

# CACHET Seminar Series

## “Systems thinking approaches to environmental health: Findings from the Survey of the Health of Wisconsin (SHOW)”

Kristen Malecki, PhD, MPH  
University of Wisconsin Madison

Kristen Malecki is an Associate Professor in the Department of Population Health Sciences. She has a PhD in Environmental Epidemiology and Health Policy and Masters of Public Health from Johns Hopkins University Bloomberg School of Public Health. Dr. Malecki serves as the Director for the Survey of the Health of Wisconsin (SHOW), overseeing survey implementation efforts and ancillary study development. She has been a leader in the development and evaluation of indicators for environmental health risk assessment and policy. Current work examines novel biomarkers of exposure and response to improve understanding of environmental factors contribute to population health.
