

# CACHET Seminar Series

Carmen Marsit, PhD

Rollins School of Public Health,  
Emory University

## “Using Placental Genomics to Understand the Environmental and Genetic Determinants of Children’s Health”

Carmen Marsit's research, teaching, and service is focused broadly on understanding the molecular mechanisms responsible for mediating the impact of the environment in human disease, utilizing inter- and multi-disciplinary research methods. His research program has focused on two distinct, yet highly related biologic processes: environmental carcinogenesis and human development.

UIC School of  
Public Health  
1603 W. Taylor

Room 932

Thursday  
January 30

3:00-4:00 PM

This event is  
open to the  
public
