To provide UXX]hcbU bi a VYfgnci k UbhUXXYXhc nci f Bobcat!5`Yfh5 Wbci bh log into the member portal with the credentials sent to you by email . You will be able to verify your information and add or delete notification methods there.

What is Bobcat Alert?

PSC Bobcat Alert is a system which allows PSC to warn the campus community of an impending emergency and provide timely information to protect lives and minimize campus disruption. Messages can be received via cell phone (text and/or voice), telephone, and email.

Authorized and trained PSC personnel administer the PSC Bobcat Alert system. They can send emergency messages, such as emergency protective actions, warnings and post-incident information, whenever needed.

How are notification alerts distributed?

Notification alerts are distributed via email, phone, and text messaging.

Emergency Contact Notifications

Information provided by a student emergency contact will be used to create a special notification group in the Bobcat Alert System . This group notification will be used to notify student emergency contacts of emergency situations on campus outside of the typical notifications. (snow closings, etc...)

Respect and equity for the members of our community are top priorities for Paul Smith's College. PSC prohibits any form of discrimination in our admissions and employment processes. Please visit <https://www.paulsmiths.edu/title-ix-and-equity> to review our non-discrimination policies.
