. Previously, he was an adjunct professor at the University of Chicago’s Booth School of Business.

Before entering academia, John’s career spanned the public, private, and NGO sectors. He originally came to the USA from the UK to volunteer at the Southern Center for Human Rights and the Mississippi Capital Defense Resource Project. During college he interned with other anti-death penalty groups and also at the Cato Institute, a think tank in Washington, DC. Later he joined Arthur Andersen’s Office of Government Service (OGS) and led engagements with the U.S. Department of Justice (DoJ) and the Department of Housing and Urban Development (HUD).

John later switched into the private sector, where he was a partner with the consulting firm Accenture and held senior roles in sales and marketing at enterprise software companies including Siebel and Oracle. He negotiated, sold, managed, and implemented complex, multi-national, multi-million dollar projects around the globe, and gained experience building and growing operations in the UK, USA, and Japan, grappling with all that that entails: BD, IJVs, M&A, etc. During his PhD studies John served as an advisor for Houses for Africa, a social enterprise firm based in Cape Town, South Africa.

At the University of Chicago and Oxford, John teaches leadership, negotiations, strategy, decision-making, and organizational psychology to MPP, MBA, and MA students, and to senior executives in open enrollment and custom executive-education programs. Custom executive education clients of John’s include AbbVie, Alfa, American College of Surgeons, American Orthopaedic Association, Aon, BBVA, Brainlab, Cheung Kong Graduate School of Business (CKGSB), Civil Service Bureau of Hong Kong, Edelman, Health Care Service Corporation (HCSC), Kiewit, Kuwait University College of Business Administration, Merrill Lynch, State Farm, Syngenta, Trelleborg, and Workiva.

John received a Ph.D. and M.B.A. from the University of Chicago’s Booth School of Business and an A.B. from Vassar College.

Chris Clapp is an Assistant Instructional Professor at the Harris School of Public Policy. His research interests are in applied microeconomics, primarily the fields of public, urban, environmental, and labor economics. Clapp has also done work related to health and sports economics topics.

Prior to working at UChicago, Dr. Clapp majored in Economics and English at Clemson University and worked as a research associate for Compass Lexecon in Washington, DC. He earned his Ph.D. in Economics from the University of Virginia, and was previously employed as an Assistant Professor at Florida State University.

Don L. Coursey is the Ameritech Professor of Public Policy Studies at the University of Chicago Harris School of Public Policy and the College and served as dean of Chicago Harris from 1996 to 1998. He is an experimental economist whose research elicits reliable measures of preferences and monetary values for public goods, such as environmental quality. Coursey’s research has focused on demand for international environmental quality, environmental legislation in the United States, and public preferences for environmental outcomes relative to other social and economic goals.

Coursey led an investigation of environmental equity in Chicago, documenting the prevalence of hazardous industrial sites in poor, minority neighborhoods. He has examined public expenditures on endangered species. He has also consulted with the National Oceanic and Atmospheric Administration in the wake of the Exxon Valdez oil spill to develop federal response guidelines for environmental disasters.

He received both a B.A. in mathematics and a Ph.D. in economics from the University of Arizona and has previously taught at the University of Wyoming and Washington University in St. Louis, MO. He has received the Burlington-Northern Foundation Award for Distinguished Achievement in Teaching, Greater St. Louis Award for Excellence in University Teaching, John M. Olin School of Business Teacher of the Year Award in 1989 and 1990, and has been named Professor of the Year for six consecutive years by Chicago Harris students.

Oeindrila Dube is the Philip K. Pearson Professor of Global Conflict Studies at the University of Chicago Harris School of Public Policy. Oeindrila Dube's research focuses on understanding the causes and consequences of conflict and crime in the developing world.

Dube’s current research interests include studying the role of employment opportunities in engaging at-risk Muslim youth, understanding the role of trauma in post-conflict recovery, and analyzing the role of gender in
conflict. Through this research agenda, she aims to help advance the Pearson Institute’s goal of incubating new strategies for curbing violence worldwide.

In past work, Dube has examined how commodity price shocks influence civil war in Colombia, documented how the availability of guns from the US promotes violent crime in Mexico, and experimentally evaluated the effects of post-conflict reconciliation in Sierra Leone.

Dube’s research affiliations include the National Bureau of Economic Research, the Bureau for Research and Economic Analysis of Development, the Centre for Economic Policy Research, the International Growth Center, and the University of Chicago Crime Lab.

Previously, Dube was an assistant professor of politics and economics at New York University and a post-doctoral fellow at the Center for Global Development. She holds a PhD in public policy from Harvard University, an MPhil in economics from the University of Oxford, and a BA in public policy from Stanford University. She also received a Rhodes Scholarship in 2002.

Steven Durlauf is Steans Professor in Education Policy at the University of Chicago Harris School of Public Policy. Steven’s research spans many topics in microeconomics and macroeconomics. His most important substantive contributions involve the areas of poverty, inequality and economic growth. Much of his research has attempted to integrate sociological ideas into economic analysis. His major methodological contributions include both economic theory and econometrics. He helped pioneer the application of statistical mechanics techniques to the modelling of socioeconomic behavior and has also developed identification analyses for the empirical analogs of these models. Other research has focused on techniques for monetary policy evaluation. Durlauf is also known as a critic of the use of the concept of social capital by economists and other social scientists and has also challenged the ways that agent-based modelling and complexity theory have been employed by social and natural scientists to study socioeconomic phenomena.

Prior to joining Harris, Steven was the William F. Vilas Research Professor and Kenneth J. Arrow Professor of Economics at the University of Wisconsin-Madison. Durlauf is also a research associate at the National Bureau of Economic Research. He has held previous positions at Stanford University; University of California, Los Angeles; Pontifical Catholic University of Rio de Janeiro; the Santa Fe Institute; and Federal Reserve, among others.

Durlauf graduated magna cum laude with a BA in economics from Harvard in 1980. He went on to earn his doctorate from Yale in 1986.

Wioletta Dziuda is an Associate Professor at the University of Chicago Harris School of Public Policy. Her main interests lie in applied game theory, political economy and the economics of information.

Her current research focuses on analyzing how legislative bargaining affects the nature and the efficiency of policies. She shows that in uncertain economic or political environments, policy making may lead to legislators’ polarization and inefficient policy inertia. She is currently applying her findings to the economics of regulations, in particular trying to explain the frequent use of inefficient economic instruments.

Before joining Chicago Harris, Dziuda was an assistant professor at Kellogg School of Management. She received her PhD in economics from Princeton University.

Alexander Fourminais is an Assistant Professor at the University of Chicago Harris School of Public Policy. His work concentrates on the political economy of elections. Most of his research focuses on how money and the media shape elections and affect representation and accountability. Methodologically, Fourminais has an interest in causal inference and applied econometrics. Most of his projects use natural experiments to uncover causal relations between political and economic variables. Prior to joining Harris, Fourminais was a Prize-Postdoctoral Research Fellow at Nuffield College, Oxford University. He earned his PhD at the London School of Economics.

Anthony Fowler is an Associate Professor at the University of Chicago Harris School of Public Policy. His research focuses on difficult causal questions about political representation. When and to what extent do advanced democracies represent or fail to represent the preferences of their citizens? What policy interventions can improve representation? He designs randomized experiments, searches for natural experiments, and develops new tools to address these questions.

Eyal Frank is an Assistant Professor at the University of Chicago Harris School of Public Policy. As an environmental economist, he works at the intersection of ecology and economics. His work addresses three broad questions: (i) how do natural inputs, namely animals, contribute to different production functions of interest, (ii) how do market dynamics reduce natural habitats and lead to declining wildlife population levels, and (iii) what are the costs, indirect ones in particular, of conservation policies.

These areas of research present a causal inference challenge as manipulating ecosystems and species at large scales is often infeasible. In his work, Frank draws natural experiments from ecology and policy, and uses econometric techniques to estimate different pieces of the puzzle regarding the social cost of biodiversity losses.
Prior to the University of Chicago, Frank was a Postdoctoral Research Associate at the Woodrow Wilson School at Princeton University. He received his Ph.D. in Sustainable Development from Columbia University, and earned his M.A. in Economics and B.Sc. in Environmental Sciences and Economics from the Hebrew University of Jerusalem.

Ingvil Gaarder is an Assistant Professor at the University of Chicago Harris School of Public Policy. Her research applies microeconomic theory and microdata to study the differential effects of government policies on individuals. In one paper, she uses a natural experiment in Norway to examine the incidence and distributional effects of consumption taxes across households. A second strand of research has studied the effect on wage and employment outcomes resulting from the interaction of new technology with different worker skill levels.

Ingvil graduated in 2014 from the European University Institute in Florence with a Ph.D. in Economics. She earned her MSc from University of Oslo. Prior to Harris, Ingvil held positions as Visiting Researcher at the Institute for Fiscal Studies in London and Research Associate at the Department of Economics, University of Chicago.

Yana Galen is an assistant professor at the University of Chicago Harris School of Public Policy. She received a Ph.D. in Economics from Northwestern University in 2016. She is a labor economist studying the gender wage gap. Her research focuses on understanding the sources of the gender pay gap—preferences, discrimination, or productivity? She is also interested in the impact of family friendly policies on the labor market, particularly looking at indirect or unanticipated effects of policy reforms. Many of her projects use Danish register data linking workers and firms. Her current work focuses on the savings and career decisions of household before they know their preferences concerning child-rearing.

Peter Ganong is an Assistant Professor at the University of Chicago Harris School of Public Policy. He studies how households manage difficult financial circumstances such as unemployment and having an underwater mortgage. He also helped start immigrantdoctors.org (http://immigrantdoctors.org/). He received a BA in 2009 and a Ph.D in 2016, both in economics from Harvard. He worked at the White House Council of Economic Advisers from 2009 to 2010 and helped to start the City of Boston’s Citywide Analytics Team from 2014 to 2015. He was a postdoctoral fellow at the National Bureau of Economic Research from 2016 to 2017.

Theaster Gates is Senior Advisor for Cultural Innovation and Advisor to the Dean. Professor Gates is also a professor at the University of Chicago in the Department of Visual Arts and the College, and Director of Arts + Public Life, a UChicago Arts initiative housed at the Arts Incubator in Washington Park. He also leads an urban research initiative known as Place Lab, a partnership between Arts + Public Life and the University of Chicago Harris School of Public Policy. Place Lab is a team of social scientists, architects, creative professionals, and business leaders. With support from the Knight Foundation, Gates and his team will create frameworks for reimagining the role that culture plays in the redevelopment of transforming African American communities over the next three years. Gates is helping to define the future of artistic place-based efforts, in research and practice.

Scott Gehlbach is Professor, Department of Political Science and the University of Chicago Harris School of Public Policy. A political economist and comparativist, Gehlbach’s work is motivated by the contemporary and historical experience of Russia, Ukraine, and other postcommunist states. He has made numerous contributions to the study of autocracy, economic reform, political connections, and other important topics in political economy. Known for employing a wide range of methods in his research, Gehlbach has contributed to graduate education through his widely used textbook Formal Models of Domestic Politics. He is the author or coauthor of many articles in top journals, including the American Political Science Review, the American Journal of Political Science, and the Journal of Politics; the award-winning monograph Representation Through Taxation: Revenue, Politics, and Development in Postcommunist States; and the forthcoming Cambridge Element Reform and Rebellion in Weak States.

Prior to coming to Chicago, Gehlbach was faculty at the University of Wisconsin–Madison for sixteen years. He has at various times been affiliated with both the New Economic School and the Higher School of Economics in Moscow. For the 2019–20 academic year, he is Visiting Professor, Economics Department, Sciences Po. His work has been supported by the National Science Foundation, two Fulbright-Hays Fellowships, and many other grants. He has been honored for his scholarship through numerous awards, including most recently the Michael Wallerstein Award for best article in political economy. Among other service to the profession, he is an associate editor of the Quarterly Journal of Political Science and organizer of the annual Summer Workshop in the Economic History and Historical Political Economy of Russia. Gehlbach received his PhD in political science and economics from the University of California–Berkeley.

Joshua Gottlieb is an Associate Professor at the University of Chicago Harris School of Public Policy. His research in applied microeconomics focuses on the economics of the health care system, including the organization of insurance markets, physician behavior, administrative costs, and implications for labor economics. Gottlieb also conducts research in public finance more broadly, including urban and health economics. He is a Co-Editor of the Journal of Public Economics and a Research Associate at the National Bureau of Economic Research.
Gottlieb has published in academic journals such as the American Economic Review, Journal of Political Economy, and Journal of Labor Economics. He won the 2015 Kenneth Arrow Award for best paper in health economics and the 2012 National Tax Association Dissertation Award for this work.

Gottlieb’s research focuses on questions directly relevant to public policy. He was instrumental in developing and promoting a novel property tax scheme, which influenced housing policy in British Columbia.

Gottlieb completed his Ph.D. in economics at Harvard University in 2012. He was previously an Assistant and Associate Professor at the University of British Columbia and a Visiting Assistant Professor at Stanford University. He is also a Visiting Scholar at the Federal Reserve Bank of San Francisco.

Michael Greenstone is the Milton Friedman Professor of Economics, the Director of the Energy Policy Institute at Chicago (EPIC), and Director of the Becker Friedman Institute (BFI). His research largely focuses on environmental and energy economics. Prior to rejoining the faculty at Chicago, Professor Greenstone was the 3M Professor of Economics at MIT. Among Professor Greenstone’s many honors, he is an elected member of the American Academy of Arts and Sciences; Faculty Director of the E2e Project; Director of the Climate Change, Environment and Natural Resources Research Programme of the International Growth Centre; a Senior Fellow of the Brookings Institution; and Research Associate at the National Bureau of Economic Research.

Jeffrey Grogger, the Irving Harris Professor in Urban Policy at the University of Chicago Harris School of Public Policy, is one of the nation’s leading experts on welfare reform. He specializes in labor economics, applied microeconomics, applied econometrics, and economics of crime. His recent work includes projects on international migration and racial inequality. For his work on racial profiling, he received the Outstanding Statistical Application Award for 2007 from the American Statistical Association.

Grogger received a Ph.D. in economics from the University of California, San Diego. He was a coeditor of the Journal of Human Resources from 1996 to 2008. Before joining Chicago Harris, he taught at the University of California, Los Angeles and the University of California, Santa Barbara. Grogger has also been a research fellow in the Office of the Attorney General of the State of California. He is the chair of the National Longitudinal Surveys Technical Review Committee, a research associate for the National Bureau of Economic Research, and a research fellow with the Institute for the Study of Labor (Bonn, Germany).

John Mark Hansen whose research focuses on interest groups, citizen activism, and public opinion, joined the University of Chicago Harris School of Public Policy faculty in 2013.

One of the nation’s leading scholars of American politics, Hansen is the author of two books: Mobilization, Participation and Democracy in America with Steven Rosenstone—for which he received the Outstanding Book Award from the National Conference of Black Political Scientists; and Gaining Access: Congress and the Farm Lobby, 1919–1981. In 1999, he received the Heinz Eulau Award from the American Political Science Association for the Best Article Published in the American Political Science Review in 1998. In 2003, he was elected a Fellow of the American Academy of Arts and Sciences.

In addition to his distinguished scholarship, Hansen is an experienced administrator. He is currently a Senior Advisor to Robert J. Zimmer, President of the University of Chicago. Previously at the University of Chicago, Hansen served as Dean of the Division of the Social Sciences, Chairman of the Political Science Department, and Associate Provost for Education and Research.

One of the nation’s leading scholars of American politics, John Mark Hansen is the author of two books: Mobilization, Participation and Democracy in America with Steven Rosenstone – for which he received the Outstanding Book Award from the National Conference of Black Political Scientists; and Gaining Access: Congress and the Farm Lobby, 1919–1981. In 1999, he received the Heinz Eulau Award from the American Political Science Association for the Best Article Published in the American Political Science Review in 1998. In 2003, he was elected a Fellow of the American Academy of Arts and Sciences.

In addition to his distinguished scholarship, Hansen is an experienced administrator. He is currently a Senior Advisor to President Zimmer and has previously served as Dean of the Social Sciences Division, Chairman of the Political Science Department, and Associate Provost for Education and Research.

James J. Heckman is the Henry Schultz Distinguished Service Professor in the Department of Economics and the College, an affiliate professor at the University of Chicago Harris School of Public Policy, and the director of the Center for Social Program Evaluation at Chicago Harris. Much of his work has focused on the impact of different social programs and the methodologies used to measure those program’s effects. Heckman has researched areas such as education, job training programs, minimum wage legislation, women’s work and earnings, child care effects, anti-discrimination laws, civil rights and early childhood interventions. Additional research includes the effects of tax policy on schooling and training choices and the formulation and estimation of general equilibrium models.

Heckman is on the editorial board of the Journal of Applied Econometrics. He served as co-editor of the Handbook of Econometrics, Volumes 5 and 6. He has served on the National Academy of Science Panel on the State of Black Americans, the Board of Overseers of the Michigan Panel Survey of Income Dynamics, and the National Academy’s Science Panel on Statistical Assessments. He is a fellow of the Econometric Society and
the American Academy of Arts and Sciences, an elected member of the National Academy of Sciences and a resident member of the American Philosophical Society. He is a fellow of the American Statistical Association, the International Statistical Institute, the Journal of the Econometrics, the Society of Labor Economics, and the American Association for the Advancement of Science. He is also a lifetime member of the Irish Economic Association.

Heckman has received numerous honors, including the John Bates Clark Medal from the American Economic Association in 1983 and the Dennis J. Aigner Award in 2005 and 2007 for the best empirical paper in the Journal of Econometrics. He received the Ulysses medal from University College Dublin in 2005. He received the Mincer Award for Lifetime Achievement from the Society of Labor Economics in 2005. In 2008, he was awarded the Gold Medal of the President of the Italian Republic by the International Scientific Committee of the Pio Manzu Centre. He also received the Distinguished Contributions to Public Policy for Children Award from the Society for Research in Child Development in 2009. He was president of the Midwest Economics Association in 1998 and president of the Western Economic Association from 2006-2007. In 2000, Heckman was awarded the Nobel Memorial Prize in Economic Sciences for his development of theory and methods for analyzing selective samples and the evaluation of public policy.

William Howell is the Sydney Stein Professor in American Politics at the University of Chicago Harris School of Public Policy, a professor in the Department of Political Science and the College, and the director of the Center for Effective Government. He has written widely on separation-of-powers issues and American political institutions, especially the presidency. He currently is working on research projects on Obama’s education initiatives, distributive politics, and the normative foundations of executive power.

William recently published two books, one with coauthors Saul Jackman and Jon Rogowski entitled The Wartime President: Executive Influence and the Nationalizing Politics of Threat (University of Chicago Press, 2013); and the other, with David Brent, entitled Thinking about the Presidency: The Primacy of Power (Princeton University Press, 2013). He also is the co-author (with Jon Pevehouse) of While Dangers Gather: Congressional Checks on Presidential War Powers (Princeton University Press, 2007); author of Power without Persuasion: The Politics of Direct Presidential Action (Princeton University Press, 2003); co-author (with Paul Peterson) of The Education Gap: Vouchers and Urban Schools (Brookings Institution Press, 2002); co-author (with John Coleman and Ken Goldstein) of an introductory American politics textbook series; and editor of additional volumes on the presidency and school boards. His research also has appeared in numerous professional journals and edited volumes.

Before coming to Chicago Harris, William taught in the government department at Harvard University and the political science department at the University of Wisconsin. In 2000, he received a PhD in political science from Stanford University.

Kathryn Ierulli is a Senior Lecturer at the Harris School of Public Policy. She has a BA, MA, and PhD in Economics from the University of Chicago, with field exams in Labor Economics and Industrial Organization. She has taught at Harris School of Public Policy, the University of Chicago Department of Economics, and the University of Illinois at Chicago, and been a visiting scholar at Aarhus University in Denmark. She has taught Applied Labor Economics, Urban Economics, Industrial Organization, Microeconomics, and Cost-Benefit Analysis. Her research has focused on labor mobility, mergers and employment, and the effects of tobacco regulation. She is co-editor of The New Economics of Human Behaviour, from Cambridge University Press.

Koichiro Ito is an Assistant Professor at the University of Chicago Harris School of Public Policy. He received a BA from Kyoto University, a MA from University of British Columbia, and a PhD from UC Berkeley. Prior to joining University of Chicago, he was a SIEPR Postdoctoral Fellow at Stanford University and an Assistant Professor at Boston University.

His research interests lie at the intersection of environmental and energy economics, industrial organization, and public economics. These include analyses of how consumers respond to nonlinear pricing, dynamic pricing, and rebate programs in electricity markets, how intrinsic and extrinsic motivation affects their economics decisions, how firms strategically react to attribute-based regulation such as fuel economy standards, and how firms respond to dynamic incentives in sequential forward markets in wholesale electricity markets. His research uses randomized field experiments and quasi-experimental designs to address policy relevant questions in energy and environmental policy.

Professor Ito is also a Faculty Research Fellow at the National Bureau of Economic Research, a Faculty Affiliate at the E2e Project, a Faculty Fellow at Abdul Latif Jameel Poverty Action Lab, a Research Fellow at the Research Institute of Economy, Trade and Industry, and a Research Fellow at the Graduate School of Economics at Kyoto University.

Amir Jina is an Assistant Professor at the University of Chicago Harris School of Public Policy. An environmental and development economist, his research focuses on the role of the environment and environmental change in the shaping how societies develop. He uses applied economic techniques combined with methods from climate science and remote sensing to understand the impacts of climate in both rich and poor countries, and has conducted fieldwork related to climate change adaptation with communities in India, Bangladesh, Kenya, and Uganda.
Prior to University of Chicago, Amir was a visiting scholar at the University of California, Berkeley, where he worked on the economic analysis of the Risky Business initiative, an independent assessment of the economic risks posed by a changing climate in the U.S. He is a founding member of the Climate Impact Lab - an interdisciplinary collaboration examining the socioeconomic impacts of climate change around the world. Amir was also a Postdoctoral Scholar at the Economics Department of University of Chicago, and a Senior Fellow at the Energy Policy Institute of Chicago (EPIC).

Amir received his Ph.D. in Sustainable Development and M.A. in Climate and Society both from Columbia University, B.A.s in Mathematics and Theoretical Physics from Trinity College, Dublin, and previously worked with the Red Cross/Red Crescent in South Asia.

Damon Jones is an associate professor at the University of Chicago Harris School of Public Policy. He conducts research at the intersection of public finance, household finance and behavioral economics. In his current research, he examines how the timing of income taxation affects household income flows and by extension household consumption patterns and financial decisions. These findings are in turn used to test models of behavioral biases in decision making, such as impatience and self-control.

At the University of Chicago Harris School of Public Policy, Jones currently teaches a course on public finance and public policy, and a course in advanced microeconomics. He was a post doctoral fellow at the Stanford Institute for Economic Policy Research (2009-2010) and is a Faculty Research Fellow at the National Bureau of Economic Research. Jones received his PhD in Economics from the University of California, Berkeley and also holds a BA in Public Policy with a minor in African and African-American Studies from Stanford University, which he received in 2003.

Robert Kaestner is a Research Professor at the University of Chicago Harris School of Public Policy. Dr. Kaestner is also a Research Associate of the National Bureau of Economic Research, a consultant to the Federal Reserve Bank of Chicago, an Affiliated Scholar of the Urban Institute and a Senior Fellow of the Schaeffer Center for Health Policy of USC. Prior to joining Harris, Dr. Kaestner was on the faculty of the University of Illinois, University of Illinois at Chicago, University of California, Riverside, the CUNY Graduate Center and Baruch College (CUNY).

Dr. Kaestner received his Ph.D. in Economics from the City University of New York. He received his BA and MA from Binghamton University (SUNY).

Dr. Kaestner's areas of research interest are the economic and social determinants of health, health demography, and health, labor and social policy evaluation. He has published over 125 articles in academic journals. Recent studies have been awarded Article of the Year by AcademyHealth in 2011 and the 2012 Frank R. Breul Memorial Prize for the best publication in Social Services Review. Dr. Kaestner has also been the Principal Investigator on several NIH grants focused on Medicare and Medicaid policy.

Dr. Kaestner is an Associate Editor of the Journal of Health Economics and the American Journal of Health Economics, and on the Editorial Board of Demography and Journal of Policy Analysis & Management.

Ariel Kalil is a Professor at the University of Chicago Harris School of Public Policy, where she directs the Center for Human Potential and Public Policy. She also holds an appointment as an Adjunct Professor at the University of Stavanger, Norway, in the Department of Business Administration. She is a developmental psychologist who studies how economic conditions and parents’ socioeconomic status affect child development and parental behavior. Her recent projects have examined the relationship between parental education and time with children, the effects of the Great Recession on parental behavior and child development, and the association between income inequality and children's educational attainment. Kalil received her PhD in developmental psychology from the University of Michigan. Before joining Chicago Harris’s faculty in 1999, she completed a postdoctoral fellowship at the University of Michigan’s National Poverty Center. Kalil has received the William T. Grant Foundation Faculty Scholars Award, the Changing Faces of America’s Children Young Scholars Award from the Foundation for Child Development, the National Academy of Education/Spencer Postdoctoral Fellowship, and in 2003 she was the first-ever recipient of the Society for Research in Child Development (SRCD) Award for Early Research Contributions. Her current work is funded by NICHD and by the MacArthur and Russell Sage Foundations.

Ryan Kellogg is a professor and Deputy Dean for Academic Programs at the University of Chicago Harris School of Public Policy and is a research associate at the National Bureau for Economic Research. His research bridges industrial organization, energy economics, and environmental policy, focusing on the economics of resource extraction and on the transportation sector. Kellogg’s publications examine topics such as the response of investment to uncertainty, the economic consequences of the shale gas boom, the effectiveness of policies to reduce emissions from the transportation sector, factors affecting households’ vehicle demand, and the nature of firms’ and households’ beliefs about future oil and refined product prices. In ongoing work, he is studying the economics of private mineral leases for shale gas and the economics of fuel economy standards when future gasoline prices are uncertain.

Kellogg earned a PhD in Agricultural and Resource Economics from the University of California, Berkeley, in 2008. Prior to his graduate studies, he worked for BP in Houston, TX, and Anchorag, AK, for four years as an
engineer and economic analyst. Kellogg earned a BS in Chemical Engineering and a BA in Economics from Rice University in 1999. He grew up outside of Cleveland, OH.

Dmitri Kostas is an Assistant Professor at the University of Chicago Harris School of Public Policy. He received his Ph.D. in Economics from the University of California, Berkeley in 2018. His research covers a variety of topics in labor economics and macroeconomics. An important vein of his research focuses on measuring and understanding the reasons why households participate in alternative work arrangements like the gig economy. To this end, his research pioneers new and innovative datasets, including microtransactions from an online personal financial aggregator and bill-paying application, IRS tax returns, and direct partnerships with technology companies.

John A. List is the Kenneth C. Griffin Distinguished Service Professor in Economics at the University of Chicago. He received his B.S. in economics at the University of Wisconsin-Stevens Point, and Ph.D. in economics at the University of Wyoming. List joined the UChicago faculty in 2005, and served as Chairman of the Department of Economics from 2012-2018. Prior to joining the University of Chicago, he was a professor at the University of Central Florida, University of Arizona, and University of Maryland.

List was elected a Member of the American Academy of Arts and Sciences in 2011, and a Fellow of the Econometric Society in 2015. He also received the Arrow Prize for Senior Economists in 2008, the Kenneth Galbraith Award in 2010, the Yrjo Jahnsson Lecture Prize in 2012, and the Klein Lecture Prize in 2016. He received an honorary doctorate from Tilburg University in 2014, and from the University of Ottawa in 2017. John was also named a Top 50 Innovator in the Non-Profit Times for 2015 and 2016 for his work on charitable giving. He also served in the White House on the Council of Economic Advisers from 2002-2003, and is a Research Associate at the NBER.

His research focuses on questions in microeconomics, with a particular emphasis on using field experiments to address both positive and normative issues. For decades his field experimental research has focused on issues related to the inner-workings of markets, the effects of various incentives schemes on market equilibria and allocations, how behavioral economics can augment the standard economic model, on early childhood education and interventions, and most recently on the gender earnings gap in the gig economy (using evidence from rideshare drivers).

His research includes over 200 peer-reviewed journal articles and several published books, including the 2013 international best-seller, The Why Axis: Hidden Motives and the Undiscovered Economics of Everyday Life (with Uri Gneezy).

Jens Ludwig is the McCormick Foundation Professor of Social Service Administration, Law, and Public Policy in the School of Social Service Administration and the Harris School of Public Policy, director of the University of Chicago Crime Lab, and co-director of the University of Chicago Urban Education Lab. He also serves as a non-resident senior fellow in economic studies at the Brookings Institution, research associate of the National Bureau of Economic Research (NBER), and co-director of the NBER’s working group on the economics of crime. His research focuses on social policy, particularly in the areas of urban poverty, crime, and education.

In the area of urban poverty, Ludwig has participated since 1995 on the evaluation of a HUD-funded randomized residential-mobility experiment known as Moving to Opportunity (MTO), which provides low-income public housing families the opportunity to relocate to private-market housing in less disadvantaged neighborhoods. In the area of crime, Ludwig has written extensively about gun-violence prevention. Through the Crime Lab he is also involved in partnering with policymakers in Chicago and across the country to carry out large-scale policy experiments to identify effective (and cost-effective) ways to help prevent crime and violence. In the area of education he has written extensively about early childhood interventions, and about the role of social conditions in affecting children’s schooling outcomes.

His research has been published in leading scientific journals across a range of disciplines including Science, New England Journal of Medicine, Journal of the American Medical Association, American Economic Review, Quarterly Journal of Economics, the Economic Journal, and the American Journal of Sociology. His co-authored article on race, peer norms, and education with Philip Cook was awarded the Vernon Prize for best article in the Journal of Policy Analysis and Management. He is also co-author with Cook of Gun Violence: The Real Costs (Oxford University Press, 2000), co-editor with Cook of Evaluating Gun Policy (Brookings Institution Press, 2003), and co-editor with Cook and Justin McCrary of Controlling Crime: Strategies and Tradeoffs (University of Chicago Press, 2012).

Prior to coming to Chicago Harris, Ludwig was a professor of public policy at Georgetown University. He is currently on the editorial boards of American Economic Journal: Policy, the Journal of Quantitative Criminology, and the Journal of Policy Analysis and Management, and was formerly co-editor of the Journal of Human Resources. In 2012 he was elected vice president of the Association for Public Policy Analysis and Management.
Meltzer is a research associate of the National Bureau of Economic Research, elected member of the American
National Institute for Health Care Management, and the Eugene Garfield Award from Research America.

and on using behavioral insights to help low-income adults become better parents.

parental income on children’s well-being. She is currently doing research on intergenerational economic mobility
and on using behavioral insights to help low-income adults become better parents.

Mayer has been a member of the Institutes of Medicine, National Research Council, Board on Children,
Youth and Families, the Board of Directors of Chapin Hall Center for Children and the Board of Advisors, for the
Pew Charitable Trust Economic Mobility Project. She has also been a member of the General Accounting Office
Educators’ Advisory Panel, the National Academy of Sciences Committee on National Statistics Panel to Review
U.S. Department of Agriculture’s Measurement of Food Insecurity and Hunger, and the Committee on Standards
of Evidence and the Quality of Behavioral and Social Sciences Research. Mayer has an honorary Doctor of Laws
degree conferred by Lake Forest College. Mayer is the past director and deputy director of the Northwestern
University/University of Chicago Joint Center for Poverty Research. She has served as an associate editor for the
American Journal of Sociology.

Luis Martinez is an assistant professor at the University of Chicago Harris School of Public Policy. He is mainly
interested in topics related to the political economy of development, particularly the relationship between
taxation, accountability, and governance.

His current research uses sub-national data from Colombian municipalities to study the way in which the
source of government revenue (taxes v.s. oil royalties) affects public good provision and the misbehavior of local
public officials. In previous related work, he has provided laboratory evidence on people’s tendency to make
riskier choices when handling easily-gotten windfall income. He is also currently studying the effects on conflict

Dr. Marlowe received a Ph.D. in political science from the University of Wisconsin-Milwaukee, and is a Certified Government Financial Manager. In 2018 he was elected to the National Academy of Public Administration. He also serves as a Senior Fellow at the Center for Digital Government. Prior to joining Harris, he was on the faculty at the University of Washington and the University of Kansas.

Luis Martinez received a BA in economics and philosophy (summa cum laude) from Los Andes University and an MRes (with distinction) and PhD in economics from the London School of Economics.

Susan E. Mayer, a professor emeritus at the University of Chicago Harris School of Public Policy and the
College, served as dean of Chicago Harris from 2002 to 2009. She has published numerous articles and book
chapters on the measurement of poverty, the effect of growing up in poor neighborhoods, and the effect of
parental income on children’s well-being. She is currently doing research on intergenerational economic mobility
and on using behavioral insights to help low-income adults become better parents.

Mayer has been a member of the Institutes of Medicine, National Research Council, Board on Children,
Youth and Families, the Board of Directors of Chapin Hall Center for Children and the Board of Advisors, for the
Pew Charitable Trust Economic Mobility Project. She has also been a member of the General Accounting Office
Educators’ Advisory Panel, the National Academy of Sciences Committee on National Statistics Panel to Review
U.S. Department of Agriculture’s Measurement of Food Insecurity and Hunger, and the Committee on Standards

American Journal of Sociology.

David O. Meltzer is Chief of the Section of Hospital Medicine, Director of the Center for Health and the
Social Sciences, and Chair of the Committee on Clinical and Translational Science at The University of Chicago,
where he is Associate Professor in the Department of Medicine, and affiliated faculty of Chicago Harris and the
Department of Economics. Meltzer’s research explores problems in health economics and public policy with a
focus on the theoretical foundations of medical cost-effectiveness analysis and the cost and quality of hospital
care. Meltzer has performed randomized trials comparing the use of doctors who specialize in inpatient care
(“hospitalists”). He is currently leading a Centers for Medicaid and Medicare Innovation Challenge award to
study the effects of improved continuity in the doctor patient relationship between the inpatient and outpatient
setting on the costs and outcomes of care for frequently hospitalized Medicare patients. He led the formation
of the Chicago Learning Effectiveness Advancement Research Network (Chicago LEARN) that helped pioneer

collaboration of Chicago-Area academic medical centers in hospital-based comparative effectiveness research and the recent support of the Chicago Area Patient Centered Outcomes Research Network (CAPtriCORN) by the Patient Centered Outcomes Research Institute (PCORI).

Meltzer received his MD and PhD in economics from the University of Chicago and completed his residency
in internal medicine at Brigham and Women’s Hospital in Boston. Meltzer is the recipient of numerous awards,
including the Lee Lusted Prize of the Society for Medical Decision Making, the Health Care Research Award of
the National Institute for Health Care Management, and the Eugene Garfield Award from Research America.
Meltzer is a research associate of the National Bureau of Economic Research, elected member of the American
Eduardo Montero is an Assistant Professor at the Harris School of Public Policy at the University of Chicago. Originally from Costa Rica, his research centers on understanding how institutions and culture affect development and development policy in Central America and Central Africa. His broader interests relate to development economics, political economy, economic history, and the intersections between these interrelated topics.

Eduardo is a Faculty Research Fellow with the National Bureau of Economic Research (NBER) and an affiliate with the Bureau for Research and Economic Analysis of Development (BREAD). Eduardo graduated from Stanford University with a BA in economics in 2010 and an MS in statistics in 2011. He earned his Ph.D. in economics from Harvard University in 2018.
Daniel Moskowitz is an Assistant Professor at the University of Chicago Harris School of Public Policy. His research examines how the media and electoral institutions shape the behavior of voters and elite actors, and it assesses the consequences of these institutions on accountability and political representation. In particular, his research focuses on electoral politics, redistricting, media and politics, partisan polarization, the U.S. Congress, and political parties.

Before joining Harris, Moskowitz received his Ph.D. from Harvard University and B.A. from Grinnell College. Prior to graduate school, he worked at the Brookings Institution and the Office of the Comptroller of the Currency in the Department of the Treasury.

Roger Myerson is the David L. Pearson Distinguished Service Professor of Global Conflict Studies and formerly the Glen A. Lloyd Distinguished Service Professor of Economics at the University of Chicago. Professor Myerson has made seminal contributions to the fields of economics and political science. In game theory, he introduced refinements of Nash's equilibrium concept, and he developed techniques to characterize the effects of communication when individuals have different information. His analysis of incentive constraints in economic communication introduced some of the fundamental ideas in mechanism design theory, including the revelation principle and the revenue-equivalence theorem in auctions and bargaining. Professor Myerson has also applied game-theoretic tools to political science, analyzing how political incentives can be affected by different electoral systems and constitutional structures.

Myerson is the author of Game Theory: Analysis of Conflict (1991) and Probability Models for Economic Decisions (2005). He also has published numerous articles in Econometrica, the Journal of Economic Theory, Games and Decisions, and the International Journal of Game Theory, for which he served as an editorial board member for 10 years.

Professor Myerson has a PhD from Harvard University and taught for 25 years in the Kellogg School of Management at Northwestern University before coming to the University of Chicago in 2001. He is a member of the American Academy of Arts and Sciences and of the National Academy of Sciences. He was awarded the 2007 Nobel Memorial Prize in Economic Sciences in recognition of his contributions to mechanism design theory.

Colm A. O’Muircheartaigh is a professor and previous dean of the University of Chicago Harris School of Public Policy, as well as a senior fellow in the National Opinion Research Center (NORC). O’Muircheartaigh’s research encompasses survey sample design, measurement errors in surveys, cognitive aspects of question wording, and latent variable models for nonresponse. He is principal investigator on the National Science Foundation’s (NSF) Internet Panel Recruitment Survey, and co-principal investigator on NSF’s Data Research and Development Center and the National Institute on Aging’s National Social Life, Health and Aging Project (NSHAP). He is also responsible for the development of methodological innovations in sample design for NORC’s face-to-face surveys in the U.S.

He joined Chicago Harris from the London School of Economics and Political Science (LSE), where he was the first director of the Methodology Institute, the center for research and training in social science methodology, and a faculty member of the Department of Statistics since 1971. He has also taught at a number of other institutions, having served as a visiting professor at the Universities of Padova, Perugia, Firenze, and Bologna, and, since 1975, has taught at the Summer Institute of the University of Michigan’s Institute for Social Research.

Formerly president of the International Association of Survey Statisticians and a council member of the International Statistical Institute, O’Muircheartaigh is actively involved in these and a number of other professional bodies. He is a member of the U.S. Census Bureau Federal Advisory Committee of Professional Associations (chair of the statistics subcommittee), a member of the Advisory Boards of the Panel Study on Income Dynamics (PSID) and the National Longitudinal Study of Adolescent Health (Add Health), and a member of the National Academies Panel on Residence Rules for the 2010 Census. He is a fellow of the Royal Statistical Society, a fellow of the American Statistical Association, and an elected member of the International Statistical Institute. He has served as a consultant to a wide range of public and commercial organizations in the United States, the United Kingdom, Ireland, Italy, and the Netherlands. Through his work with the United Nations (FAO, UNDP, UNESCO), OECD, the Commission of the European Communities, the International Association for Educational Assessment (IEA), and others, O’Muircheartaigh has also worked in China, Myan Mar, Kenya, Lesotho, and Peru.

Carolin Pflueger is an assistant professor at the University of Chicago Harris School of Public Policy. She is also a Faculty Research Fellow at the National Bureau of Economic Research. Her research is at the intersection of macroeconomics and finance, with a particular focus on understanding the fiscal and monetary policy drivers of bond markets.

On the theory side, she has proposed a new integrated model of macroeconomic dynamics for stocks and bonds. On the empirical side she has worked on developing a new measure of risk appetite for the macroeconomy. She is also interested in understanding how the interdependence of fiscal and monetary policy theory can raise governments’ cost of borrowing, especially in emerging markets.

Her research has been published in leading journals such as the Journal of Finance, the Journal of Financial Economics, and the Journal of Monetary Economics. She won the Arthur Warga Award for the Best Paper in Fixed Income at the SFS Cavalcade 2014 and was a finalist for the AQR Insight Award 2018. Her work is policy
relevant and has been presented at the Federal Reserve Board, the US Treasury Department, and the Bank of Canada, and has been influential for asset allocation at the Norwegian sovereign wealth fund.

She received her PhD in Business Economics from Harvard in 2012 and was an Assistant Professor of Finance at the University of British Columbia from 2012 until 2019. She previously held visiting positions at the Becker-Friedman Institute at the University of Chicago, Stanford University, MIT Sloan, Brown University, and the San Francisco Federal Reserve.

**Tomas J. Philipson** is the Daniel Levin Professor of Public Policy Studies in the Irving B. Harris Graduate School of Public Policy at The University of Chicago. He is an associate member of the Department of Economics and a former senior lecturer at the Law School. His research focuses on health economics, and he teaches Masters and PhD courses in microeconomics and health economics at the University.

Philipson was born and raised in Sweden where he obtained his undergraduate degree in mathematics at Uppsala University. He received his MA and PhD in economics from the Wharton School and the University of Pennsylvania. He was a visiting faculty member at Yale University in the academic year 1994-95 and a visiting fellow at the World Bank in the winter of 2003.

Philipson has served in several public sector positions. He served in the second Bush Administration as the senior economic advisor to the head of the Food and Drug Administration (FDA) during 2003-04 and subsequently as the senior economic advisor to the head of the Centers for Medicare and Medicaid Services (CMS) in 2004-05. He served as a senior health care advisor to Senator John McCain during his 2008 campaign for President of the United States. In December of 2010, he was appointed by the Speaker of the US House of Representatives to the Key Indicator Commission. He has also served on the editorial board of the journal Health Economics and The European Journal of Health Economics. His research has been published widely in all leading academic journals of economics such as the American Economic Review, Journal of Political Economy, Quarterly Journal of Economics, Journal of Economic Theory, Journal of Health Economics, Health Affairs, and Econometrica.

Philipson is a fellow, board member, or associate of a number of other organizations outside the University, including the National Bureau of Economic Research, the American Enterprise Institute, the Manhattan Institute (where he is chairman of Project FDA (http://www.manhattan-institute.org/projectfda/)), the Heartland Institute, the Milken Institute, the RAND Corporation, and the USC Shaeffer Center for Health Economics and Policy. At the University of Chicago, he is affiliated with the John M. Olin Program of Law & Economics, the George J. Stigler Center for the Study of the Economy and the State, the Northwestern/University of Chicago Joint Center for Poverty Research, the Population Research Center, and the National Opinion Research Center (NORC). He was a member of the University-wide Council on Research in 2000-02 and is currently a member of the Advisory Committee to the University’s Office of Intellectual Property and Technology Transfer (UCTech).

Philipson has served in several public sector positions. He served in the second Bush Administration as the senior economic advisor to the head of the Food and Drug Administration (FDA) during 2003-04 and subsequently as the senior economic advisor to the head of the Centers for Medicare and Medicaid Services (CMS) in 2004-05. He served as a senior health care advisor to Senator John McCain during his 2008 campaign for President of the United States. In December of 2010, he was appointed by the Speaker of the US House of Representatives to the Key Indicator Commission. He has also served on the editorial board of the journal Health Economics and The European Journal of Health Economics. His research has been published widely in all leading academic journals of economics such as the American Economic Review, Journal of Political Economy, Quarterly Journal of Economics, Journal of Economic Theory, Journal of Health Economics, Health Affairs, and Econometrica.

Philipson is the recipient of numerous international and national research awards. He has twice (in 2000 and 2006) been the recipient of the highest honor of his field: the Kenneth Arrow Award of the International Health Economics Association (for best paper in the field of health economics). In addition, he was awarded the Garfield Award by Research America in 2007 (for best paper in the field of health economics), The Prêmio Haralambos Simeonidis award from the Brazilian Economic Association in 2006 (for best paper in any field), and the Distinguished Economic Research Award from the Milken Institute in 2003 (for best paper in any field of economics). Philipson has been awarded numerous grants and awards from both public and private agencies, including the National Institutes of Health, the National Science Foundation, the Rockefeller Foundation, the Alfred P. Sloan Foundation, the John M. Olin Foundation, and the Royal Swedish Academy of Sciences.

Philipson is a founding editor of the journal Forums for Health Economics & Policy of Berkeley Electronic Press and has been on the editorial board of the journal Health Economics and The European Journal of Health Economics. His research has been published widely in all leading academic journals of economics such as the American Economic Review, Journal of Political Economy, Quarterly Journal of Economics, Journal of Economic Theory, Journal of Health Economics, Health Affairs, and Econometrica.

Philipson is a fellow, board member, or associate of a number of other organizations outside the University, including the National Bureau of Economic Research, the American Enterprise Institute, the Manhattan Institute (where he is chairman of Project FDA (http://www.manhattan-institute.org/projectfda/)), the Heartland Institute, the Milken Institute, the RAND Corporation, and the USC Shaeffer Center for Health Economics and Policy. At the University of Chicago, he is affiliated with the John M. Olin Program of Law & Economics, the George J. Stigler Center for the Study of the Economy and the State, the Northwestern/University of Chicago Joint Center for Poverty Research, the Population Research Center, and the National Opinion Research Center (NORC). He was a member of the University-wide Council on Research in 2000-02 and is currently a member of the Advisory Committee to the University’s Office of Intellectual Property and Technology Transfer (UCTech).

Philipson has served in several public sector positions. He served in the second Bush Administration as the senior economic advisor to the head of the Food and Drug Administration (FDA) during 2003-04 and subsequently as the senior economic advisor to the head of the Centers for Medicare and Medicaid Services (CMS) in 2004-05. He served as a senior health care advisor to Senator John McCain during his 2008 campaign for President of the United States. In December of 2010, he was appointed by the Speaker of the US House of Representatives to the Key Indicator Commission. He has also served on the editorial board of the journal Health Economics and The European Journal of Health Economics. His research has been published widely in all leading academic journals of economics such as the American Economic Review, Journal of Political Economy, Quarterly Journal of Economics, Journal of Economic Theory, Journal of Health Economics, Health Affairs, and Econometrica.

Philipson has done executive consulting for both private corporations, including many U.S. Fortune 100 companies, as well as government organizations domestically and internationally. This has included work for the President’s Council on Science and Technology, the National Academy of Sciences, and the UK National Health Service. It has also included work for multi-lateral organizations such as the World Bank, the World Intellectual Property Organization, and the OECD. He is the co-founder of Precision Heath Economics LLC, on the honorary board of directors of the internet-based consulting firm the Round Table Group, on the board of directors of MedErr Inc, on the board of the Center for Medicine in the Public Interest, on the council of advisors for the Gerson-Lehrman Group, and a consultant for Compass-Lexecon, Bates White, and Analysis Group.

Philipson is a dual citizen of the United States and Sweden and before leaving Sweden served in its army and played volleyball at the national team level.
Guillaume Poulion is an Assistant Professor at the University of Chicago Harris School of Public Policy. His research focuses on developing statistical methods for nonstandard problems in public policy and economics, the extension of machine learning methods for applications in public policy, and problems at the interface of econometrics and optimization.

Poulion received his PhD from Harvard University. Previously, he received his B.A. (Honors) in economics as well as his M.S. (concurrent) in statistics from the University of Chicago.

Stephen Raudenbush is Lewis-Sebring Distinguished Service Professor, Department of Sociology and the College; Chair; Committee on Education

James Robinson is a University Professor at the Harris School of Public Policy at the University of Chicago. He was formerly the Wilbur A. Cowett Professor of Government at Harvard University. He studied economics at the London School of Economics, the University of Warwick and Yale University. He previously taught in the Department of Economics at the University of Melbourne, the University of Southern California and before moving to Harvard was a Professor in the Departments of Economics and Political Science at the University of California at Berkeley. His main research interests are in comparative economic and political development with a focus on the long-run with a particular interest in Latin America and Sub-Saharan Africa. He is currently conducting research in the Democratic Republic of the Congo, Sierra Leone, Haiti and in Colombia where he has taught for many years during the summer at the University of the Andes in Bogotá.

Robert Rosner is a theoretical physicist, on the faculty of the University of Chicago since 1987, where he is the William E. Wrafter Distinguished Service Professor in the departments of Astronomy & Astrophysics and Physics, as well as in the Enrico Fermi Institute and the Harris School of Public Policy Studies. He served as Argonne National Laboratory’s Chief Scientist and Associate Laboratory Director for Physical, Biological and Computational Sciences (2002-05), and was Argonne's Laboratory Director from 2005-09; he was the founding chair of the U.S. Department of Energy’s National Laboratory Directors’ Council (2007-09). His degrees are all in physics (BA, Brandeis University; PhD, Harvard University). He was elected to the American Academy of Arts and Sciences in 2001, and to the Norwegian Academy of Science and Letters (as a Foreign Member) in 2004; he is also a Fellow of the American Physical Society. Most of his scientific work has been related to fluid dynamics and plasma physics problems, as well as in applied mathematics and computational physics, especially in the development of modern high-performance computer simulation tools, with a particular interest in complex systems (ranging from astrophysical systems to nuclear fission reactors). Within the past few years, he has been increasingly involved in energy technologies, and in the public policy issues that relate to the development and deployment of various energy production and consumption technologies, including especially nuclear energy, the electrification of transport, and energy use in urban environments. He is the founding director of the Energy Policy Institute at Chicago (EPIC), located at the Harris School of Public Policy Studies and Booth School of Business of the University of Chicago.

Raj Sah is a professor at the University of Chicago Harris School of Public Policy and the College, and an associated faculty member in the Department of Economics. He has previously taught at the Massachusetts Institute of Technology, Yale University, Princeton University, and the University of Pennsylvania. He received a PhD in economics from the University of Pennsylvania, and an MBA from the Indian Institute of Management, Ahmedabad.

He has written on the nature and consequences of human fallibility. His work in this area has been applied in many different contexts, including the architecture of organizations, comparison of alternative economic systems, decentralization of leadership and authority, and several branches of management sciences.

A long-term research interest of Sah is taxation and public finance. In this area he has studied several themes, one being the conflicts over resources that arise in the process of societal modernization. Such conflicts include those between rural and urban populations, which are seen in many of today’s poorer countries. Some of this research is presented in the book Peasants Versus City-Dwellers, written jointly with Joseph Stiglitz (Oxford paperback, 2002).

He has written on a number of other topics, including social osmosis. This deals with how people form their perceptions of current social realities and how these perceptions shape future realities, often leading to outcomes quite different from those predicted by conventional economic approaches. He has applied this perspective to the study of the large differences in the levels of crime and corruption observed between various societies. In the past, Sah has advised many financial institutions and governments. He has received several honors for his teaching, including three at the University of Chicago.

Raul Sanchez de la Sierra is an assistant professor at the University of Chicago Harris School of Public policy. His research focus areas include development economics, political economy, and conflict. He conducts most of his research in areas of the Democratic Republic of Congo (DRC), where the central state is especially weak. There, he looks at the organization of society, the economics and psychology of armed groups, the emergence of state functions, and the economics of organized corruption working closely with these actors, while also gathering detailed data for statistical analysis.

Sánchez de la Sierra earned his PhD in economics from Columbia University in 2014. He holds an MS in development economics from Sciences-Po, Paris and a BS in economics from Carlos III Madrid, in conjunction
with the Ludwig-Maximilians Universitaet of Munich. Prior to joining Harris, Sánchez de la Sierra was proudly Assistant Professor at UC Berkeley, in the political economy focused BPP group at the Haas School of Business. He is a research fellow at the Center for Effective Global Action (CEGA), the International Growth Centre (IGC), the Abdul Latif Jameel Poverty Action Lab (JPAL) - Conflict and Violence Initiative, the National Bureau of Economic Research (NBER) – Political Economy, a distinguished fellow at the Center for Economic Studies ifo (CESifo) – Applied Microeconomics, and an alumni of the CIFAR Azrieli global scholars program and the Harvard Academy for International and Area Studies. He co-founded Marakuya Kivu Research, focused on collecting data in weak state areas while providing career enhancing opportunities to young Congolese individuals and ex-combatants. His work is part of the Congo Calling documentary, which was nominated in 2019 for the best German documentary award. Raúl is originally from Spain, and lived half of his life in France, and continues to do work and travel to the DRC.

Michael Schnabel is a Research Associate and Assistant Professor at the University of Chicago Harris School of Public Policy. He applies methods and ideas of statistical physics and neuroscience to model collective decision-making in social systems. His current research topics include opinion formation, deliberative democracy, and cognitive models of decision-making.

Michael received his PhD in physics from Goettingen University in Germany. Prior to joining the University of Chicago, he was a research scholar at Northwestern University where he worked in the areas of systems biology and complex networks.

Konstantin Sonin is John Dewey Distinguished Service Professor at the University of Chicago Harris School of Public Policy. His research interests include political economics, development, and economic theory. His papers have been published in leading academic journals in economics such as the Quarterly Journal of Economics, American Economic Review, Journal of Political Economy, Review of Economic Studies and political science such as American Political Science Review and American Journal of Political Science.

In addition to his academic work, Sonin writes a blog on Russian political and economic issues and a fortnightly column for the Russian-language newspaper Vedomosti, and contributed to all major Russian media. In 2012, he was an economic advisor to the presidential campaign of Mikhail Prokhorov.

Sonin earned an MSc and PhD in mathematics from Moscow State University and an MA in economics at Moscow’s New Economic School, was a postdoctoral fellow at Harvard University’s Davis Center for Russian and Eurasian Studies, served on the faculty of the New Economic School (NES) and Higher School of Economics (HSE) in Moscow, and was also a member of the Institute for Advanced Study in Princeton.

As an NES and then HSE vice-rector, Sonin was a founder of the HSE-NES joint undergraduate program, and overseen HSE international recruitment effort in 15 disciplines. Now he is affiliated with HSE and Stockholm Institute of Transition Economics as a visiting professor and adviser.

Shaoda Wang is an Assistant Professor at the University of Chicago Harris School of Public Policy. He is an applied economist with research interests in development economics, environmental economics, and political economy. His main research agenda aims at understanding the political economy of public policy (design, implementation, effectiveness), with a regional focus on China.

He holds a BA from Peking University, and a PhD from the University of California, Berkeley. Prior to joining Harris, he was a Postdoctoral Scholar in the Department of Economics and Energy Policy Institute (EPIC) at the University of Chicago.

Kim Wolske is a research associate and assistant professor at the University of Chicago Harris School of Public Policy and a fellow with the Energy Policy Institute at the University of Chicago (EPIC). Her work draws on the fields of environmental, social, and cognitive psychology to examine the behavioral dimensions of energy issues, with an eye toward improving the design of public-facing policies and programs. Most recently she collaborated with the National Renewable Energy Laboratory as part of the Department of Energy’s Sunshot Initiative to investigate strategies for lowering the soft costs of residential rooftop solar. Other research examines how different ways of framing climate change solutions may influence public perceptions of the issue and support for mitigation and adaption policies.

Wolske previously worked as a researcher with the Erb Institute for Global Sustainable Enterprise and as an independent consultant to Opower. She received a BA in environmental studies from Connecticut College, an MS in natural resource policy and behavior from the School of Natural Resources & Environment at the University of Michigan, and a PhD in environmental psychology also from the University of Michigan.

Paula R. Worthington is a senior lecturer at the University of Chicago Harris School of Public Policy, where she teaches classes in state and local public finance and cost-benefit analysis. At Harris, she is actively involved in teaching, advising, and programming as part of the Municipal Finance Certificate program and related initiatives. She received her PhD in economics from Northwestern University in 1988; has served as an economist at the Federal Reserve Bank of New York and as a research officer, economic advisor, and senior research economist at the Federal Reserve Bank of Chicago; and has published articles in academic journals, Federal Reserve publications, and other outlets. Immediately prior to joining Chicago Harris, Worthington taught as a lecturer in the economics department at Northwestern University. Her recent service activities include
membership on the Metropolitan Planning Council’s Regional Planning and Investments Committee (2010-present); the Illinois Tax Foundation’s Research Advisory Council (2009-present); the Chicago Metropolitan Agency for Planning’s Financial Plan Resource Group (2008-2009); and Evanston/Skokie School District 65’s Citizens’ Budget Committee (2003-2004). Worthington is an eight-time recipient of the Chicago Harris Public Policy Student Association’s Best Teacher in a Non-Core Class Award.

**Austin Wright** is an assistant professor of public policy at the University of Chicago Harris School of Public Policy. He is a faculty affiliate of The Pearson Institute for the Study and Resolution of Global Conflicts, the Empirical Studies of Conflict Project, and non-resident fellow of the Liechtenstein Institute. His research leverages microlevel data to study the political economy of conflict and crime in Afghanistan, Colombia, Indonesia, and Iraq. His work is supported by the National Science Foundation, Niehaus Center for Global Governance, The Asia Foundation, and World Bank. He received his BA in Government and Sociology and BS in Communication Sciences from The University of Texas at Austin and his MA and PhD in Politics from Princeton University.

**Adam Zelizer** is an assistant professor at the University of Chicago Harris School of Public Policy. He studies legislative politics, with a focus on causal inference. His research examines how legislators make decisions – for example, how they acquire expertise from policy research and influence one another through deliberation – and the effects of individual decision-making processes on policy outcomes. One goal of this research is to figure out which legislative processes work, in the sense of leading to more informed, effective, and broadly-supported public policies, and which don't.

He received his Ph.D. in Political Science from Columbia University in 2018. He also holds a BA in Political Economy from Columbia University. He joins Harris as an Assistant Professor after spending a year as a postdoctoral researcher and instructor at Harris, during which he taught Analytical Politics II and Field Experiments for Public Policy. His research has been supported by the National Science Foundation, Russell Sage Foundation, Cato Institute, Open Society Foundations, and Abdul Latif Jameel Poverty Action Lab.
ADMINISTRATION AND FACULTY

Academic Administration
Katherine Baicker, Ph.D, Dean and Professor
Ryan Kellogg, Ph.D., Deputy Dean and Professor
Ethan Bueno de Mesquita, Ph.D., Deputy Dean and Professor
Jeremy Edwards, Senior Associate Dean, Professional and Career Development
Kate Shannon Biddle, Dean of Students
Katie Meyer, Senior Director of Faculty Affairs

For full staff listing, please visit the Harris Staff Directory (http://harris.uchicago.edu/directory/staff/).

Faculty, Lecturers, Senior Fellows, and Emeritus Professors
Please visit the Harris Directory (https://harris.uchicago.edu/directory/) for the most current listing of Lecturers, Senior Fellows, and Emeritus Professors.
Beyond the Classroom

The University of Chicago was founded in the belief that scholarship should be put to work for the social good. Harris continues this practice by providing opportunities for students to apply classroom learning to real-life problems, and to enrich classroom learning through professional relationships with policymakers.

Practical Experience

Several programs at Harris are designed to bridge students’ classroom experience with the policy experience of the real world, and to connect the larger policymaking community with the School’s programs and activities. Harris believes that practical application of skills and professional development are an essential aspect of public policy training, enabling students to become effective leaders and make a difference in the world around them.

Policy Labs and Practica

Policy Labs and practica provide students with firsthand experience of the institutional, economic, and political forces that shape public policy. Through team projects, students are able to analyze and evaluate programs, develop and administer surveys, conduct needs assessments, and engage in other policy relevant research programs. In addition to practical experience, the projects provide a valuable service for the sponsoring agencies. Policy Labs are faculty-supervised team projects completed for a client organization during the school year. Students are selected through an application process and earn course credit.

Mentor Program

Since its founding in 1988, the Harris School of Public Policy has featured a unique Mentor Program that matches graduate students with leading policy professionals. The program serves master’s students throughout their entire enrollment - first in group mentoring and then in individual mentor matches. All Harris master’s students are eligible to sign up for the mentor program.

Research Opportunities

Faculty and student research at Harris is guided not only by theoretical interests, but also by a strong commitment to solving enduring public policy problems. Students are frequently involved in faculty research through research assistantships, coursework, independent studies, and research centers housed at the School and throughout the campus.
Resources and Services

Students who attend Harris join a community of scholars responsible for pioneering the field of sociology, discovering the structure of DNA, and calculating the speed of light. UChicago is a community of scholars comprised of more than 80 Nobel laureates, one that leads the nation in Fulbright-Hays fellowships.

The path of a graduate student will be dotted with achievements and successes, challenges and struggles. However, there is an entire campus and community here to support Harris students. Below is a compilation of University Resources.

UChicago Grad

UChicago Grad supports UChicago graduate students in every stage of their academic careers. Access resources - including programs, training, support, and funding opportunities - that support timely degree completion and enhance professional preparation. For more information about GSA, visit grad.uchicago.edu. (http://grad.uchicago.edu)

The Graduate Council

The Graduate Council (GC) is the representative student government for the graduate students at the University of Chicago. The GC works to connect graduate students, to support graduate academic and professional interests, and to engage with the University’s administration. GC meeting are held on Monday evenings and are open to the entire community. For more information about GC, visit http://gc.uchicago.edu.

Campus and Student Life

Campus and Student Life (CSL) is dedicated to helping graduate students experience university life at its fullest. They have a profound commitment to the diversity of our community and are focused on creating an environment where students can thrive. Through a wide array of programs and services, CSL provides opportunities and experiences that build community, help with professional growth, and create a place that students can call home now and throughout their lives. For more information about CSL, visit https://csl.uchicago.edu.

Campus Jobs

Students who have been awarded federal work study or are interested in on-campus student employment, can apply for a job through the student jobs board. CNet ID and password is required for login. Browse jobs » (https://studentemployment.uchicago.edu/)
