Integrating Multiple Information Sources
Step 1

**Locate** one information source (i.e. an image, map, timeline, etc.) and a notecard in your folder. **Look** closely and jot down notes about what you see.
Introduce yourself to a colleague.*
Take turns sharing what you gleaned from your source and identify connections.

* Find someone with a different source.
Step 3

Share your findings with your table group (1-2 min. per partner group) and continue to note interconnections.
