Dear Faculty:

As has been recently announced, work is underway to develop new departmental & graduate program websites in the BSD. These websites will feature updated profiles for each faculty member in a department or program. Rather than relying on manual data entry to populate each website in which a faculty member appears, we are leveraging ProfilesRNS to populate these websites.

To meet our deadlines and ensure your profile is complete and up to date when the new websites go live, if you have not yet done so, please log into ProfilesRNS and update your information by July 1st.

For those who have already updated their Profiles page recently, no further action is needed.

If you have not yet updated your ProfilesRNS page, instructions are as follows:

**STEP 1 – Log on to ProfilesRNS:** Visit the ProfilesRNS website (https://profiles.uchicago.edu/profiles/search/) and in the menu (top left) click on “Edit My Profile”. Log in using your CNET ID and password.

**STEP 2 – Update the Required Information Necessary for the website profile data feeds:**

- **Photo:** Optional unless you are a trainer in a BSD graduate program. (For trainers in the graduate program upload a square headshot with the following specifications: 400 x 400 pixels with at least 72 DPI.)

- **Faculty Websites:** Add a link to your lab website (if you have one) or other relevant external websites. Edit the field that says name of website to say Lastname Lab (e.g. Prince Lab) and add a URL. You may add more than one website/link (e.g. lab website URL and blog URL).

- **Education & Training:** It is recommended you include post-graduate training in the following format:

  From most recent to least recent in the following order: Training Type or degree, Institution, Add’l Specifics (optional) (YEAR(s)), e.g.:

  Postdoctoral Fellowship, University of Chicago, Prince Lab (1995-1998)
  Fellowship, Cleveland Clinic, Interventional Pain Management (1992-1993)
  Residency, University of Iowa, Internal Medicine (1989-1992)
  PhD, Harvard University, Biology (1989)
  MD, Stanford University (1984)
  BS, Smith College, Computer Science (1980)

- **Overview:** This section will appear as your “Research Summary” on the graduate program websites and departmental website. Please note the same text will appear on all graduate program websites in which you are a trainer as well as your departmental website(s).
**Keywords:** Review & edit the research key words that best describe your areas of specialization.

**Publications:** Review & update your publications. For publications to appear most accurately, it is best to add as many initial publications as possible (can be added with Pubmed ID). ProfilesRNS will then attempt to find all other publications for the faculty from Pubmed. All publications which appear in ProfilesRNS will automatically appear on the graduate program website and departmental website including those you manually add. Unfortunately, publications **NOT** in PubMed must be manually added.

**STEP 3 – Update the Optional Information for the Website**

**Awards & honors:** If you would like this section to appear, please add in your awards & honors that you would like to appear on the graduate program & departmental websites.

Please list from most recent to least recent, for example:

- Fellow, American Association for the Advancement of Science (AAAS) (2018)
- University of Chicago Quantrell Award for Excellence in Undergraduate Teaching (2015)
- Elected Member, American Society for Clinical Investigation (2008)

**Final Note:** The format in which your information appears in ProfilesRNS is **NOT** the final format for the webpages but will be the data **source** for the initial set up of the pages.

Search by name or topic:  All Departments

A B C D E F G H I J K L M N O P Q R S T U V W X Y Z

R

Sarosh Rana, MD, MPH
Title: Professor
Department: Obstetrics & Gynecology
Section: Maternal-Fetal Medicine
Research and Scholarly Interests: Angiogenic factors, Precancerosis, Maternal mortality
Websites: Rana Precancerosis Lab

David Randall, PhD
Title: Assistant Professor
Department: Neurology
Research and Scholarly Interests: Supernumerary Distaluses, Thalidomide, Spinal Cord

Glenn C Randall, PhD
Title: Associate Professor
Department: Microbiology
Research and Scholarly Interests: Hepatitis C, Virus Persistence, Viral Nucleic Acid Polarity, Host-Pathogen Interactions
Websites: Randall Lab

Rama Ranganathan, MD, PhD
Title: Professor
Department: Biochemistry & Molecular Biology
Research and Scholarly Interests: Evolution, Protein, Adaptation, Protein Folding, Statistical Analysis, Cellular
Websites: Ranganathan Lab

Workday (HR System)
Sarosh Rana, MD, MPH
Professor of Obstetrics and Gynecology
Chair, Section of Maternal-Fetal Medicine

Clinical Interests: Preeclampsia, Pregnancy & Childbirth, Maternal-Fetal Medicine
High-Risk Pregnancy, Complications in Pregnancy, Targeted Ultrasounds, Maternal-Fetal Medicine, Obstetrics

Research and Scholarly Interests: Angiogenic factors, Preeclampsia, Maternal immunity

UCM Physician Database

Sarosh Rana, MD, PhD, cares for women with high-risk pregnancies. She is an expert in the diagnosis and management of preeclampsia - a condition characterized by high blood pressure during pregnancy. Dr. Rana also performs high-level ultrasound, which provides a greater assessment of the fetus than traditional ultrasounds.

Dr. Rana aims to improve maternal and fetal outcomes through research on preeclampsia. Her research over the last several years has focused on demonstrating clinical utility for angiogenic biomarkers in prediction of adverse outcomes among women with suspected preeclampsia. She is also testing the idea that these biomarkers will prove superior in predicting adverse outcomes, leading to reductions in maternal and fetal deaths related to preeclampsia in developing countries such as Haiti. Dr. Rana performs collaborative research evaluating the relationship between increased levels of angiogenic factors and immediate, as well as future, cardiac performance. Dr. Rana's work has been funded by several notable organizations, including the National Institutes of Health and the American Heart Association.

A dedicated teacher, Dr. Rana trains residents and fellows on the use of ultrasound imaging, as well as the management of women with complex pregnancies. She also serves as a mentor on various clinical, basic science and translational research projects; these mentored research projects have resulted in multiple national and international conference presentations, and published manuscripts.
