

Budgeting Template

This template should be used when doing the final budget. It should be done after getting quotes from different hardware stores. It considers the material, the type, the size, the estimated quantity, the cost per unit, the total cost, and notes. The final total cost includes a contingency cost, which is 20% of the total cost.

Facility Budget						
Section	Material	Type	Size	Estimated Quantity	Cost/Unit	Total Cost (Rand)
Trench						R 0.00
