

# CACHET Seminar Series

**Susan Schantz, PhD**

**Beckman Institute for Advanced Science and Technology  
University of Illinois**

## **“Through the Window of a Baby’s Eyes: Associations of Prenatal Phthalate and Phenol Exposures with Early Cognitive Development”**

Susan Schantz is a professor of comparative biosciences at Illinois and an environmental toxicologist. Her research focuses on understanding the effects of endocrine disrupting chemicals on nervous system function during development and aging, two periods when the nervous system is particularly vulnerable to toxic insult. Her approach includes laboratory-based animal studies and parallel epidemiological studies.

**Zoom  
Presentation**

**Thursday  
April 30**

**3:00-4:00 PM**

**Please see  
calendar  
invite for  
Zoom  
information.**
