

## Course Planning Specifics: Chemical Engineering

Students considering chemical engineering as a major should make sure that by the end of the first year, that they have completed the chemistry sequence (CH 1010-1040), and the calculus sequence (MA 1021-1024). This can be through a combination of AP or transfer credit, as well as WPI courses. So, if you received AP credit for courses early in the sequence, you can start at the next course in the sequence. [Click here](#) for the degree requirements for Chemical Engineering.

The Chemical Engineering sequence will begin with ChE 2011 in A term.

Please note: For chemical engineering majors, **1000-level** GPS courses with HU, SS or BB credit can be used to fulfill distribution requirements. All other GPS credit will count toward free electives.

### Example of a typical course schedule

<u>C term</u>	<u>D term</u>
CH 1010 or CH 1030	CH 1020 or CH 1040
GPS/HUA/SS/PH	GPS/HUA/SS/PH
MA	MA
PE (optional)	PE (optional)

# Course Planning Worksheet: Chemical Engineering

AP/IB/Transfer Credit: \_\_\_\_\_

## Abbreviation Key for Course Planning Tracker:

- **GPS** = Great Problems Seminar
- **HU**= Humanities Course (includes AB, AR, CN, EN, GN, HI, HU, INTL, ISE, MU, PY, RE, SP, TH, WR)
- **SS** = Social Science Course (includes ECON, ENV, GOV, PSY, SD, SOC, SS)
- **BB** = Biology Course
- **PH**= Physics Course
- **CH**= Chemistry Course

Any courses marked with an asterisk (\*) are optional programs, and can be taken in addition to the three courses.

**Please Note:** The Great Problems Seminars are a two term sequence course. They are also **linked**. This means that when registering for a GPS course in C term, you must register for its second half in D term.
