Residence Halls Overview

All halls are wired for cable television and data network services. The bedrooms contain beds, desks, desk chairs, and a closet or wardrobe. The floors in the rooms are carpeted and have window treatments. All residence halls, locked 24 hours per day, are co-ed and smoke-free.

The Residential Services Office has designed a Wellness Community in Institute Hall whose goal is to create an environment where students will be supported to make a commitment to keeping wellness a priority and abstaining from the use of alcohol, tobacco, and drugs. Residential Services also encourages students in the Wellness Community to focus on holistic wellness.

An overview and comparison of residence hall features and living environments is provided on the next page.
