WAIVER OF LIABILITY

Extended reality (XR) is a term referring to all real-and-virtual combined environments and human-machine interactions generated by computer technology and wearables. It includes representative forms such as augmented reality (AR), virtual reality (VR), and mixed reality (MR). Due to the unpredictable nature of the human response to extended reality, this agreement releases Towson University from all liability relating to injuries that may occur from the use of extended reality (AR/VR/MR) technologies. We require all participants (child/dependent/minor) to sign this waiver releasing Towson University from associated liability.

By my signature below, I acknowledge the risks involved in the use of extended reality technologies. These risks may include but are not limited to dizziness, minor nausea, motion illness, etc. I understand that while using the extended reality technologies, I may not be able to see the nearby physical objects. I understand that I should stop this experience if any of the above symptoms or any discomfort occur. I will also make every effort to obey safety precautions as listed in writing or as explained to me verbally. I will ask for clarification when needed. Additionally, I have no medical devices or conditions that will increase my likelihood of incurring injuries while engaging in this activity.

By signing this agreement, I have been informed of said risk and agree to the stipulations described above and in return, I will receive permission to use Towson University’s extended reality technologies.

Minors under the age of 18 who are not students enrolled at Towson University will NOT be allowed to use extended reality technologies without a parent or guardian signature.
